ABBREVIATIONS:
-: Not Analyzed
mg/kg: milligram per kilogram
mV: millivolts
NA: Not Applicable
ND (2.5): Not detected, number in parentheses is the laboratory reporting limit
NI: Not Ignitable

NOTES:
1. **Bold** values detected exceed the RCS-1 criteria.
2. **Bold ND (2.5)** values indicated the laboratory reporting limit exceeds the RCS-1 criteria.

ABBREVIATIONS:
-: Not Analyzed
mg/kg: milligram per kilogram
mV: millivolts
NA: Not Applicable
ND (2.5): Not detected, number in parentheses is the laboratory reporting limit
NI: Not Ignitable

NOTES:
1. **Bold** values detected exceed the RCS-1 criteria.
2. **Bold ND (2.5)** values indicated the laboratory reporting limit exceeds the RCS-1 criteria.

TABLE IV
SUMMARY OF SOIL QUALITY DATA
PARKING AREA BACKFILL
PHASE 2, WEST OF C STREET
BOSTON CONVENTION & EXHIBITION CENTER
BOSTON, MASSACHUSETTS

ABBREVIATIONS:
-: Not Analyzed
Deg F: degrees Fahrenheit
mg/kg: milligram per kilogram
mV: millivolts
NA: Not Applicable
ND (2.5): Not detected, number in parentheses is the laboratory reporting limit
NI: Not Ignitable
S.U.: Standard Units

NOTES:
1. **Bold** values detected exceed the RCS-1 criteria.
2. **Bold ND (2.5)** values indicated the laboratory reporting limit exceeds the RCS-1 criteria.

TABLE V

SUMMARY OF SOIL QUALITY DATA
SUMMARY OF SOIL QUALITY DATA
PHASE 2, WEST OF C STREET
SOUTH BOSTON, MASSACHUSETTS

Notes:
1. ND: indicates compound not detected above laboratory quantitation limit. Number in parentheses is one-half the laboratory quantitation limit.
2. - : indicates compound not analyzed.
3. Italicized values indicate estimated concentrations.
4. Underlined values indicate trace concentrations detected below the quantitation limit.
5. EPH values provided in bold were partitioned from TPH based on existing EPH data. TPH values were partitioned as follows: 14% partitioned into C9-C18 aliphatics, 31% into C19-C36 aliphatics, and 56% into C11-C22 aromatics.
6. Samples identified with an "(D)" are duplicate samples.
7. Highlighted cells are the average levels for duplicate and field samples.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

ABBREVIATIONS:
NA : Not applicable
- : Not analyzed
ND: Not detected above laboratory detection limit
E : analtye response exceeded calibration range. Analyte result is an estimate.
J : Estimated value detected below the laboratory detection limit.

NOTES:
1. Data are compared to 2003 MCP, in effect at time of RAM Completion.
2. This table includes only those compounds detected on the dates indicated.
3. Bold values indicate an exceedance of 2003 RCS-1 criteria.
4. Bold ND values indicate that one-half the laboratory quantitation limit exceeds the 2003 RCS-1 criteria.

(Copy of Owner Certification Letter)

Owner's Certification – 40 CFR 761.61(a)(3)(i)(E)
TSCA Work Plan
Boston Convention & Exhibition Center
Phase 2, West of C Street
Boston, Massachusetts

The parties below certify that all sampling plans, sample collection procedures, sample preparation procedures, extraction procedures, and instrumental/chemical analysis procedures used to assess or characterize the PCB contamination within the TSCA regulated areas at the Boston Convention & Exhibition Center Phase 2, West of C Street Site are on file at the offices of Haley & Aldrich, Inc., 465 Medford Street, Suite 2200, Boston, MA 02129, and are available for EPA inspection upon request.

Massachusetts Convention Center Authority (Owner):

Jim C. Rodd

WELL CONSTRUCTION DETAILS

Type of protective cover: Compression - pent. bolt
Depth of Roadway Box below ground surface: 0.0 ft
Depth of top of riser below ground surface: 0.3 ft
Type of protective casing: Roadway Box
Length: 0.8 ft
Inside diameter: 6.0 in.
Depth of bottom of Roadway Box: 0.8 ft
Type of riser pipe: Schedule 40 PVC
Inside diameter of riser pipe: 2.0 in.
Depth of bottom of riser pipe: 5.0 ft

Type of Seals	Top of Seal (ft)	Thickness (ft)
Concrete	0.0	0.5
Bentonite	3.0	1.0
Bentonite	15.5	2.5

Diameter of borehole: 4.5 in.
Depth to top of well screen: 5.0 ft
Type of screen: Machine slotted Sch 40 PVC
Screen gauge or size of openings: 0.010 in.
Diameter of screen: 2.0 in.
Type of Backfill around Screen: #1 Filter Sand
Depth to bottom of well screen: 15.0 ft
Bottom of silt trap: -
Depth of bottom of borehole: 18.0 ft

PROJECT	BCEC PHASE 2 TSCA CHARACTERIZATION	H&A FILE NO.	12486-562
LOCATION	BOSTON, MA	PROJECT MGR.	M. CRONAN
CLIENT	MCCA	FIELD REP.	~~S SHAW~~ / A. Fleming
CONTRACTOR	GEOLOGIC EARTH EXPLORATION, INC.	DATE STARTED	3/2/15
DRILLER	Glen Peterson	DATE FINISHED	3/2/15

Elevation ft. Datum Boring Location SEE PLAN

Item	Casing	Sampler	Core Barrel
Type	P	S	—
Inside Diameter (in.)	5	3	—
Hammer Weight (lb.)	140	140	
Hammer Fall (in.)	30	30	

Rig Make & Model: [X] Truck [ ] ATV [ ] Track [ ] Skid; [ ] Tripod [ ] Geoprobe [ ] Air Track; [ ] Cat-Head [X] Winch [X] Roller Bit [X] Cutting Head

Hammer Type: [ ] Safety [ ] Doughnut [X] Automatic

Drilling Mud: [ ] Bentonite [ ] Polymer [X] None

Casing Advance: Type Method Depth PW Driven 4.0

Drilling Notes:

Depth (ft.)	Sampler Blows per 6 in.	Sample No. & Recovery (in.)	Sample Depth (ft.)	Well Diagram	Stratum Change (ft.)	USCS Symbol	Visual-Manual Identification & Description (density/consistency, color, GROUP NAME & SYMBOL, maximum particle size*, structure, odor, moisture, optional descriptions, geologic interpretatio	% Coarse Gravel	% Fine Gravel	% Coarse Sand	% Medium Sand	% Fine Sand	% Fines	Dilatancy	Toughness	Plasticity	Strength	Field Test	PID
0																			
	100/3"	51 3	1 1.25			SM	very dense, black to dark grey silty SAND (SM). 80% concrete, brick, asphalt and rubble/gravel												2-4
2	51 32 21 22	52 19	2 4			SM	Very dense, black, silty SAND (SM) trace gravel, mps 0.5", no structure, no odor, moist, trace metal slag, brick, coal, scrap metal												0.2
4	20 26 22 18	53 16	4 6			SM	Medium dense, tan, silty SAND (SM), mps 0.1", no structure, no odor, moist												4-6 ND
							— FILL —												
6	23 20 11 4	54 0	6 8			SP	Medium dense, tan to grey, Poorly graded SAND with gravel (SP), mps 3", no structure, no odor, wet												6-8 ND
8							NOTE: on first attempt at a 3" spoon from 6-8' a cobble was lodged in the tip, second attempt just pushed spoon for R=7"												
							BOE 8.0'												

VOCs at 3.0
