PCB-032

The sample concentration is <3x concentration found in the blank

Sample dilution required

The analyte was not detected in the sample at the estimated detection limit

The reported result is an estimate. The value is less than the minimum calibration level but greater than the estimated detection limit.

The data are unusable (note: analyte may or may not be present)

The material was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.

The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.

The sample concentration is <3x concentration found in the blank

The analyte was not detected in the sample at the estimated detection limit

The reported result is an estimate. The value is less than the minimum calibration level but greater than the estimated detection limit.

The data are unusable (note: analyte may or may not be present)

The material was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.

The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approxi
