TASC TO22 R8 CFAC CIP_small 2-14-17 page 19 lightbulb.pdf

In that case, here is new version where the light bulb is inside of both boxes.

Excellent! Both are better, I like the one with the bulb in the box. That's the ticket!

It will likely be several weeks before we get community input on the plan, compile that feedback, and share it with SKEO for a final draft. At that time (March-ish), I will share this example of how we want those boxes to look and talk about the other formatting issues we identified/will identify. This gives time for any additional feedback or suggestions you may have that I can share with SKEO– always helpful, thanks Bill.

I've also attached an initial draft of the text of a the brochure for Butte I was talking about. We are sending this out for partner review and I hope we can get feedback within the next couple of weeks. I will send you an updated version for help in formatting/graphic design.

I will get you the Smurfit CIP draft text soon too.

Thanks Bill!

Here's a quick example of the lightbulb treatments I was thinking about. It's not perfect, but maybe seeing these options will help you decide if they would be an improvement.

Hi Robert and Mike,

Please find attached the revised layout for the CFAC CIP. We made the file smaller for easier emailing, but please let us know if you'd like the larger file size at this point as well (it's 25mb).

Best,

Blair
