Chicago, Illinois 60604

Dear Ms. Swanson,

Ball Corporation has received your letter dated September 8, 1989 requesting documentation be submitted within 15 days that all hazardous waste previously at our storage facility (IND 000 810 713) has been properly disposed. This letter and accompanying material is being sent in compliance with that request.

First, however, I need to clarify a point concerning the date from which no hazardous waste was on-site. In my May 3, 1989 letter, I said that no "waste has been present in the facility since October 1988." The precise date on which the last hazardous waste left the building was October 28, 1988. Therefore, this is the date from which we claim no hazardous waste has been present on-site.

Since the stated intent of your request was for Ball to demonstrate proper disposal of all waste present as of July 27, 1988, we have extended the time frame of your request to the period beginning July 27, 1988 and ending October 29, 1988.

In the binder marked 'Operating Record,' in tabbed sections, are:

1. A daily summary of shipments from of Building 48
2. A master list that ties each bulk drum to a specific Waste Profile Sheet
3. Sampling Certifications, Waste Profile Sheets, Waste Analysis Reports and Solvent Screen Reports on each waste stream.
4. Inventories with screening results on 424 drums and 4359 smaller containers conducted in March 1988.

Copies of all hazardous waste manifests are contained in the appropriately marked binder. Because certain copies are illegible, we have included copies of both the retained and returned sections of each manifest.

Copies of land restriction notifications forms are contained in the appropriately marked binder.

I wish to reiterate that the above information applies to all disposal operation conducted at the storage facility from the period of July 27, 1988 until October 29, 1988; that no waste entered the building after March 1, 1988; that all waste was removed under contract with Chemical Waste Management; and that all waste was removed from the building on or before October 29, 1988.

We feel that the information in this submission is responsive to your request for demonstration that all waste was properly disposed. If any further documentation or explanation is needed, please let us know.

Richard H. Cole, Jr.
Chemical Information Analyst

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

G. OTHER HAZARDOUS CHARACTERISTICS

1. Is this waste a listed solvent waste as defined by 40 CFR 261.31 (F001, F002, F003, F004, or F005)? ☐ Yes ☒ No
2. Does this waste contain greater than 1000 ppm total halogenated organic compounds? ☐ Yes ☒ No
3. Indicate if this waste is any of the following:
   - ☐ RCRA Reactive
   - ☐ Water Reactive
   - ☐ Explosive
   - ☐ Shock Sensitive
   - ☐ Pyrophoric
   - ☐ Radioactive
   - ☐ Etiological
   - ☐ Pesticide Manufacturing Waste
   - ☐ Other _____
   - ☒ None of the above

H. COMPLETE ONLY FOR WASTES INTENDED FOR FUELS or INCINERATION

	LESS THAN	or ACTUAL
Beryllium	☒ < 5000 ppm	_____ ppm
Potassium	☒ < 5000 ppm	_____ ppm

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) **CWM Sales Rep. #:** _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) **CWM Sales Rep. #:** _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

GENERATOR'S WASTE MATERIAL PROFILE SHEET (Continued)

LAB H 68466
Waste Profile Sheet Code

G. OTHER HAZARDOUS CHARACTERISTICS

1. Is this waste a listed solvent waste as defined by 40 CFR 261.31 (F001, F002, F003, F004, or F005)? ☒ Yes ☐ No
2. Does this waste contain greater than 1000 ppm total halogenated organic compounds? ☒ Yes ☐ No
3. Indicate if this waste is any of the following:

☐ RCRA Reactive	☐ Radioactive
☐ Water Reactive	☐ Etiological
☐ Explosive	☐ Pesticide Manufacturing Waste
☐ Shock Sensitive	☐ Other _____
☐ Pyrophoric	☒ None of the above

H. COMPLETE ONLY FOR WASTES INTENDED FOR FUELS or INCINERATION

	LESS THAN	or	ACTUAL
Beryllium	☒ < 5000 ppm		_____ ppm
Potassium	☒ < 5000 ppm		_____ ppm
Sodium	☒ < 5000 ppm		_____ ppm
Total Bromine	☒ < 2 %		_____ %
Total Chlorine	☒ < 35 %		_____ %
Total Fluorine	☒ < 1 %		_____ %
Total Sulfur			< 1 %

I. OPTIONAL — RECLAMATION, FUELS, OR INCINERATION PARAMETERS Provide if information is available.

Range

1. Heat Value (BTU/lb): < 10000 2. Water: _____ %
3. Viscosity (cps): _____ @ ☐ _____ °F ☐ 100°F ☐ 150°F
4. Ash: < 1 % 5. Settleable solids: < 1 %
6. Vapor Pressure @ STP (mm/Hg): 1-2
7. Is this waste a pumpable liquid? ☒ Yes ☐ No
   Type of pump? _____
8. Can this waste be heated to improve flow? ☐ Yes ☒ No
9. Is this waste soluble in water? ☐ Yes ☒ No
10. Particle size: Will the solid portion of this waste pass through a 1/8 inch screen? ☒ Yes ☐ No

J. TRANSPORTATION INFORMATION

1. Is this a DOT Hazardous Material? ☒ Yes ☐ No 2. Anticipated Annual Volume/Units: 500-2000 kgal
3. Proper Shipping Name: Hazardous waste liquid N.O.S
4. Hazard Class: ORM-E 5. I.D. #: NA9189
6. Additional Description: (_____)
7. Method of Shipment: ☐ Bulk Liquid ☐ Bulk Solid ☒ Drum (Type/Size): various / various Other: _____
8. CERCLA Reportable Quantity (RQ): _____ 9. RQ Units (lb/kg): _____
10. USEPA Hazardous Waste? ☒ Yes ☐ No 11. USEPA Hazardous Waste Number(s): F002, F005
12. State Hazardous Waste? ☒ Yes ☐ No 13. State Hazardous Waste Number(s): F002, F005

K. SPECIAL HANDLING INFORMATION _____

GENERATOR'S CERTIFICATION OF REPRESENTATIVE SAMPLE

PLEASE PRINT IN INK OR TYPE (Elite, 12-pitch).

LAB H 68467

Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) CWM Sales Rep. #: _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)

If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68967	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	oils, paint, resin, polymer	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88 / 10	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David Smaniotto	5. Sampler's Signature:

6. Print Sampler's Name: David SMANIOTTO
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.

I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

1. Witness' Signature: _____
2. Witness' Name: _____ 3. Witness' Title: _____

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68468 55 70 45	1. Waste Profile Sheet Code:

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68475	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	Phosphorus Pentoxide	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David J Smaniotto	5. Sampler's Signature:

6. Print Sampler's Name: David SMANIOTTO
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.
I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

1. Witness' Signature: _____
2. Witness' Name: _____ 3. Witness' Title: _____

GENERATOR'S CERTIFICATION OF REPRESENTATIVE SAMPLE

PLEASE PRINT IN INK OR TYPE (Elite, 12-pitch).

LAB H 68470
Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) CWM Sales Rep. #: _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68470 55	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	Mineral acid	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David J Dramatto	5. Sampler's Signature:

6. Print Sampler's Name: David Shaniotto
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.
I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

1. Witness' Signature: _____
2. Witness' Name: _____ 3. Witness' Title: _____
4. Witness' Employer: _____ 5. Date: _____

GENERATOR'S CERTIFICATION OF REPRESENTATIVE SAMPLE

PLEASE PRINT IN INK OR TYPE (Elite, 12-pitch).

LAB H 68464
Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) CWM Sales Rep. #: _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68464	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	Mixed organic/inorganic Solids	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David J Dramatto	5. Sampler's Signature:

6. Print Sampler's Name: David Smanotto
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.
I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

1. Witness' Signature: _____
2. Witness' Name: _____ 3. Witness' Title: _____
4. Witness' Employer: _____ 5. Date: _____

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

CHEMICAL WASTE MANAGEMENT, Inc.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)

If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.

I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

GENERATOR'S WASTE MATERIAL PROFILE SHEET (Continued)

LAB H 68457
Waste Profile Sheet Code

G. OTHER HAZARDOUS CHARACTERISTICS

1. Is this waste a listed solvent waste as defined by 40 CFR 261.31 (F001, F002, F003, F004, or F005)? ☐ Yes ☒ No
2. Does this waste contain greater than 1000 ppm total halogenated organic compounds? ☐ Yes ☒ No
3. Indicate if this waste is any of the following:
   - ☐ RCRA Reactive
   - ☐ Water Reactive
   - ☐ Explosive
   - ☐ Shock Sensitive
   - ☐ Pyrophoric
   - ☐ Radioactive
   - ☐ Etiological
   - ☐ Pesticide Manufacturing Waste
   - ☐ Other _____
   - ☒ None of the above

H. COMPLETE ONLY FOR WASTES INTENDED FOR FUELS or INCINERATION

	LESS THAN	or ACTUAL
Beryllium	☐ < 5000 ppm	_____ ppm
Potassium	☐ < 5000 ppm	_____ ppm
Sodium	☐ < 5000 ppm	_____ ppm
Total Bromine	☐ < 2 %	_____ %
Total Chlorine	☐ < 35 %	_____ %
Total Fluorine	☐ < 1 %	_____ %
Total Sulfur		_____ %

I. OPTIONAL — RECLAMATION, FUELS, OR INCINERATION PARAMETERS Provide if information is available.

Range

1. Heat Value (BTU/lb): _____ - _____ 2. Water: _____ %
3. Viscosity (cps): _____ @ ☐ _____ °F ☐ 100°F ☐ 150°F
4. Ash: _____ % 5. Settleable solids: _____ %
6. Vapor Pressure @ STP (mm/Hg): _____
7. Is this waste a pumpable liquid? ☐ Yes ☐ No
   Type of pump? _____
8. Can this waste be heated to improve flow? ☐ Yes ☐ No
9. Is this waste soluble in water? ☐ Yes ☐ No
10. Particle size: Will the solid portion of this waste pass through a 1/8 inch screen? ☐ Yes ☐ No

J. TRANSPORTATION INFORMATION

1. Is this a DOT Hazardous Material? ☒ Yes ☐ No 2. Anticipated Annual Volume/Units: 100-1000/gal
3. Proper Shipping Name: Waste Acid liquid N.O.S RQ
4. Hazard Class: Corrosive Material 5. I.D. #: NA1760
6. Additional Description: (RQ D002)
7. Method of Shipment: ☐ Bulk Liquid ☐ Bulk Solid ☒ Drum (Type/Size): various/various Other: _____
8. CERCLA Reportable Quantity (RQ): _____ 9. RQ Units (lb/kg): _____
10. USEPA Hazardous Waste? ☒ Yes ☐ No 11. USEPA Hazardous Waste Number(s): D002
12. State Hazardous Waste? ☒ Yes ☐ No 13. State Hazardous Waste Number(s): D002

K. SPECIAL HANDLING INFORMATION _____

☐ Additional Page(s) Attached

L. GENERATOR CERTIFICATION

I hereby certify that all information submitted in this and all attached documents contains true and accurate descriptions of this waste material, and all relevant information regarding known or suspected hazards in the possession of the generator has been disclosed.

1. _____ Signature
2. _____ Title
3. _____ Name (Type or Print)
4. _____ Date

Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) **CWM Sales Rep. #:** _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)

If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

GENERATOR'S WASTE MATERIAL PROFILE SHEET (Continued)

LAB H 68455
Waste Profile Sheet Code

G. OTHER HAZARDOUS CHARACTERISTICS

1. Is this waste a listed solvent waste as defined by 40 CFR 261.31 (F001, F002, F003, F004, or F005)? ☐ Yes ☒ No
2. Does this waste contain greater than 1000 ppm total halogenated organic compounds? ☐ Yes ☒ No
3. Indicate if this waste is any of the following:
   - ☐ RCRA Reactive
   - ☐ Water Reactive
   - ☐ Explosive
   - ☐ Shock Sensitive
   - ☐ Pyrophoric
   - ☐ Radioactive
   - ☐ Etiological
   - ☐ Pesticide Manufacturing Waste
   - ☐ Other _____
   - ☒ None of the above

H. COMPLETE ONLY FOR WASTES INTENDED FOR FUELS or INCINERATION

	LESS THAN	or	ACTUAL
Beryllium	☐ < 5000 ppm		_____ ppm
Potassium	☐ < 5000 ppm		_____ ppm
Sodium	☐ < 5000 ppm		_____ ppm
Total Bromine	☐ < 2 %		_____ %
Total Chlorine	☐ < 35 %		_____ %
Total Fluorine	☐ < 1 %		_____ %
Total Sulfur			_____ %

I. OPTIONAL — RECLAMATION, FUELS, OR INCINERATION PARAMETERS Provide if information is available.

Range

1. Heat Value (BTU/lb): _____ - _____ 2. Water: _____ %
3. Viscosity (cps): _____ @ ☐ _____ °F ☐ 100°F ☐ 150°F
4. Ash: _____ % 5. Settleable solids: _____ %
6. Vapor Pressure @ STP (mm/Hg): _____
7. Is this waste a pumpable liquid? ☐ Yes ☐ No
   Type of pump? _____
8. Can this waste be heated to improve flow? ☐ Yes ☐ No
9. Is this waste soluble in water? ☐ Yes ☐ No
10. Particle size: Will the solid portion of this waste pass through a 1/8 inch screen? ☐ Yes ☐ No

J. TRANSPORTATION INFORMATION

1. Is this a DOT Hazardous Material? ☐ Yes ☒ No 2. Anticipated Annual Volume/Units: 2000-3000 gal
3. Proper Shipping Name: NON Hazardous Special Waste
4. Hazard Class: _____ 5. I.D. #: _____
6. Additional Description: (_____)
7. Method of Shipment: ☐ Bulk Liquid ☐ Bulk Solid ☒ Drum (Type/Size): various various Other: _____
8. CERCLA Reportable Quantity (RQ): _____ 9. RQ Units (lb/kg): _____
10. USEPA Hazardous Waste? ☐ Yes ☒ No 11. USEPA Hazardous Waste Number(s): _____
12. State Hazardous Waste? ☐ Yes ☒ No 13. State Hazardous Waste Number(s): _____

K. SPECIAL HANDLING INFORMATION _____

Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) CWM Sales Rep. #: _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68454	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp.	2. Generator's Name:
3. [redacted] Name of Waste:	Halogenated Solvents	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David J Smaniotto	5. Sampler's Signature:

6. Print Sampler's Name: David Smaniotto
7. Sampler's Title: Tech Mgt
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.
I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)
If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)
drums

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H68453	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	Organic Solvents	3. Name of Waste:

6. Print Sampler's Name: David Smaniotto
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.
I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)

If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

GENERATOR'S CERTIFICATION OF REPRESENTATIVE SAMPLE

PLEASE PRINT IN INK OR TYPE (Elite, 12-pitch).

LAB H 72320

Waste Profile Sheet Code

CWM Location of Original: _____ (SHADED AREAS FOR CWM USE ONLY) CWM Sales Rep. #: _____

This completed form must be returned, with the representative sample, to:

CHEMICAL WASTE MANAGEMENT, INC.
Technical Services Division
4300 W. 123rd Street
Alsip, Illinois 60658

INSTRUCTIONS FOR COMPLETING THIS FORM ARE FOUND ON THE OPPOSITE SIDE. In order to determine whether Chemical Waste Management, Inc. can accept the special waste described in the Generator's Waste Material Profile Sheet referenced above, you must obtain and supply us with a representative sample of the waste. We may analyze the sample to verify the information that you have provided to us. A representative sample is defined as a sample obtained using any of the applicable sampling methods specified in 40 CFR 261-Appendix I or an equivalent method. Collect a representative sample of your waste and complete the form below. Apply the peel off label and ship your sample along with this form to the address noted above. If you have any questions regarding obtaining a representative sample of your waste, please refer to the instructions for this form, or contact your Chemical Waste Management, Inc. sales representative.

A. SAMPLING METHOD (Indicate which method was employed)

If sampling requirement has been waived by Chemical Waste Management, Inc., do not complete this Generator's Certification of Representative Sample form.

1. ☒ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above according to the sampling methods specified in 40 CFR 261-Appendix I.
2. ☐ I have obtained a representative sample of the waste material described in the Generator's Waste Material Profile Sheet referenced above using a method equivalent to the sampling methods described in 40 CFR 261-Appendix I.

B. SAMPLE SOURCE (e.g., drum, lagoon, pit, pond, tank, vat)

DRUMS

C. SAMPLE LABEL — COMPLETE LABEL BEFORE REMOVING

1. Waste Profile Sheet Code:	LAB H72320	1. Waste Profile Sheet Code:
2. [redacted] Generator's Name:	Ball Corp	2. Generator's Name:
3. [redacted] Name of Waste:	Oil & Solvents	3. Name of Waste:
4. [redacted] Sample Hour/Date:	3/15/88 / 10	4. Sample Hour/Date:
5. [redacted] Sampler's Signature:	David J Smanotto	5. Sampler's Signature:

6. Print Sampler's Name: David Smanotto
7. Sampler's Title: Tech Mgr
8. Sampler's Employer (if CWM, see D. below): CWMI

D. WITNESS VERIFICATION (if required) In most circumstances you will be obtaining the sample. However, in those cases in which Chemical Waste Management, Inc. obtains the sample, one of your employees must be present to direct the particular source to be sampled, to witness the sampling, and to complete this Part D.

I was personally present during the sampling described. I directed the waste source to be sampled, and I verify the information noted above.

1. Witness' Signature: _____
2. Witness' Name: _____ 3. Witness' Title: _____
4. Witness' Employer: _____ 5. Date: _____

F. GENERATOR CERTIFICATION

By signing this profile sheet, the generator certifies that **unless clearly stated above or in attachments:**

1. This waste is not a "Hazardous Waste" as defined by either 40 CFR 261 or the state in which the waste is now located.
2. This waste is not a listed solvent waste as defined by 40 CFR 261.31 (F001, F002, F003, F004, or F005).
3. This waste is not a Dioxin listed waste as defined by 40 CFR 261.31 (e.g., F020, F021, F022, F023, F026, F027, or F028).
4. This waste does not contain greater than 1000 ppm halogenated organic compounds.
5. This waste does not contain regulated quantities of PCB's (Polychlorinated Biphenyls).
6. This sheet and its attachments contain true and accurate descriptions of this waste material. All relevant information regarding known or suspected hazards in the possession of the generator has been disclosed.

SPECIAL WASTE MANAGEMENT DECISION

WASTE PROFILE SHEET CODE: LAB V86857

I. REQUEST FOR DECISION: ☒ INITIAL ☐ RENEWAL

REQUESTER NAME: CWM-TSD-Midwest Region

WMI COMPANY: CWM

GENERATOR NAME: BALL CORPORATION

LOCATION: Alsip, Illinois

WASTE NAME: Lab Packs

PROPOSED ULTIMATE MANAGEMENT FACILITY: CWM CHEMICAL SERVICES

PROPOSED INTERMEDIATE TRANSFER FACILITY:

TRANSPORTATION TO BE PROVIDED BY:

II. TECHNICAL MANAGER AND LABORATORY MANAGER DECISION: ☒ APPROVED ☐ DISAPPROVED

A. IF DISAPPROVED, EXPLAIN:

B. IF APPROVED, COMPLETE EACH SECTION BELOW:

1. APPROVED MANAGEMENT METHOD(S):

Transportation and storage

DOES THE ABOVE PRODUCE A WMI SPECIAL WASTE? ☐ YES ☐ NO (IF YES, YOUR APPROVAL SHOULD BE CONDITIONED OBTAINING A WMI SPECIAL WASTE MANAGEMENT DECISION BY A DATE CERTAIN.)

2. PERMIT STATUS WITH RESPECT TO THIS SPECIAL WASTE USING THE APPROVED MANAGMENT METHOD(S).

3. PRECAUTION, CONDITIONS OR LIMITATIONS ON APPROVAL:

Transportation and storage decision

4. EMPIRICAL OBSERVATIONS OR TESTS WHICH MUST BE MADE ON EACH LOAD OF THIS SPECIAL WASTE AT THE TIME DELIVERED TO THE PROPOSED FACILITY, INCLUDING ALL APPLICABLE WASTE ANALYSIS PLAN REQUIREMENTS:

To be determined by Ultimate Management Facility upon delivery.

5. LABORATORY ANALYSIS OF A REPRESENTATIVE SPECIAL WASTE SAMPLE WAS: (check only one)
☐ WAIVED ☐ SUPPLIED BY GENERATOR ☐ FROM A WMI LAB ☐ FROM BOTH GENERATOR AND WMI LAB

6. SPECIAL WASTE CHARACTERIZATION, FOR PURPOSES OF COMPANY POLICY: (check only one)
☐ REGULATED HAZARDOUS ☐ NON-REGULATED HAZARDOUS ☐ NON-HAZARDOUS

7. OPTIONAL FOR COMPLETION:
PROPER US DOT SHIPPING NAME

HAZARD CLASS: USDOT I.D. NO.:

K. Handling Codes for Wastes Listed Above

15. Special Handling Instructions and Additional Information

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations and according to the requirements of the Wisconsin Department of Natural Resources. If I am a large quantity generator, I also certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment;

OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations and according to the requirements of the Wisconsin Department of Natural Resources. If I am a large quantity generator, I also certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment;

OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment, OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

LAND BAN

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: BALL CORP. CWMI Profile Number: LAB86583

EPA ID Number: IND006810713 Manifest Number: IL2054873

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) |X| I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) | | The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORP CWMI Profile Number: LA3 V86583

EPA ID Number: IN0 000810713 Manifest Number: IL 205 4873

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

| X | 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes	
Acetone		0.05	X	0.59
n-Butyl alcohol		5.0		5.0
Carbon disulfide		1.05		4.81
Carbon tetrachloride		0.05		0.96
Chlorobenzene		0.15		0.05
Cresols		2.82		0.75
Cresylic acid		2.82		0.75
Cyclohexanone		0.125		0.75
1,2-Dichlorobenzene		0.65		0.125
Ethyl acetate		0.05		0.75
Ethyl benzene		0.05		0.053
Ethyl ether		0.05		0.75
Isobutanol		5.0		5.0
Methanol		0.25		0.75
Methylene chloride		0.20	X	0.96
Methylene chloride (from pharmaceutical industry)		12.7		0.96
Methyl ethyl ketone		0.05		0.75
Methyl isobutyl ketone		0.05		0.33
Nitrobenzene		0.66		0.125
Pyrdine		1.12		0.33
Tetrachloroethylene		0.079		0.05
Toluene		1.12		0.33
1,1,1-Trichloroethane		1.05		0.41
1,2,2-Trichloro-1,2,2-trifluroethane		1.05		0.96
Trichloroethylene		0.062		0.091
Trichlorofluoromethane		0.05		0.96
Xylene		0.05		0.15
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: BALL CORP CWMI Profile Number: LAB186583

EPA ID Number: IND000810713 Manifest Number: IL2054874

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) [X] I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) [ ] The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) [ ] The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORP CWMI Profile Number: LA8V8C358

EPA ID Number: IND000810713 Manifest Number: IL2054876

This form is submitted to SCA CHEMICAL SERVICES CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

| | 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes	
Acetone		0.05		0.59
n-Butyl alcohol		5.0		5.0
Carbon disulfide		1.05		4.81
Carbon tetrachloride		0.05		0.96
Chlorobenzene		0.15		0.05
Cresols		2.82		0.75
Cresylic acid		2.82		0.75
Cyclohexanone		0.125		0.75
1,2-Dichlorobenzene		0.65		0.125
Ethyl acetate		0.05		0.75
Ethyl benzene		0.05		0.053
Ethyl ether		0.05		0.75
Isobutanol		5.0		5.0
Methanol		0.25		0.75
Methylene chloride		0.20		0.96
Methylene chloride (from pharmaceutical industry)		12.7		0.96
Methyl ethyl ketone		0.05		0.75
Methyl isobutyl ketone		0.05		0.33
Nitrobenzene		0.66		0.125
Pyrdine		1.12		0.33
Tetrachloroethylene		0.079		0.05
Toluene		1.12		0.33
1,1,1-Trichloroethane		1.05		0.41
1,2,2-Trichloro-1,2,2-trifluroethane		1.05		0.96
Trichloroethylene		0.062		0.091
Trichlorofluoromethane		0.05		0.96
Xylene		0.05		0.15
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: BALL CORP CWMI Profile Number: LAB Y8C358

EPA ID Number: IND000581073 Manifest Number: IL2054877

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) | X | I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) | | The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Signature Title Date

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes	
Acetone		0.05	X	0.59
n-Butyl alcohol		5.0		5.0
Carbon disulfide		1.05		4.81
Carbon tetrachloride		0.05		0.96
Chlorobenzene		0.15		0.05
Cresols		2.82		0.75
Cresylic acid		2.82		0.75
Cyclohexanone		0.125		0.75
1,2-Dichlorobenzene		0.65		0.125
Ethyl acetate		0.05		0.75
Ethyl benzene		0.05		0.053
Ethyl ether		0.05		0.75
Isobutanol		5.0		5.0
Methanol		0.25		0.75
Methylene chloride		0.20	X	0.96
Methylene chloride (from pharmaceutical industry)		12.7		0.96
Methyl ethyl ketone		0.05		0.75
Methyl isobutyl ketone		0.05		0.33
Nitrobenzene		0.66		0.125
Pyrdine		1.12		0.33
Tetrachloroethylene		0.079		0.05
Toluene		1.12		0.33
1,1,1-Trichloroethane		1.05		0.41
1,2,2-Trichloro-1,2,2-trifluroethane		1.05		0.96
Trichloroethylene		0.062		0.091
Trichlorofluoromethane		0.05		0.96
Xylene		0.05		0.15
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORPORATION CWMI Profile Number: LAB #68466

EPA ID Number: IND 000810713 Manifest Number: IL2054928

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

| X | 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Jeffrey A. Winegar — Environmental Engineer — 8/9/88

Trichlorofluoromethane		0.05		0.96
Xylene		0.05		0.15
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: BALL CORPORATION CWMI Profile Number: LAB #68468

EPA ID Number: IND000810713 Manifest Number: CWMA 407703

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) | X | I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) | | The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

Signature	Title	Date

Instructions for Completing Front Side of Form

The California List represents the second phase of the federal land disposal ban which became effective July 8, 1987. A waste is subject to the California List prohibitions if it meets each of the following four criteria:

(1) the waste must contain a constituent specified in the California List provisions or have a pH less than or equal to two; and

(2) the physical form of the waste must be liquid (except for HOCs); and

(3) the waste containing the California List constituent must be listed or identified as hazardous under RCRA section 3001; and

(4) the waste must contain a concentration of one or more of the California List constituents at or above the levels specified in section 3004(d).

Any generator or treater that manages a California List waste must accompany the shipment off-site with a notification/certification by marking one of the three boxes on the reverse side of this form.

MARK BOX 1 if you are the initial generator of a liquid hazardous waste containing one (or more) of the following substances in the specified concentrations:

(1) Free cyanides at concentrations greater than or equal to 1000 mg/l.

(2) One (or more) of these metals (or elements) at concentrations greater than or equal to those specified below:

a. Arsenic and/or compounds (as As) 500 mg/l;
b. Cadmium and/or compounds (as Cd) 100 mg/l;
c. Chromium VI and/or compounds (as CrVI) 500 mg/l;
d. Lead and/or compounds (as PB) 500 mg/l;
e. Mercury and/or compounds (as Hg) 20 mg/l;
f. Nickel and/or compounds (as Ni) 134 mg/l;
g. Selenium and/or compounds (as Se) 100 mg/l;
h. Thallium and/or compounds (as TH) 130 mg/l.

(3) Liquid hazardous wastes having a pH less than or equal to two (2.0).

(4) Liquid hazardous wastewaters that are primarily water and contain halogenated organic compounds (HOCs) in total concentration greater than or equal to 1,000 mg/l and less than 10,000 mg/l.

(5) Polychlorinated biphenyls (PCBs) at concentrations greater than or equal to 50 ppm. (Remember the waste must also be a RCRA hazardous waste).

MARK BOX 2 if you have treated one (or more) of the above California List wastes in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D or the applicable prohibitions set forth in 40 CFR 268.32. This means that (1) for liquid hazardous wastes containing free cyanides or metals at the concentration levels specified above, you have treated the waste below those specified concentration levels, or rendered the waste non-liquid per the paint filter test; or (2) for liquid corrosive wastes, you have either treated the waste above a pH of two, or rendered the waste non-liquid per the paint filter test; or (3) for wastewaters containing HOCs in total concentrations greater than or equal to 1,000 mg/l and less than 10,000 mg/l, you have treated the waste below 1,000 mg/l; or (4) for liquid hazardous wastes containing PCBs at concentrations greater than or equal to 50 ppm but less than 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70 or burned it in a high efficiency boiler in accordance with 40 CFR 761.60; or (5) for liquid hazardous waste containing PCBs at concentrations greater than or equal to 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70. All liquid hazardous wastes containing PCBs over 50 ppm must also be incinerated in accordance with Parts 264, 265 and 266. **The certification on the reverse side must be given by the treater.**

MARK BOX 3 if your waste is one of the following:

(A) Liquid hazardous wastes that contain HOCs in total concentrations greater than or equal to 1,000 mg/l but are not wastewaters.

(B) Non-liquid hazardous wastes containing HOCs in total concentrations greater than or equal to 1,000 mg/kg.

Also mark Box 3 if the California List waste is soil or debris generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004 or 3008 of RCRA. This waste is not banned from land disposal until November 8, 1988. Box 3 should also be marked if your waste is subject to a case-by-case extension or no-migration petition.

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Instructions for Completing Front Side of Form

The California List represents the second phase of the federal land disposal ban which became effective July 8, 1987. A waste is subject to the California List prohibitions if it meets each of the following four criteria:

(1) the waste must contain a constituent specified in the California List provisions or have a pH less than or equal to two; and

(2) the physical form of the waste must be liquid (except for HOCs); and

(3) the waste containing the California List constituent must be listed or identified as hazardous under RCRA section 3001; and

(4) the waste must contain a concentration of one or more of the California List constituents at or above the levels specified in section 3004(d).

Any generator or treater that manages a California List waste must accompany the shipment off-site with a notification/certification by marking one of the three boxes on the reverse side of this form.

MARK BOX 1 if you are the initial generator of a liquid hazardous waste containing one (or more) of the following substances in the specified concentrations:

(1) Free cyanides at concentrations greater than or equal to 1000 mg/l.

(2) One (or more) of these metals (or elements) at concentrations greater than or equal to those specified below:

a. Arsenic and/or compounds (as As) 500 mg/l;
b. Cadmium and/or compounds (as Cd) 100 mg/l;
c. Chromium VI and/or compounds (as CrVI) 500 mg/l;
d. Lead and/or compounds (as PB) 500 mg/l;
e. Mercury and/or compounds (as Hg) 20 mg/l;
f. Nickel and/or compounds (as Ni) 134 mg/l;
g. Selenium and/or compounds (as Se) 100 mg/l;
h. Thallium and/or compounds (as TH) 130 mg/l.

(3) Liquid hazardous wastes having a pH less than or equal to two (2.0).

(4) Liquid hazardous wastewaters that are primarily water and contain halogenated organic compounds (HOCs) in total concentration greater than or equal to 1,000 mg/l and less than 10,000 mg/l.

(5) Polychlorinated biphenyls (PCBs) at concentrations greater than or equal to 50 ppm. (Remember the waste must also be a RCRA hazardous waste).

MARK BOX 2 if you have treated one (or more) of the above California List wastes in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D or the applicable prohibitions set forth in 40 CFR 268.32. This means that (1) for liquid hazardous wastes containing free cyanides or metals at the concentration levels specified above, you have treated the waste below those specified concentration levels, or rendered the waste non-liquid per the paint filter test; or (2) for liquid corrosive wastes, you have either treated the waste above a pH of two, or rendered the waste non-liquid per the paint filter test; or (3) for wastewaters containing HOCs in total concentrations greater than or equal to 1,000 mg/l and less than 10,000 mg/l, you have treated the waste below 1,000 mg/l; or (4) for liquid hazardous wastes containing PCBs at concentrations greater than or equal to 50 ppm but less than 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70 or burned it in a high efficiency boiler in accordance with 40 CFR 761.60; or (5) for liquid hazardous waste containing PCBs at concentrations greater than or equal to 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70. All liquid hazardous wastes containing PCBs over 50 ppm must also be incinerated in accordance with Parts 264, 265 and 266. **The certification on the reverse side must be given by the treater.**

MARK BOX 3 if your waste is one of the following:

(A) Liquid hazardous wastes that contain HOCs in total concentrations greater than or equal to 1,000 mg/l but are not wastewaters.

(B) Non-liquid hazardous wastes containing HOCs in total concentrations greater than or equal to 1,000 mg/kg.

Also mark Box 3 if the California List waste is soil or debris generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004 or 3008 of RCRA. This waste is not banned from land disposal until November 8, 1988. Box 3 should also be marked if your waste is subject to a case-by-case extension or no-migration petition.

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORPORATION CWMI Profile Number: LASH 72320

EPA ID Number: IND 000810713 Manifest Number: WI6 16 322 3

This form is submitted to SCA CHEMICAL SERVICES, CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

| X | 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Signature	Title	Date
Jeffrey A. Winenger	Environmental Engineer	8/11/88

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes	
Acetone		0.05		0.59
n-Butyl alcohol		5.0		5.0
Carbon disulfide		1.05		4.81
Carbon tetrachloride		0.05		0.96
Chlorobenzene		0.15		0.05
Cresols		2.82		0.75
Cresylic acid		2.82		0.75
Cyclohexanone		0.125	X	0.75
1,2-Dichlorobenzene		0.65		0.125
Ethyl acetate		0.05		0.75
Ethyl benzene		0.05		0.053
Ethyl ether		0.05		0.75
Isobutanol		5.0		5.0
Methanol		0.25		0.75
Methylene chloride		0.20		0.96
Methylene chloride (from pharmaceutical industry)		12.7		0.96
Methyl ethyl ketone		0.05		0.75
Methyl isobutyl ketone		0.05		0.33
Nitrobenzene		0.66		0.125
Pyrdine		1.12		0.33
Tetrachloroethylene		0.079	X	0.05
Toluene		1.12		0.33
1,1,1-Trichloroethane		1.05		0.41
1,2,2-Trichloro-1,2,2-trifluroethane		1.05		0.96
Trichloroethylene		0.062	X	0.091
Trichlorofluoromethane		0.05		0.96
Xylene		0.05		0.15
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORPORATION CWMI Profile Number: LA#68462

EPA ID Number: IND000810713 Manifest Number: 4166327

This form is submitted to SCA CHEMICAL SERVICES CHICAGO IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

| X | 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Mark Box 2 only if you mark box 1.

Restricted Waste Subject to Variance

| | 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Jeffrey A. Wininger — Environmental Engineer — 8/12/88

Signature — Title — Date

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes	
Acetone	0.05		0.59	
n-Butyl alcohol	5.0		5.0	
Carbon disulfide	1.05		4.81	
Carbon tetrachloride	0.05		0.96	
Chlorobenzene	0.15		0.05	
Cresols	2.82		0.75	
Cresylic acid	2.82		0.75	
Cyclohexanone	0.125		0.75	
1,2-Dichlorobenzene	0.66		0.125	
Ethyl acetate	0.05		0.75	
Ethyl benzene	0.05		0.053	
Ethyl ether	0.05		0.75	
Isobutanol	5.0		5.0	
Methanol	0.25		0.75	
Methylene chloride	0.20		0.96	
Methylene chloride (from pharmaceutical industry)	12.7		0.96	
Methyl ethyl ketone	0.05		0.75	
Methyl isobutyl ketone	0.05		0.33	
Nitrobenzene	0.66		0.125	
Pyridine	1.12		0.33	
Tetrachloroethylene	0.079		0.05	
Toluene	1.12	X	0.33	
1,1,1-Trichloroethane	1.05		0.41	
1,2,2-Trichloro-1,2,2-trifluroethane	1.05		0.96	
Trichloroethylene	0.062		0.091	
Trichlorofluoromethane	0.05		0.96	
Xylene	0.05		0.15	
All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

- 1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
- 2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA; or
- 3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
- 4. The solvent waste is subject to a case-by-case extension or no-migration petition.
- 5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

SPENT SOLVENT WASTE

LAND DISPOSAL BAN NOTIFICATION FORM

Generator Name: BALL CORPORATION CWMI Profile Number: LAB # 68466

EPA ID Number: IND000810713 Manifest Number: WIG 16328

This form is submitted to SAK CHEMICAL SERVICES CHICAGO, IL in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous wastes. The hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

Restricted Waste Requires Treatment

[X] 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

Restricted Waste Treated to Performance Standard

[ ] 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

Restricted Waste Subject to Variance

[ ] 3. The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption from the November 8, 1986 land disposal prohibition date.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information:

Jeffrey A. Wineinger Environmental Engineer 8/12/88

Signature Title Date

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, [illegible] prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

- [ ] 1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
- [ ] 2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA; or
- [ ] 3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
- [ ] 4. The solvent waste is subject to a case-by-case extension or no-migration petition.
- [ ] 5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

enerator Name: BALL CORPORATION CWMI Profile Number: LABH 68451

EPA ID Number: IND000810713 Manifest Number: WI G16332
G16329

This form is submitted to Cyanokem / CWD in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) | X | I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) | | The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

Instructions for Completing Front Side of Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004, and F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See below).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal. For each solvent waste present in your waste shipment, check the appropriate box in front of the applicable treatment standard(s). If based upon best knowledge and information, your waste shipment may contain some or all of the constituents listed below, please mark the appropriate boxes or the box labeled "All of the above" at the bottom.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)			
	Wastewaters		All Other Wastes

All of the above				

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 and the appropriate box below to indicate that your waste is not restricted from land disposal until November 8, 1988:

	1. You are a small quantity generator of 100-1000 kilograms of hazardous waste per month; or
	2. The solvent waste is generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004(u) or 3008(h) of RCRA: or
	3. You are the initial generator of a solvent waste that is a solvent water mixture, solvent-containing sludge or solid, or solvent-contaminated soil (non-CERCLA or RCRA corrective action) containing less than 1 percent total F001-F005 solvent constituents listed in the above table.
	4. The solvent waste is subject to a case-by-case extension or no-migration petition.
	5. Your waste is a residue generated from the treatment of only spent solvent wastes identified in one of the above four categories. (e.g., you are a solvent recycler that has treated only small quantity generator waste, or you are a wastewater treatment plant that has treated only wastewater containing less than 1% total F001-F005 solvent constituents.)

LAND DISPOSAL RESTRICTION NOTIFICATION AND CERTIFICATION FORM
FIRST-THIRD WASTES FOR WHICH NO TREATMENT STANDARDS HAVE BEEN SET
("SOFT-HAMMER" WASTES RESTRICTED AS OF AUGUST 8, 1988)

Generator Name: Ball corporation
EPA ID Number: INDCC08107[illegible]3
CWM Profile Number: [illegible]
Manifest Number: [illegible]

This form is submitted to Battery Disposal Technology in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate box below to indicate whether alternative treatment has been found for my waste. (See reverse side for the list of "soft-hammer" wastes and instructions on using this form.)

X I. SOFT-HAMMER WASTE FOR WHICH ALTERNATIVE TREATMENT OR RECOVERY HAS BEEN LOCATED

The soft-hammer waste(s) I generate is(are) Titanium Tetrachloride. This waste has been or will be treated by a treatment or recovery process which can meaningfully reduce the toxicity or mobility of constituents in the waste. Note: A treater of soft-hammer waste must also complete either section I or II of this form, unless other regulatory conditions are met. (See Box III)

___ II. SOFT-HAMMER WASTE FOR WHICH DISPOSAL IN LANDFILL OR SURFACE SURFACE IMPOUNDMENT IS THE ONLY PRACTICAL ALTERNATIVE TO TREATMENT CURRENTLY AVAILABLE

The soft-hammer waste(s) I generate or have treated is(are) _____. I have made a good-faith effort to locate and contract with treatment and recovery facilities currently available which can meaningfully reduce the toxicity or mobility of hazardous constituents in the waste, as an alternative to land disposal. I have found no such alternative facility. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a)(2), including a list of facilities and facility officials contacted, addresses, telephone numbers, contact dates, and an explanation of why no treatment is practically available. This untreated soft-hammer waste must be disposed of in a landfill or surface impoundment meeting the minimum technological standards until treatment standards are set for the waste or May 8, 1990, whichever occurs first.

"I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false informations, including the possibility of fine and imprisonment."

___ III. SOFT-HAMMER WASTE TREATED BY THE SPECIFIED METHOD

I have treated soft-hammer wastes(s) by the method specified at 40 CFR Part 268 and no further treatment is required. The waste residuals may be disposed in a non-minimum technological unit.

___ IV. SOFT-HAMMER WASTE DESTINED FOR LAND DISPOSAL OTHER THAN IN LANDFILL OR SURFACE IMPOUNDMENT (e.g. DEEP INJECTION WELL)

The soft-hammer waste(s) I generate is(are) _____. This waste is being disposed of in a land disposal unit other than a landfill or surface impoundment and therefore is not subject to the certification and demonstration requirements of Section II.

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: Ball corporation CWMI Profile Number: LAB H63670

EPA ID Number: IND000810713 Manifest Number: NY A5683191

This form is submitted to Battery Disposal Technology Inc in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) [X] I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) [ ] The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) [ ] The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

LAND DISPOSAL RESTRICTION NOTIFICATION AND CERTIFICATION FORM

Generator Name: BALL CORP

Manifest Number: WIC 16334 WIC 16333

...D Number: IND000810713

CWM Profile Number: CAB1 86285

This form is submitted to _____ in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate box below to indicate whether alternative treatment has been found for my waste. (See reverse side for the list of "soft-hammer" wastes and instructions on using this form.)

☒ **I. SOFT-HAMMER WASTE FOR WHICH ALTERNATIVE TREATMENT OR RECOVERY HAS BEEN LOCATED**

The soft-hammer waste I generate is(are) HYDROGEN FLUORIDE U134, VINYL CHLORIDE U043.

I have identified a practically available treatment technology that yields the greatest environmental benefit. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a)(1), including a list of facilities and facility officials contacted, complete with addresses, telephone numbers, and contact dates, and a justification that I have chosen the best treatment that is practically available.

I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that I have contracted to treat my waste (or will otherwise provide treatment) by the practically available technology which yields the greatest environmental benefit, as indicated in my demonstration. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

☐ **II. SOFT-HAMMER WASTE FOR WHICH DISPOSAL IN LANDFILL OR SURFACE IMPOUNDMENT IS THE ONLY PRACTICAL ALTERNATIVE TO TREATMENT CURRENTLY AVAILABLE**

The soft-hammer waste(s) I generate or have treated is(are) _____.

I have made a good-faith effort to locate and contract with treatment and recovery facilities practically available which can meaningfully reduce the toxicity or mobility of hazardous constituents in the waste, as an alternative to land disposal. I have found no such alternative facility. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a)(2), including a list of facilities and facility officials contacted, addresses, telephone numbers, contact dates, and an explanation of why no treatment is practically available. This soft-hammer waste must be disposed of in a landfill or surface impoundment meeting the minimum technological ...ds until treatment standards are set for the waste or May 8, 1990, whichever occurs first.

"I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false informations, including the possibility of fine and imprisonment."

☐ **III. TREATMENT OR RECOVERY FACILITY HAS TREATED THE WASTE**

The following soft-hammer waste(s) was treated in accordance with the generator's demonstration: _____.

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with treatment as specified in the generator's demonstration. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

☐ **IV. SOFT-HAMMER WASTE DESTINED FOR LAND DISPOSAL OTHER THAN IN LANDFILL OR SURFACE IMPOUNDMENT (e.g. DEEP INJECTION WELL)**

The soft-hammer waste(s) I generate is(are) _____. This waste is being disposed of in a land disposal unit other than a landfill or surface impoundment and therefore is not subject to the certification and demonstration requirements of Section II.

SOFT HAMMER DEMONSTRATION / CERTIFICATION

To: US Environmental Protection Agency
Region 5
Attention: Valdas V. Adamkus
230 South Dearborn
Chicago, Illinois 60604

In accordance with the Environmental Protection Agency's land disposal restrictions governing the first third scheduled wastes, Ball Corp has enclosed a soft hammer demonstration and certification as per 40 CFR 268.8 (a)(2) for EPA waste code(s) U134, U043.

The demonstration reflects our efforts to locate practically available treatment that affords the greatest environmental benefit. Based on our search for such treatment, we have determined that:

____ 1.) No practically available treatment exist. (see attached demonstration for further details)

✓ 2.) Incineration is the best practically available treatment. (see attached demonstration for further details)

If any further information is required, please contact me at (317) 747-6574 (phone #)

LAND DISPOSAL RESTRICTION NOTIFICATION FORM

Generator Name: BACC CORP CWMI Profile Number: WI 111729

EPA ID Number: IN0000810713 Manifest Number: LAB 723210

This form is submitted to SCA / CONTROLLED WASTE in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

RESTRICTED WASTE REQUIRES TREATMENT

|✓| 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

RESTRICTED WASTE TREATED TO PERFORMANCE STANDARD

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Part 268 Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment".

RESTRICTED WASTE NATURALLY MEETS THE TREATMENT STANDARDS

The waste identified above naturally meets the performance standards of 40 CFR Part 268 Subpart D, without any treatment being performed.

| | 3. I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

RESTRICTED WASTE SUBJECT TO VARIANCE

| | 4. The waste identified above is not banned from land disposal since it is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption which expires on _____.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information.

CALIFORNIA LIST WASTES

LAND DISPOSAL RESTRICTION NOTIFICATION FORM

Generator Name: Ball corporation CWMI Profile Number: LAB H68963

EPA ID Number: INDOOO810713 Manifest Number: IL 1926132

This form is submitted to Trade Waste Incineration in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

RESTRICTED WASTE REQUIRES TREATMENT

(1) |X| I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

RESTRICTED WASTE TREATED TO PERFORMANCE STANDARDS

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 of RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

RESTRICTED WASTE SUBJECT TO VARIANCE

(3) | | The waste identified above is not banned from land disposal since it is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption which expires on _____

I hereby certify that all informatioin submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

SPENT SOLVENT WASTE

LAND DISPOSAL RESTRICTION NOTIFICATION FORM

Generator Name: Ball Corporation CWMI Profile Number: LAB N68463

EPA ID Number: IND000810713 Manifest Number: IL 1926132

This form is submitted to Trade Waste Incineration in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box).

RESTRICTED WASTE REQUIRES TREATMENT

|X| 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

RESTRICTED WASTE TREATED TO PERFORMANCE STANDARD

| | 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Part 268 Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to achieve the performance levels specified in 40 CFR Part 268 Subpart D without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment".

RESTRICTED WASTE NATURALLY MEETS THE TREATMENT STANDARDS

The waste identified above naturally meets the performance standards of 40 CFR Part 268 Subpart D, without any treatment being performed.

| | 3. I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D. I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.

RESTRICTED WASTE SUBJECT TO VARIANCE

| | 4. The waste identified above is not banned from land disposal since it is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption which expires on _____.

I hereby certify that all material submitted in this and associated documents is complete and accurate to the best of my knowledge and information.

"SOFT-HAMMER" WASTES

LAND DISPOSAL RESTRICTION NOTIFICATION AND CERTIFICATION FORM

Generator Name: BALL CORP

Manifest Number: IL 1926132

EPA ID Number: IND 000 810 713

CWM Profile Number: WP # 86463

This form is submitted to TWE in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate box below to indicate whether alternative treatment has been found for my waste. (See reverse side for the list of "soft-hammer" wastes and instructions on using this form.)

☑ **I. SOFT-HAMMER WASTE FOR WHICH ALTERNATIVE TREATMENT OR RECOVERY HAS BEEN LOCATED**

The soft-hammer waste I generate is(are) F002 / 5

I have identified a practically available treatment technology that yields the greatest environmental benefit. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a)(1), including a list of facilities and facility officials contacted, complete with addresses, telephone numbers, and contact dates, and a justification that I have chosen the best treatment that is practically available.

I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that I have contracted to treat my waste (or will otherwise provide treatment) by the practically available technology which yields the greatest environmental benefit, as indicated in my demonstration. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

☐ **II. SOFT-HAMMER WASTE FOR WHICH DISPOSAL IN LANDFILL OR SURFACE IMPOUNDMENT IS THE ONLY PRACTICAL ALTERNATIVE TO TREATMENT CURRENTLY AVAILABLE**

The soft-hammer waste(s) I generate or have treated is(are) .....

I have made a good-faith effort to locate and contract with treatment and recovery facilities practically available which can meaningfully reduce the toxicity or mobility of hazardous constituents in the waste, as an alternative to land disposal. I have found no such alternative facility. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a)(2), including a list of facilities and facility officials contacted, addresses, telephone numbers, contact dates, and an explanation of why no treatment is practically available. This soft-hammer waste must be disposed of in a landfill or surface impoundment meeting the minimum technological standards until treatment standards are set for the waste or May 8, 1990, whichever occurs first.

"I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false informations, including the possibility of fine and imprisonment."

☐ **III. TREATMENT OR RECOVERY FACILITY HAS TREATED THE WASTE**

The following soft-hammer waste(s) was treated in accordance with the generator's demonstration: .....

I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with treatment as specified in the generator's demonstration. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

☐ **IV. SOFT-HAMMER WASTE DESTINED FOR LAND DISPOSAL OTHER THAN IN LANDFILL OR SURFACE IMPOUNDMENT (e.g. DEEP INJECTION WELL)**

The soft-hammer waste(s) I generate is(are) ..... . This waste is being disposed of in a land disposal unit other than a landfill or surface impoundment and therefore is not subject to the certification and demonstration requirements of Section II.

CALIFORNIA LIST WASTES

LAND DISPOSAL RESTRICTION NOTIFICATION FORM

Generator Name: BACC CORP CWMI Profile Number: LAB V86736

EPA ID Number: EMD 000810713 Manifest Number: CWMA 412151

This form is submitted to CWM ENECO in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

RESTRICTED WASTE REQUIRES TREATMENT

(1) | X | I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

RESTRICTED WASTE TREATED TO PERFORMANCE STANDARDS

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 of RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

RESTRICTED WASTE SUBJECT TO VARIANCE

(3) | | The waste identified above is not banned from land disposal since it is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption which expires on _____

I hereby certify that all informatioin submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Mr. Richard H. Cole, Jr.
Ball Corporation
1509 S. Macedonia Avenue
Muncie, Indiana 47302

Re: Notice of Violation
Ball Corporation
IND 000 810 713

Dear Mr. Cole:

We have received and reviewed your letter of May 3, 1989, in response to our April 20, 1989, Notice of Violation (NOV).

In your letter you assert that your storage facility is now empty, and will no longer be receiving any hazardous waste. Additionally, we have contacted the Indiana Department of Environmental Management (IDEM) to confirm that your storage facility is undergoing closure. However, please be aware that until your storage facility is "certified" as closed, all applicable Federal and State hazardous waste regulations continue to apply. Thus, you cannot be returned to compliance for the violations previously cited, i.e., incomplete waste analysis plan and operating record.

In view of your ongoing closure activities and in lieu of insisting on a revised waste analysis plan and current operating record, please submit the facility's operating record, manifests, and land disposal restriction notification forms for all waste handling activities beginning on July 27, 1988, through October 1, 1988. These dates correspond to IDEM's July 27, 1988, inspection through the date you claim no waste has been present on-site, i.e., October 1, 1988. The lack of a revised waste analysis and complete operating record notwithstanding, this will ensure us that hazardous waste on-site as of July 27, 1988, was disposed of properly.

Please submit to this office, within fifteen (15) days of receipt of this second Notice of Violation, documentation demonstrating that hazardous waste on-site as of July 27, 1988, has been properly disposed. Failure to respond to this NOV may subject the facility to further enforcement action.

If you have any questions regarding this correspondence, please contact Mr. Gregory T. Carlson of my staff at (312) 886-8095.

Sincerely yours,

Sally K. Swanson, Chief
IN/MN/OH Enforcement Program Section

Chicago, Illinois 60604

Dear Ms. Swanson:

Ball Corporation has received your Notice of Violation dated April 20, 1989. The specific citations involve alleged deficiencies in our waste analysis plan and in our operating record.

You requested that we respond within thirty days of receipt, demonstrating that the alleged violations have been corrected and indicating the measures initiated to assure further compliance. This letter is being sent in compliance with that request.

Waste Analysis Plan

You have requested that a copy of a revised analysis plan be submitted to your office. Revision of the waste analysis plan is not necessary because Ball Corporation will not conduct any further waste analyses. No waste has been received into the TSD facility since January 1988; no waste will be received into the facility; the facility is now empty; and Ball Corporation has sought permission from IDEM to close the facility as a TSD.

Operating Record

You have requested that the most recent entries in our operating log be submitted. No waste has been present in the facility since October 1988; therefore, no recent operating record exists. Since no additional waste will be received into the building and since permission has been requested to close the facility, no further operating record will be generated. Therefore, copies demonstrating compliance are not now and will not be available to send.

Ball Corporation

Dear Ms. Swanson

As requested by your letter dated December 8, 1989 that we received on December 11, 1989, attached are examples of Land Disposal Notification Forms that Ball Corporation believes fulfill the requirement of 40 CFR 268.7(a)(1-4).

Ball Corporation intends to use either these forms, or forms containing the same information, on all waste shipments for which they are required from our Muncie, Indiana facility (IND 000 810 713) until such time that we are advised they are not acceptable or until the regulations allow or require the use of a different form.

Sincerely,

Richard H Cole Jr

LAND DISPOSAL RESTRICTION NOTIFICATION FOR CALIFORNIA LIST WASTES

Generator Name: _____ CWMI Profile Number: _____

EPA ID Number: _____ Manifest Number: _____

This form is submitted to _____ in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of certain untreated hazardous wastes. The hazardous waste identified above is one of the "California List" wastes under EPA's Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements specified by EPA at 40 CFR 268.7, I have marked the appropriate box below which indicates how my waste must be managed to conform to the land disposal ban regulations. (See instructions on reverse side for marking appropriate box.)

Restricted Waste Requires Treatment

(1) | | I am the initial generator of an untreated waste identified above which must be treated to the appropriate treatment standard set forth in 40 CFR 268 Subpart D, or where no treatment standard exists for the California List waste, the waste must be treated to the levels specified under 40 CFR 268.32.

Restricted Waste Treated to Performance Standards

(2) | | The waste identified above has been treated in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D and/or the applicable prohibitions set forth in 40 CFR 268.32. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

Restricted Waste Subject to Variance

(3) | | The waste identified above is subject to a case-by-case extension under 40 CFR 268.5, a no-migration petition under 40 CFR 268.6, a nationwide variance under Subpart C, or is soil or debris generated from a response action taken under CERCLA or corrective action taken under RCRA.

I hereby certify that all information submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

_____

Signature Title Date

Instructions for Completing Front Side of Form

The California List represents the second phase of the federal land disposal ban which became effective July 8, 1987. A waste is subject to the California List prohibitions if it meets each of the following four criteria:

(1) the waste must contain a constituent specified in the California List provisions or have a pH less than or equal to two; and

(2) the physical form of the waste must be liquid (except for HOCs); and

(3) the waste containing the California List constituent must be listed or identified as hazardous under RCRA section 3001; and

(4) the waste must contain a concentration of one or more of the California List constituents at or above the levels specified in section 3004(d).

Any generator or treater that manages a California List waste must accompany the shipment off-site with a notification/certification by marking one of the three boxes on the reverse side of this form.

MARK BOX 1 if you are the initial generator of a liquid hazardous waste containing one (or more) of the following substances in the specified concentrations:

(1) Free cyanides at concentrations greater than or equal to 1000 mg/l.

(2) One (or more) of these metals (or elements) at concentrations greater than or equal to those specified below:

a. Arsenic and/or compounds (as As) 500 mg/l;
b. Cadmium and/or compounds (as Cd) 100 mg/l;
c. Chromium VI and/or compounds (as CrVI) 500 mg/l;
d. Lead and/or compounds (as PB) 500 mg/l;
e. Mercury and/or compounds (as Hg) 20 mg/l;
f. Nickel and/or compounds (as Ni) 134 mg/l;
g. Selenium and/or compounds (as Se) 100 mg/l;
h. Thallium and/or compounds (as TH) 130 mg/l.

(3) Liquid hazardous wastes having a pH less than or equal to two (2.0).

(4) Liquid hazardous wastewaters that are primarily water and contain halogenated organic compounds (HOCs) in total concentration greater than or equal to 1,000 mg/l and less than 10,000 mg/l.

(5) Polychlorinated biphenyls (PCBs) at concentrations greater than or equal to 50 ppm. (Remember the waste must also be a RCRA hazardous waste).

MARK BOX 2 if you have treated one (or more) of the above California List wastes in compliance with the applicable performance standards specified in 40 CFR 268 Subpart D or the applicable prohibitions set forth in 40 CFR 268.32. This means that (1) for liquid hazardous wastes containing free cyanides or metals at the concentration levels specified above, you have treated the waste below those specified concentration levels, or rendered the waste non-liquid per the paint filter test; or (2) for liquid corrosive wastes, you have either treated the waste above a pH of two, or rendered the waste non-liquid per the paint filter test; or (3) for wastewaters containing HOCs in total concentrations greater than or equal to 1,000 mg/l and less than 10,000 mg/l, you have treated the waste below 1,000 mg/l; or (4) for liquid hazardous wastes containing PCBs at concentrations greater than or equal to 50 ppm but less than 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70 or burned it in a high efficiency boiler in accordance with 40 CFR 761.60; or (5) for liquid hazardous waste containing PCBs at concentrations greater than or equal to 500 ppm, you have incinerated the waste in accordance with 40 CFR 761.70. All liquid hazardous wastes containing PCBs over 50 ppm must also be incinerated in accordance with Parts 264, 265 and 266. **The certification on the reverse side must be given by the treater.**

MARK BOX 3 if your waste is one of the following:

(A) Liquid hazardous wastes that contain HOCs in total concentrations greater than or equal to 1,000 mg/l but are not wastewate

(B) Non-liquid hazardous wastes containing HOCs in total concentrations greater than or equal to 1,000 mg/kg.

Also mark Box 3 if the California List waste is soil or debris generated from a response action taken under sections 104 or 106 of CERCLA or corrective action taken under sections 3004 or 3008 of RCRA. This waste is not banned from land disposal until November 8, 1988. Box 3 should also be marked if your waste is subject to a case-by-case extension or no-migration petition.

SPENT SOLVENT WASTE
LAND DISPOSAL RESTRICTION NOTIFICATION FORM

Generator Name: _____ CWMI Profile Number: _____

EPA Hazardous Waste Number: _____ Manifest Number: _____

This form is submitted to _____ in accordance with regulations published by EPA at 40 CFR Part 268, which govern the land disposal of restricted hazardous waste identified above has been listed as a restricted waste by EPA under the Part 268 regulations. In accordance with the waste analysis and recordkeeping requirements set forth at 40 CFR 268.7, I have marked the appropriate box below to indicate how my waste must be managed to conform to the regulations. (See instructions on reverse side for marking appropriate box.)

RESTRICTED WASTE REQUIRES TREATMENT

☐ 1. The waste identified above must be treated to the appropriate standard identified in 40 CFR 268 Subpart D.

RESTRICTED WASTE TREATED TO PERFORMANCE STANDARDS

☐ 2. The waste identified above has been treated, the treatment residues have been tested in accordance with the facility WAP, and the residues have been found to meet the performance standards specified in 40 CFR Part 268 Subpart D. "I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment."

RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT FURTHER TREATMENT

I am the initial generator of the waste identified above. I have determined that the waste meets the applicable treatment standards set forth in 40 CFR Part 268 Subpart D, and the applicable prohibition levels set forth in Section 268.32 or RCRA Section 3004(d), and can therefore be land disposed without further treatment.

☐ 3. "I certify under penalty of law that I personally have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment."

RESTRICTED WASTE SUBJECT TO VARIANCE

☐ 4. The waste identified above is not banned from land disposal since it is subject to a case-by-case extension under 40 CFR 268.5, a petition under 40 CFR 268.6, a nationwide variance under Subpart C, or another exemption which expires on _____

_____

_____

I hereby certify that all material submitted in this and all associated documents is complete and accurate to the best of my knowledge and information.

Instructions for Completing Spent Solvent Waste Notification Form

Mark Box 1 if you are the initial generator of a spent solvent waste specified in 40 CFR 261.31 as EPA Hazardous Waste Nos. F001, F002, F003, F004 or F005, and your waste is ineligible for a nationwide variance or other exemption from the November 8, 1986 prohibition date. (See bottom of page).

If Box 1 is marked, your solvent waste is restricted and must be treated to the standards set forth in the box below prior to land disposal.

Constituent Concentration in Waste Extract (CCWE) Table

Solvent Constituent	Treatment Standard (mg/l)	
	Wastewaters	All Other Wastes
Acetone	0.05	0.59
n-Butyl alcohol	5.0	5.0
Carbon disulfide	1.05	4.81
Carbon tetrachloride	0.05	0.96
Chlorobenzene	0.15	0.05
Cresols	2.82	0.75
Cresylic acid	2.82	0.75
Cyclohexanone	0.125	0.75
1,2-Dichlorobenzene	0.65	0.125
Ethyl acetate	0.05	0.75
Ethyl benzene	0.05	0.053
Ethyl ether	0.05	0.75
Isobutanol	5.0	5.0
Methanol	0.25	0.75
Methylene chloride	0.20	0.96
Methylene chloride (from pharmaceutical industry)	.44	0.96
Methyl ethyl ketone	0.05	0.75
Methyl isobutyl ketone	0.05	0.33
Nitrobenzene	0.66	0.125
Pyrdine	1.12	0.33
Tetrachloroethylene	0.079	0.05
Toluene	1.12	0.33
1,1,1-Trichloroethane	1.05	0.41
1,1,2-Trichloro-1,2,2-Trifluoroethane	1.05	0.96
Trichloroethylene	0.062	0.091
Trichlorofluoromethane	0.05	0.96
Xylene	0.05	0.15

Mark Box 2 if you are the owner/operator of a treatment facility that has treated restricted solvent waste to the treatment standards set out in the above table.

Mark Box 3 if the waste can be land disposed without further treatment.

Mark Box 4 and the appropriate box below to indicate that your waste is not restricted from land disposal.

☐ 1. The solvent waste is a contaminated soil and debris generated from a response action taken under section 104 or 106 of CERCLA or a corrective action required under Subtitle C of RCRA. *This variance expires 11/8/90.*

☐ 2. The solvent waste is subject to a case-by-case extension or no-migration petition.

☐ 3. For F001-F005 wastes destined for deep well injection, the waste is a solvent water mixture or solvent containing sludge with less than 1% F001-F005 solvent constituents listed above. *This variance expires 8/8/90.*

INSTRUCTIONS FOR COMPLETING THE HARD HAMMER NOTIFICATION FORM

1. To properly manage your waste under the land disposal restrictions, it is essential that you accurately identify your waste. The first step in assessing whether your waste is subject to the land disposal restrictions is to determine if your waste is hazardous (see 40 CFR 261). Remember, first determine whether the waste that you generate is a listed hazardous waste. Then, if it is not, determine whether it exhibits a hazardous characteristic.

2. All hazardous waste codes currently restricted are listed below. (See Table 1 for treatment standards governing all forms of land disposal except deep well injection. See Table 2 for deep well injection.) If your waste is listed, determine whether it is listed below. Also see 40 CFR § 268.10-.11. If it is, your waste is restricted. Write the code(s) in the space on top of the notification form after "EPA Hazardous Waste Code(s)." If additional space is required to reflect multiple waste codes, please attach a separate sheet to the land ban notification form. If your listed waste code is not listed below, it is not yet restricted (unless covered by the California list restrictions) and the forms do not apply.

3. If your waste is restricted, determine whether it is subject to a national capacity variance, case-by-case extension, treatability variance or no migration petition. These variances are identified below. If so, check box C and enter the date that the variance expires.

4. If your waste is restricted, determine whether it a) exceeds the treatment standards of 268.41 and 268.43; or b) is subject to a technology-specific treatment standard as defined in 268.42; or c) does not comply with the California list statutory prohibition levels. If so, check box A.

5. If the restricted waste has been treated to satisfy the applicable treatment standards set out at 40 CFR Part 268, check box B.1. If treatment satisfies only part of the treatment standards and additional treatment is necessary, check box A.

6. If the restricted waste naturally meets the treatment standards of 40 CFR, Part 268, upon generation and can be land disposed without any treatment, check box D.

"SOFT HAMMER" WASTES*

LAND DISPOSAL RESTRICTION NOTIFICATION AND CERTIFICATION FORM

Generator Name: _____ Manifest Number: _____

EPA Hazardous Waste Codes[1]: _____ CWM Profile Number: _____

This form is submitted to _____ in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate box below to indicate whether alternative treatment has been found for my waste. (See reverse side for the list of "soft-hammer" wastes and instructions on using this form.)

☐ A. SOFT-HAMMER WASTE FOR WHICH ALTERNATIVE TREATMENT OR RECOVERY HAS BEEN LOCATED

I have identified a practically available treatment technology that yields the greatest environmental benefit. Together with the initial shipment of waste represented by this form, I submitted a demonstration to the Regional Administrator in accordance with 40 CFR 268.8(a)(1), including a list of facilities and facility officials contacted, complete with addresses, telephone numbers, and contact dates, and a justification that I have chosen the best treatment that is practically available. This treatment method is _____.

"I certify under penalty of law that the requirements of 40 CFR 268.8(a) have been met and I have contracted to treat my waste (or will otherwise provide treatment) by the practically available technology which yields the greatest environmental benefit, as indicated in my demonstration. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

☐ B. SOFT-HAMMER WASTE FOR WHICH DISPOSAL IN LANDFILL OR SURFACE IMPOUNDMENT IS THE ONLY PRACTICAL ALTERNATIVE TO TREATMENT CURRENTLY AVAILABLE

I have made a good-faith effort to locate and contract with treatment and recovery facilities practically available which can meaningfully reduce the toxicity or mobility of hazardous constituents in the waste, as an alternative to land disposal. I have found no such alternative facility. Together with the initial shipment of waste represented by this form, I submitted a demonstration in accordance with 40 CFR 268.8(a), including a list of facilities and facility officials contacted, addresses, telephone numbers, contact dates, and an explanation of why no treatment is practically available. This soft-hammer waste must be disposed of in a landfill or surface impoundment meeting the minimum technological standards until treatment standards are set for the waste or May 8, 1990, whichever occurs first.

"I certify under penalty of law that the requirements of 40 CFR 268.8(a)(1) have been met and that disposal in a landfill or surface impoundment is the only practical alternative to treatment currently available. I believe that the information submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false informations, including the possibility of fine or imprisonment."

☐ C. TREATMENT OR RECOVERY FACILITY HAS TREATED THE WASTE

The soft-hammer waste(s) noted above was treated in accordance with the generator's demonstration.

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with treatment as specified in the generator's demonstration. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

☐ D. SOFT-HAMMER WASTE DESTINED FOR LAND DISPOSAL OTHER THAN IN LANDFILL OR SURFACE IMPOUNDMENT (e.g. DEEP INJECTION WELL)

The soft-hammer waste(s) noted above is waste is being disposed of in a land disposal unit other than a landfill or surface impoundment and therefore is not subject to the certification and demonstration requirements described above.

Instructions For Completing the "Soft Hammer" Notification and Certification Form

What Is a "Soft-Hammer" Waste?

"Soft-Hammer" wastes are those listed hazardous wastes [illegible] the First-and Second-Third of the Scheduled Wastes for which EPA has not set treatment standards. See section 3004(g) of the Resource Conservation and Recovery Act (RCRA).

List of "Soft-Hammer" Wastes

*6 - greater than 10%
*7 - less than 3%
*8 - subject to soft hammer until 7/8/89

How Must "Soft-Hammer" Wastes Be Managed?

Until May 8, 1990 these wastes may be disposed in a landfill or surface impoundment only if such unit is in compliance with the minimum technological requirements and prior to such disposal, the generator has made a good-faith effort to locate and contract with treatment and recovery facilities practically available which provide the greatest environmental benefit.

What is "Practical Treatment?"

First, if a generator's "soft-hammer" wastes were treated in the past, EPA says it would consider at least this type of treatment to be "practical" for that generator. Second, EPA presents a cost ratio that measures the cost of treatment relative to the baseline cost of shipment and disposal in a minimum technological landfill or surface impoundment. If treating the waste costs at least twice as much as not treating the waste, EPA would ordinarily consider that form of treatment to be impractical. Third, EPA has provided in the rule's preamble a generic hierarchy of preferred treatment methods for certain First-Third wastes, see 53 Fed. Reg. 31175-76. Last, in general, the Agency says it favors recovery/recycling facilities as the best method, followed by destruction technologies such as incineration (especially for organics), and then stabilization where recycling or destruction is unavailable or inappropriate (especially for inorganics).

Which Box Should I Mark?

Mark Box A on the front of this form if you generate (or have treated) one of the hazardous wastes listed above, and you have located a treatment or recovery process which yields the greatest environmental benefit.

Mark Box B if you generate one of the hazardous wastes listed above but have been unable to locate an alternative treatment. Note that if this waste is disposed in a landfill or surface impoundment, the unit must comply with the minimum technological requirements.

Mark Box C if you have treated soft-hammer waste in accordance with the generator's demonstration.

Mark Box D if your soft-hammer waste is being land disposed in a unit other than a landfill or surface impoundment (e.g., deep well injection). The certification and demonstration requirements of Items I, II, III do not apply.

Where Should The Forms Be Sent?

The generator must submit the certification and demonstration to the Regional Administrator (RA). Certifications and demonstrations for subsequent shipments need not be sent to the RA provided the conditions of the original certification do not change (i.e., the same demonstration applies). The generator must also send the demonstration and certification to the receiving facility with the initial waste shipment. Provided the conditions of the certification do not change, only the certification need be sent with each subsequent waste shipment. The treatment facility must send a copy of the generator's demonstration and certification to the facility receiving the waste or treatment residues, along with a certification that it has treated the waste in accordance with the generator's demonstration.

Measures to Assure Future Compliance

You requested that we indicate what measures have been initiated to assure future compliance. As mentioned in the above paragraphs, the TSD facility is empty, no additional waste will be received and the facility is being closed. This precludes any future violations of the type described.

Sincerely,

Richard H. Cole, Jr.
Chemical Information Specialist

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Mr. Richard H. Cole Jr.
Ball Corporation
1509 S. Macedonia Avenue
Muncie, Indiana 47302

Re: Notice of Violation
Ball Corporation
IND 000 810 713

Dear Mr. Cole:

On September 20, 1988, the Indiana Department of Environmental Management (IDEM), representing the United States Environmental Protection Agency (U.S. EPA), conducted a Resource Conservation and Recovery Act (RCRA) inspection of the above-referenced facility. The purpose of the inspection was to determine the compliance status of this facility with respect to the applicable hazardous waste management requirements of Title 329 of the Indiana Administrative Code, and also the land disposal restrictions of certain spent solvents (F001-F005) and dioxins which became effective on November 8, 1986, and certain hazardous wastes commonly referred to as California List wastes which became effective on July 8, 1987. Regulations are set forth in 40 CFR Part 268 and in revisions to 40 CFR Parts 260-265, and 271.

As a result of the inspection, we have determined that the requirements of the land disposal restriction regulations are being violated.

The facility did not revise its waste analysis plan to meet the requirements of 40 CFR Part 268, as required under 40 CFR Part 265.13. Waste analysis plans must contain all the information which must be known to treat, store, or dispose of the waste in accordance with the requirements of 40 CFR Parts 265.13, and 268. Please provide this office with a copy of your revised analysis plan addressing the requirements of 40 CFR Part 268.

The facility's operating records did not track the location, quantity and dates that waste exceeding treatment standards entered and were removed from storage, as required under 40 CFR Part 268.50. Please include in your response copies of the most recent entries in your operating log demonstrating compliance with 40 CFR Part 268.50.

A copy of the inspection report is enclosed for your records. Please submit to this office, within thirty (30) days of receipt of this Notice of Violation, documentation demonstrating that the above-cited violations have been corrected and indicating what measures have been initiated to assure future compliance. Failure to correct the violations may subject the facility to further Federal enforcement action.

If you have any questions regarding this correspondence, please contact Mr. Gregory T. Carlson of my staff at (312) 886-8095.

Sincerely yours,

Sally K. Swanson, Chief
IN/MN/OH Enforcement Program Section

State Form 4336

DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

INDIANAPOLIS

OFFICE MEMORANDUM

DATE: March 16, 1989

TO: Ball Corporation RCRA File
IND 000810713, Muncie, Delaware County

THRU: Jeff Blankenberger JCB

FROM: SCH Stephen C. Hunter
Compliance Monitoring Section

SUBJECT: Trip Report for the Schedule Compliance Evaluation Inspection of July 27, 1988, and September 20, 1988

On July 27, 1988, Messrs. Robert C. Steele, D. Bruce Kizer, and I conducted an inspection of the above-mentioned facility. The facility consists of numerous buildings on a 77-acre complex. Messrs. Jeff Wineinger, Assocaite Environmental Engineer, and Kent Bickell, Supervisor of Environmental Services, represented the facility during the inspection. I continued the inspection on September 20, 1988. During the September 20, 1988, inspection Messrs. Jeff Wineinger, Associate Environmental Engineer, and Richard Cole, Chemical Information Specilist, represented the facility.

Preinspection File Audit

Ball Corporation (Ball) notified as a G/TSD on August 20, 1980, for the 1509 South Macedonia Avenue address. The company was first inspected on February 15, 1983. This inspeciton resulted in the issuance of a Letter of Compliance. A second RCRA inspection was conducted on August 12, 1986. As a result of the inspection a formal action, C-040 was issued on May 7, 1987. This action is still unresolved. On July 25, 1988, Ball Corporation notified IDEM's Office of Environmental Response that a broken water main flooded their interim status container storage building.

Inspection Findings

On July 27, 1988, Mr. Jeff Wineinger provided a tour of the interims status container storage building (Building 48). According to information provided by Messrs. Wineinger and Bickell a water main had broken Saturday, July 23, 1988, and flooded the container storage building. It was estimated (during the inspection) that approximately 160,000 gallon of water had leaked from the water main. Although the flooding of the container storage building was discovered on July 23 by Ball security guards, Ball Corporation's environmental staff was not notifed until approximately 8:10 a.m. on Monday, July 25, 1988. The flooding of the container storage building resulted in numerous small containers (containers five (5) gallons or less mostly lab and chemical bottles) floating and breaking thereby releasing their contents. A portion of the flood waters entered the Muncie City Sewers system via storm sewers with the remainder of the 160,000 gallons draining into the ground under the container storage building through cracks in the concrete floor, etc. At the time of the flood/release, Ball had approximately 424 containers of waste 30 gallons or larger and 4,359 containers of waste five (5) gallons

or smaller in storage at Building 48. According to Mr. Bickell, the contingency plan was not implemented because it did not address release of waste through flooding. In addition, Ball felt that the company's time and resources would better be utilized in identifying and removing waste from Building 48. Ball Corporation did contact the Muncie Sanitary District and Mr. Mark Mauck of the IDEM's Office of Environmental Response but not until 3:50 p.m. and 2:30 p.m. of July 25, 1988, respectively. Chemical Waste Management also was contacted to provide cleanup services. During the July 27, 1988, inspection, personnel from Chemical Waste Management was present and conducting cleanup. According to Mr. Wineinger, no container 30 gallons or larger had been moved since the flood. The following RCRA violations were observed at Building 48:

1. Drums in poor condition (repeat violation)
2. Drums not closed (repeat violation)
3. Incompatible wastes not separated (repeat violation)
4. Inadequate aisle space (repeat violation)
5. Spillage of waste (numberous small bottles broken - liquid on floor, stains) (repeat violation)
6. Inadequate spill control/emergency equipment (only one resperation, one pair of gloves, and one bag of absorbent present) (repeat violation)
7. Emergency equipment not tested or maintained (expect fire extinguisher) (repeat violation)
8. Inspections of container storage area and spill control equipment not conducted (repeat violation)
9. Contingency plan not available at the facility and all other RCRA paperwork required to be at the facility instead kept offsite at 345 South High Street;
10. Storage in excess of the facility's Part A capacity.
11. Contingenry plan not implementated.

After inspecting Building 48, the IDEM inspectors requested to inspect the remainder of the 1509 South Macedonia Avenue Ball facility. After a meeting at the Ball Corporate Headquarters at 345 South High Street, Ball refused to allows the inspectors to finish the inspection. Ball officials felt that July 25 was not a reasonable time to conduct a full RCRA inspection due to the need for Ball environmental personnel to supervise cleanup of Building 48.

According to an incident report to submitted on August 3, 1988, to IDEM's office of Enviromental Response, the flooding of Building 48 on July 23, 1988, resulted in "no reportable quantity of any material" ~~is~~ being released. (See attached report).

Other information gained during the meeting at Ball Corporate Headquarters included a discussion of Ball Incon Glass Packaging Corporation. Ball Incon is a company owned 50% by Ball Corporation. The company notified as a hazardous waste generator on September 28, 1987. Ball Incon conducts glass manufacturing previously conducted by Ball Corporation at portions of the 1509 South Macedonia Complex. Building 21, 22 and portions of Buiding 23 and 17 are leased from Ball Corporation by Ball Incon. The notification address for both IND 000810713 (Ball Corporation) and for IND 982068603 (Ball Incon

Glass Packaging Corportion) is 1509 South Macedonia Avenue. The office building located at 1509 South Macedonia Avenue was in the past used by Ball Corporation, but is currently used totally for Ball Incon personnel. This has resulted in Ball Corportion environmental staff and all the facility records for IND 000810713 being moved to the Ball Corporate Headquarters at 345 South High Street.

On September 20, 1988, I returned to finish the full TSD inspection of Ball Corporation (IND 008810713). Messrs. Jeff Wineinger and Richard Cole provided a tour of the facility. Ball Corporation manufactures home canning lids, plastic containers, and rebuilds analytic machines used in manufacturing. Laboratory testing of products is also conducted. Hazardous waste generated includes mineral spirits from part cleaning, waste paint and thinner from small painting operations and various laboratory chemicals. Non-hazardous waste streams include used oil, waste plastic, scrap plastic, and scrap tin:

Violations observed include the following:

1. Waste Analysis Plan Deficiencies (repeat violation)
2. Inspections not conducted (repeat violation)
3. No inspection schedule or log (repeat violation)
4. Lack of personnel training and records (repeat violation)
5. Lack of annual review of training (repeat violation)
6. Contingincy Plan deficiencies (repeat violation)
7. Lack of arrangments with local authorities (repeat violation)
8. Failure to follow emergency procedures
9. No operating record (repeat violation)
10. Manifest not available at the facility
11. Improper waste determination
12. Waste analysis copies not at the facility
13. Spillage/stains on floor of interim status container storage (repeat violation)
14. Inadequate emergency spill control equipment (repeat violation)
15. Testing and maintenace procedures not established for emergency equipment (repeat violation)
16. Containers not marked with start of accumulation
17. Containers not marked "Hazardous Waste"
18. Containers not stored closed
19. Lack immediate access to communication device
20. No written inspection schedule (repeat violation)

Conclusions and Recommendations

In conclusion, although Ball Corporation intends to go through closure, the company is currently acting as a G/TSD. Due to the number, types and repeated nature of many of the violations, I recommend that a NOV formal action be issued to address the new violations.

IN THE MATTER OF THE:
COMMISSIONER, INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

Complainant

vs.

BALL CORPORATION

Respondent

CAUSE NO. C-040

COMPLAINT, NOTICE OF OPPORTUNITY FOR ADMINISTRATIVE REVIEW AND PROPOSED FINAL ORDER

TO: Mr. Donald R. Bell
Vice President
Ball Corporation
345 South High
Muncie, IN 47305

C. T. Corporation, Resident Agent for
Ball Corporation
One North Capitol
Indianapolis, IN 46204

This is a Complaint, Notice of Opportunity for Administrative Review and Proposed Final Order under IC 13-7-11 of the Indiana Environmental Management Act, IC 13-7, and IC 4-22-1, the Indiana Administrative Adjudication Act. The Complainant is the Commissioner of the Indiana Department of Environmental Management (Department). The Respondent is Ball Corporation, a company authorized to do business in Indiana, which operates a place of business at Muncie, Indiana. Respondent's EPA I.D. number is IND 000810713.

Pursuant to IC 13-7-11 and based on an investigation of the facility conducted on August 12, 1986, by Mr. Bruce Kizer of the Office of Solid and Hazardous Waste Management (OSHWM) of the Department, it has been determined that the Respondent is in violation of the Indiana Hazardous Waste Management Program, IC 13-7-8.5, and 320 IAC 4.1.

Findings

This determination is based on the following Findings:

1. Ball Corporation submitted notification of hazardous waste activity to the U.S. Environmental Protection Agency (U.S. EPA) on August 20, 1980. This notification denoted activities as a generator of hazardous waste and as a hazardous waste facility (treatment, storage, and disposal).

2. Ball Corporation submitted a Part A permit application to the U.S. EPA on November 19, 1980. This application denoted storage of hazardous waste in containers as the activity at the facility. The process design capacity was specified as 10,000 gallons.

3. The inspection conducted on August 12, 1986, by staff of the OSHWM determined that Ball Corporation is in violation of the 320 IAC 4.1 as stated in the following Findings.

4. Pursuant to 320 IAC 4.1-16-4, the owner or operator shall obtain a detailed chemical and physical analysis of each waste. Based on information gathered by the Department, Respondent has not obtained a detailed chemical and physical analysis of each hazardous waste in the hazardous waste storage area.

5. Pursuant to 320 IAC 4.1-16-4, the owner or operator shall have a detailed waste analysis plan on file at the facility. Based on information gathered by the Department, Respondent does not have an adequate detailed waste analysis plan on file at the facility. The plan called "Waste Sampling Procedures" that was on file at the facility does not meet the requirements for the waste analysis plan required in 320 IAC 4.1-16-4.

6. Pursuant to 320 IAC 4.1-16-6, the owner or operator shall conduct required inspections. Based on information gathered by the Department, Respondent does not conduct the required inspections. The inspections conducted by the Respondent are inadequate to comply with 320 IAC 4.1-16-6.

7. Pursuant to 320 IAC 4.1-16-6, the owner or operator shall develop and follow a written schedule for inspections. Based on information gathered by the Department, Respondent has not developed and has not followed a written schedule for inspections.

8. Pursuant to 320 IAC 4.1-16-6, the owner or operator shall record inspections in an inspection log. Based on information gathered by the Department, Respondent has not recorded inspections in an inspection log that meets the requirements of 320 IAC 4.1-16-6(d).

9. Pursuant to 320 IAC 4.1-16-7, facility personnel shall receive required training. Based on information gathered by the Department, Respondent has not given required training to their personnel involved in the handling and management of hazardous wastes. The only person to receive training was Mr. Kent Bickell on May 4, 1982.

10. Pursuant to 320 IAC 4.1-16-7, facility personnel shall participate in an annual review of initial training. Based on information gathered by the Department, Respondent has not given an annual review of initial training to facility personnel.

11. Pursuant to 320 IAC 4.1-16-7, the owner or operator shall maintain personnel training records. Based on information gathered by the Department, Respondent has not maintained adequate personnel training records. The document titled "Hazardous Waste Personnel Training" that was at the facility does not comply with the requirements of 320 IAC 4.1-16-7(d).

12. Pursuant to 320 IAC 4.1-16-8, the owner or operator shall post "No Smoking" signs on premises where required. Based on information gathered by the Department, Respondent has not posted "No Smoking" signs on the premises where required.

13. Pursuant to 320 IAC 4.1-17-2, the owner or operator shall manage hazardous wastes to prevent any fire, explosion, or release of hazardous waste or hazardous waste constituents on the premises which could threaten human health or the environment. Based on information gathered by the Department, there is evidence of the release of hazardous waste or hazardous waste constituents on the premises which could threaten human health or the environment. Five (5) containers were noted to be leaking in the hazardous waste storage area. Facility personnel also reported that waste mineral spirits are routinely dumped on the ground near the railroad tracks, south of the lid manufacturing building.

14. Pursuant to 320 IAC 4.1-17-3, the owner or operator shall install portable fire extinguishers, fire control, spill control equipment, and decontamination equipment as required. Based on information gathered by the Department, Respondent has not provided fire control equipment, spill control equipment, and decontamination equipment as required or it is not located as specified in the emergency equipment list in the Contingency Plan.

15. Pursuant to 320 IAC 4.1-17-4, the owner or operator shall establish testing and maintenance procedures for emergency equipment. Based on information gathered by the Department, Respondent has not established testing and maintenance procedures for emergency equipment.

16. Pursuant to 320 IAC 4.1-17-7, the owner or operator shall attempt to make arrangements with appropriate authorities in case of an emergency at the facility. Based on information gathered by the Department, Respondent has not attempted to make arrangements with local police departments, hospitals, contractors, and State and local emergency response teams.

17. Pursuant to 320 IAC 4.1-18-3, the contingency plan shall describe arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams. Based on information gathered by the Department, Respondent has not described arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams in the contingency plan.

18. Pursuant to 320 IAC 4.1-18-3, the contingency plan shall list the names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinators. Based on information gathered by the Department, Respondent has not listed the names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinators in the contingency plan.

19. Pursuant to 320 IAC 4.1-18-4, copies of the contingency plan shall be on file at the site, and be submitted to State and local emergency organizations. Based on information gathered by the Department, Respondent has not submitted copies of the Contingency Plan to State and local emergency organizations.

20. Pursuant to 320 IAC 4.1-19-4, a written operating record shall be maintained at the facility. Based on information gathered by the Department, Respondent has not maintained a written operating record as required.

21. Pursuant to 320 IAC 4.1-19-7, the owner or operator shall submit an unmanifested waste report to the Commissioner of the Department within fifteen (15) days after receiving the waste. Based on information gathered by the Department, Respondent has not submitted an unmanifested waste report to the Commissioner of the Department within fifteen 15 days after receiving the waste arsenic trioxide from Ball Glass in Oklahoma.

22. Pursuant to 320 IAC 4.1-21-3(c), the closure plan shall be submitted to the Commissioner of the Department at least 180 days before the date closure is expected to commence. Based on information gathered by the Department, Respondent did not submit the closure plan to the Commissioner of the Department for the container storage building that was closed and removed.

23. Pursuant to 320 IAC 4.1-23-2, if a container holding hazardous waste is not in good condition, or if it begins to leak, the owner or operator must transfer the hazardous waste from this container to a container that is in good condition. Based on information gathered by the Department, numerous hazardous waste containers were in poor condition and leaking, the contents of which had not been transferred.

24. Pursuant to 320 IAC 4.1-23-4, the hazardous waste containers shall be stored closed. Based on information gathered by the Department, fourteen (14) hazardous waste containers were not stored closed.

25. Pursuant to 320 IAC 4.1-23-7, physical barriers or sufficient distance shall separate containers of incompatible waste. Based on information gathered by the Department, Respondent has not provided a physical barrier or sufficient distance between containers of incompatible waste in the storage area.

26. Pursuant to 320 IAC 4.1-23-4, the owner or operator shall maintain adequate aisle space between rows of hazardous waste containers so that they can be inspected for leaks and deterioration. Based on information gathered by the Department, there is not adequate aisle space for the inspection of hazardous waste containers.

27. Pursuant to 320 IAC 4.1-19-6, the owner or operator shall submit Biennial Reports as required. Based on information gathered by the Department, Respondent has not submitted Biennial Reports for hazardous wate storage activities as required.

28. Pursuant to 320 IAC 4.1-10-3, the generator must submit an Exception Report if he has not received a copy of the manifest with the signature of the owner or operator of the designated facility within forty-five (45) days of initial shipment of the waste. Based on information gathered by the Department, Respondent has not submitted an Exception Report for the shipment of waste on January 27, 1985 (Manifest Document No. 85012).

29. Pursuant to 320 IAC 4.1-9-5, hazardous waste containers shall be clearly marked with start of accumulation date for that container. Based on information gathered by the Department, Respondent has not marked the hazardous waste containers with the date of the start of accumulation. These containers were not in the storage area noted in the Part A application.

30. Pursuant to 320 IAC 4.1-9-5, hazardous waste containers shall be clearly marked with the words "Hazardous Waste." Based on information gathered by the Department, Respondent has not marked the hazardous waste containers with the words "Hazardous Waste." These containers were not in the storage area noted in the Part A application.

31. Pursuant to 320 IAC 4.1-10-2, the generator shall submit Biennial Reports as required. Based on information gathered by the Department, Respondent has not submitted Biennial Reports for generator activities as required.

32. Pursuant to 320 IAC 4.1-7-2, a generator is required to determine if his waste is hazardous. Based on information gathered by the Department, Respondent has not determined if the wastes in the storage area are hazardous. This includes approximately 400 containers of waste and smaller containers of waste lab chemicals. Additionally, there was no determination made on the waste weed killer residue (Share Crop) that was dumped on the ground near the railroad tracks.

Proposed Final Order

The Complainant hereby informs the Respondent that the following is the Final Order of the Commissioner to be effective thirty (30) days following Respondent's receipt of this Complaint, unless modified or objected to as hereinafter provided:

1. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall make a hazardous waste determination as required by 320 IAC 4.1-7-2, on the four-hundred (approximately 400) containers of waste and the waste lab chemicals in the on-site storage area. Submit copies of the analyses to this Office.

2. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall develop a waste analysis plan as required in 320 IAC 4.1-16-4(b). Submit a copy to this Office for approval.

3. Within forty-five (45) days of the approval of the waste analysis plan by this Office, Respondent shall obtain a detailed chemical and physical analysis as required in 320 IAC 4.1-16-4 for the hazardous waste in the on-site storage area. Submit copies of the analysis to this Office.

4. Within thirty-five (35) days of the effective date of the Commissioner's Final Order, Respondent shall develop and follow a written inspection schedule and an inspection log as required in 320 IAC 4.1-16-6. Submit a copy of the schedule and the log to this Office for approval.

5. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall train all facility personnel involved in the management or handling of hazardous waste as required by 320 IAC 4.1-16-7(a), (b), and (c).

6. Within forty-five (45) days of the effective date of the Commissioner's Final Order, Respondent shall develop personnel training records which include the information required in 320 IAC 4.1-16-7(d). Submit a copy to this Office for approval.

7. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall post "No Smoking" signs where required in 320 IAC 4.1-16-8.

8. Upon the effective date of the Commissioner's Final Order, Respondent shall maintain and operate the facilities so as to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste.

9. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall provide emergency equipment as required in 320 IAC 4.1-17-3.

10. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall establish testing and maintenance procedures for all facility equipment as required in 320 IAC 4.1-17-4.

11. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall attempt to make arrangements with local authorities as required in 320 IAC 4.1-17-7.

12. Within forty-five (45) days of the effective date of the Commissioner's Final Order, Respondent shall amend the Contingency Plan to include:

    a. The arrangements agreed to by State and local authorities as required by 320 IAC 4.1-18-3(c);

    b. The list of names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator as required in 320 IAC 4.1-18-3(d)); and

    c. A list of all emergency equipment at the facility as required in 320 IAC 4.1-18-3(e).

    Submit a copy of the Contingency Plan to this Office for approval.

13. Upon the notice of approval by this Office, Respondent shall maintain a copy of the Contingency Plan at the facility and submit a copy to all local police departments, fire departments, hospitals, and State and local emergency response teams. The Contingency Plan must be amended if necessary as required in 320 IAC 4.1-18-5.

14. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall develop and maintain an operating record as required in 320 IAC 4.1-19-4. Submit a copy to this Office for approval.

15. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall submit to this Office an unmanifested waste report as required in 320 IAC 4.1-19-7, for the waste arsenic trioxide received from Ball Glass in Oklahoma.

16. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall submit to this Office a closure plan for approval as required in 320 IAC 4.1-21. This plan is for the container storage building that was closed and removed without an approved closure plan.

17. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall transfer the hazardous waste from the leaking containers and containers in poor condition, or manage the waste in some other way that complies with the regulations as required in 320 IAC 4.1-23-2.

18. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall close all containers during storage.

19. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall manage and separate containers of incompatible wastes as required in 320 IAC 4.1-23-7.

20. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall provide adequate aisle space as required in 320 IAC 4.1-23-4(c).

21. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall submit to this office a Biennial Report as required in 320 IAC 4.1-19-6 for hazardous waste storage activities.

22. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall obtain a copy of the manifest dated January 27, 1985, that contains the signature of the designated facility that received the waste. Submit a copy to this Office.

23. Within ten (10) days of the effective date of the Commissioner's Final Order, Respondent shall mark the hazardous waste containers with the start of accumulation date and with the words "Hazardous Waste."

24. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall submit to this Office a Biennial Report as required in 320 IAC 4.1-10-2 for hazardous waste generator activities.

25. Within thirty (30) days of the effective date of the Order, Respondent shall submit to the Department a site assessment plan. The purpose shall be to conduct sampling and analysis in order to assess the degree and extent of contamination of the soil and any impact on the groundwater. This plan must:

    a. Address the area on the ground near the railroad tracks south of the lid manufacturing building. This is the area where approximately 10 to 20 gallons of spent mineral spirits were dumped every three months. Also dumped in this area was the waste weed killer residue (Share Crop) which was dumped on the ground during the August 12, 1986, inspection.

    b. Include a soil sampling grid that overlaps the area;

    c. Specify the method of determining the number and location of samples to be taken within the grid to yield a representative assessment of the contaminated area as outlined in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, EPA Publication" SW-846;

    d. Include the method of sample collection, per SW-846;

    e. State that the maximum distance between each sample location is 20 feet;

    f. State that soil samples will not be composited;

    g. Clearly define all sampling and analytical protocol as defined in 320 IAC 4.1-6 (320 IAC 4.1-6-5, 4.1-6-6, and 4.1-6-7). A copy of Guidelines for Sampling and Analysis Plans is attached hereto as Exhibit A;

    h. Specify that chain-of-custody of the samples shall be maintained and Quality Assurance and Quality Control (QA/QC) procedures shall be followed;

    i. Include a statement in the initial proposal that a contingent plan for sampling outside the grid area will be submitted in the event that sampling shows contamination to exist at the limit of the grid area;

    j. Include time frames for implementation of the site assessment plan; and

    k. Be approved by the Department prior to implementation of the plan.

26. Within ten (10) days of notice of approval of the site assessment plan by the Department, Respondent shall implement the plan as approved and in accordance with the time frames contained therein.

27. Within thirty (30) days of completion of the analyses, Respondent shall submit a cleanup or remedial action plan to the Department based upon the results of the site assessment plan. The cleanup or remedial action plan must:

    a. Include the results of the analyses, chain-of-custody information, and the QA/QC records;

    b. Address all areas determined by the analyses to be contaminated;

    c. Address the groundwater, if it is determined to be affected;

    d. Include a soil sampling and analysis plan to be performed after the cleanup has been done which verifies that all contamination has been removed. (This will include all items listed in Order No. 25 above.)

    e. Include a time frame for implementation of the cleanup plan.

28. Within ten (10) days of notice of approval by the Department, Respondent shall implement the cleanup plan as approved and in accordance with the time frames contained therein.

29. Within thirty (30) days of completion of the cleanup, Respondent shall submit certification by an independent registered professional engineer that the cleanup has been completed as outlined in the approved plan.

30. Upon Respondent's failure to submit an approvable site assessment or cleanup plan within the stated time frames, the Department shall write the plan and Respondent shall implement said plan in accordance with the time frames contained therein.

31. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall pay to the Environmental Management Special Fund, as a civil penalty for the above violations, the sum of $37,999. The penalty consists of the following:

    a. For violation of the Waste Analysis Plan, Inspection Schedule and Log, Operating Record, Unmanifested Waste Report, facility Biennial Report, the sum of $7,999.

    b. For violation of the Closure Plan requirements, the sum of $10,000.

c. For violation of incompatible waste storage, open containers, leaking containers, aisle space, dumping of wastes, the sum of $10,000.

d. For violation of hazardous waste determinations, personnel training, Exception Reports and generator Biennial Reports, the sum of $10,000.

32. In addition to the civil penalty imposed above for violations existing at the time of issuance of this Complaint, the Respondent shall pay an additional civil penalty of $250 per day for each day of noncompliance with the time limits established pursuant to this Order.

Effect of Immediate Compliance

The Complainant recommends that the Respondent begin action immediately to comply with the above Proposed Final Order prior to the effective date of the Order. While such action will not result in mitigation of the civil penalty, as proposed, compliance may prevent the imposition of additional penalties for continued violations.

The Commissioner is authorized to assess civil penalties of up to $25,000 per day for each violation pursuant to IC 13-7-13-1. Therefore, the civil penalty proposed above, if any, which was based upon the factual circumstances existing prior to issuance of this Complaint, is subject to revision prior to the effective date of this Order based upon continued violations.

Notice of Opportunity for Administrative Review

The Respondent is hereby notified, pursuant to IC 4-22-1-23, and IC 13-7-11, that the foregoing Proposed Final Order will be effective thirty (30) days following Respondent's receipt of this Complaint as the Final Order of the Commissioner, unless the Respondent files with the Commissioner, prior to the effective date of the Order, either:

1. A written request for administrative review of the Order by the Solid Waste Management Board (Board) pursuant to IC 13-7-11-5, or

2. A written request for an extension in time within which to file the request for administrative review.

The request for administrative review should be in the form of a written answer to the above Findings, may include objections to the imposition of the Proposed Final Order, and should request that the Board conduct a hearing pursuant to IC 4-22-1 in order to review the Commissioner's Order. The Respondent's answer should clearly and directly admit, deny, or explain each of the factual allegations set out in the Findings of which it has knowledge. Failure to respond to any factual allegations will be deemed an admission of the truth of the allegation.

All papers and pleadings required to be filed with the Commissioner should be sent to:

Ms. Sue A. Shadley
Chief Legal Counsel
Indiana Department of Environmental Management
105 South Meridian Street
P.O. Box 6015
Indianapolis, IN 46206-6015

Copies of all pleadings or other papers filed with the Commissioner should be served upon all other parties or their attorney, including the Attorney General of Indiana. The Respondent is entitled to be represented by an attorney. If representation is obtained, written appearance of counsel should be promptly filed.

Informal Settlement Conference

Whether or not Respondent requests administrative review, pursuant to IC 13-7-11-5, Respondent may confer informally with the Department and a representative of the Attorney General's Office concerning the allegations or requested relief set out in this Complaint. Respondent may request an informal settlement conference at any time by contacting Mr. Dennis Zawodni of the Office of Solid and Hazardous Waste Management at AC 317/232-3407. However, any such request will not affect the time limit for requesting administrative review.

Dated at Indianapolis, Indiana, this 7th day of May, 1987.

Nancy A. Maloley
Commissioner
