Thanks Bill, I will talk with Skeo and get the native files and get them to you. Appreciate your help!

FYI, I attempted to extract some of the icon graphics from the CIP PDF and could not.

However, I have the same application they used to make the CIP (Adobe InDesign CC 2017) at home. If you could get Skeo to bundle up all the native files they used to make the CIP and post them on their transfer drive, or provide them to you on a DVD, I could then extract them for our use.

Hey Bill,

Please see attached initial graphic product SKEO provided for the CFAC CIP. I'll call you to get your take if you have some time this morning. I have a call with SKEO later today to make a few quick mods before I take a version to the public.

The Smurfit CIP is still only in text form. I was waiting to see what graphics I could use from the CFAC CIP. I am updating the content of that CIP based on a recent stakeholder teleconference. It's shorter but I'd still like to use infographics and visuals and will seek your help. I'll share a final draft of that with you next week.

Thanks Bill,
