Hi Chief. We will not be requesting a site visit in the next week or so, but perhaps in two to three weeks or so. I'd also like to come by and go over the EE/CA process as described by the NCP and how it realistically works. I'd also like to visit with you when its convenient to go over the PRFA and expectations of EPA.

Thanks,

Richard Franklin

LCDR:

Currently no site visits are occurring beyond visual verification of vessel status from the beach at Dibblee Point. The U. S. EPA is conducting the EE/CA and may have a site visit involved with that, in which case Mr. Franklin would be the POC.

Mr. Franklin:

The amorphous EE/CA process is unclear for me, will a site visit be occurring anytime soon that LCDR Lindgren can hop along for?

Greg/Chief-

If you have any visits scheduled for the LST, could you give me a heads up and let me tag along? I have yet to see it and it would be good to get eyes on it.
