Calcasieu Mitigation Bank

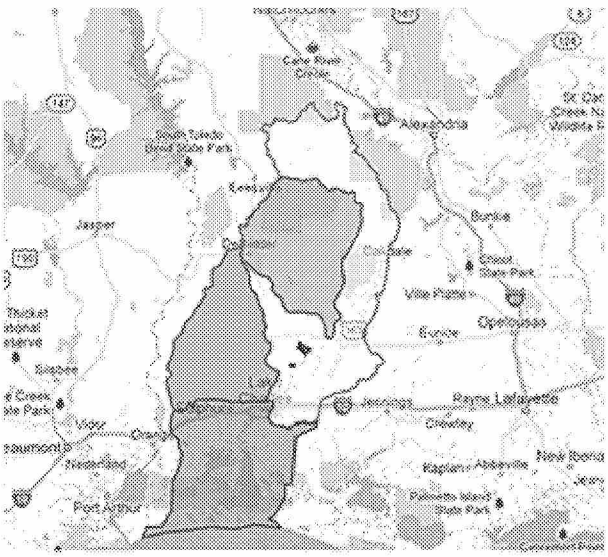
An Ecosystem Investment Partners project

THE CALCASIEU WETLAND MITIGATION BANK HAS CREDITS AVAILABLE!

Dear John:

Ecosystem Investment Partners is pleased to announce approval and credit release at our Calcasieu Mitigation Bank.

On March 22, 2013 the US Army Corps of Engineers New Orleans District and its Inter Agency Review Team approved and issued the first credit release off of the 1,500-acre wetland mitigation bank which will provide permittees with fully certified wetland mitigation credits that serve as compensatory mitigation under Section 404 of the Clean Water Act.



Please see the map at right showing the watersheds in Calcasieu, Allen, Jefferson Davis, and Beauregard Parishes (in the Lake Charles, Louisiana Region) that the bank services.

CREDITS AVAILABLE NOW

The first batch of mitigation credits has been released! If you have wetland mitigation needs in Southwest Louisiana, please call us to discuss.

MITIGATION CREDIT ADVANTAGES

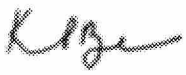
Our wetland mitigation bank offers a **straightforward and cost-effective solution** to the wetland mitigation needs of **residential**, **commercial**, **industrial**, and **public infrastructure projects** in southwest Louisiana. In situations where impacts to jurisdictional wetlands are unavoidable, a one-time credit purchase from the Calcasieu Mitigation Bank can help:

- Prevent wetland mitigation cost over-runs; and
- Irrevocably transfer a permit's perpetual mitigation liability to Ecosystem Investment Partners, the bank's sponsor and one of the nation's leading providers of environmental credits.

Purchasing mitigation credits from the Calcasieu Mitigation Bank also promotes the conservation and restoration of the longleaf pine ecosystem, one of the nation's most imperiled natural systems.

Please contact us anytime to discuss your wetland mitigation needs. We look forward to speaking with you.

Sincerely,



Katherine Birnie
