Subject: FW: Offer of Technical Assistance and Phase 1 Site Charac. Addendum

[redacted]

Hi Damon,

Would you please help me with the review of Mr. Berube's comments. Call me after you have a chance to assess or assign this so we can discuss reporting back.

Thanks,

Mike

Subject: Offer of Technical Assistance and Phase 1 Site Charac. Addendum

Robert,

Here is the letter I promised you and the results I had trying to get other capable people to join me in providing some technical input on the RI-FS documents. Not what I would have liked but there is a good

chance the others will be persuaded to participate if EPA is more proactive in accepting their input.

The comments on the Phase 1 Addendum are mine. They reflect my thoughts on the 3 documents after reading them and using the small amount of time I had them in my possession to make comments on them. I would like to see the actual data on the first set of samples and other related data from the well drilling etc. as it relates to water contamination and flow directions. The surface soils have had years of heavy surface fluoride additions and an occasional spill; but the real serious problems if they exist will be with the chemicals that have made it to the ground water.

I will contact Mike at a later date to see if he is at all interested in sitting down with me privately to discuss my comments or any other issue of interest to him at this time.

Nino
