WETLANDS: Limetree - On February 6, 2018, CEPD received clarification from the Corps of Engineers stating that the currently active authorization for the Limetree Single Point Mooring System project in

Saint Croix was issued under Nationwide Permit No. 6. This authorization only covers survey and assessment activities related to the proposed project, and does not constitute an authorization for the proposed construction of the mooring project, as the information presented through the DARTER database seems to indicate. The complete single-point mooring project is still being evaluated by the Corps, and information gathered from the authorized surveys will be needed in order to issue a final determination regarding the full project. EPA's comments on the project are being forwarded to the applicant and are pending a response to the Corps, which will be coordinated with EPA as appropriate.
