We should get the EE/CA process meeting scheduled so we have a firm date and other interested parties can attend (likely LT Thorkilson and LTJG Landosky minimum). Due to other obligations, I will be effectively unavailable for the next two weeks, any chance we can set up a meeting for the week of 13 Dec 10?

The site visit will have to be coordinated between both of us, but you will have to Subcontract a vessel to take us out there since we have terminated our vessels for the project.

Hi Chief. We will not be requesting a site visit in the next week or so, but perhaps in two to three weeks or so. I'd also like to come by and go over the EE/CA process as described by the NCP and how it realistically works. I'd also like to visit with you when its convenient to go over the PRFA and expectations of EPA.

Thanks,

Richard Franklin

LCDR:

Currently no site visits are occurring beyond visual verification of vessel status from the beach at Dibblee Point. The U. S. EPA is conducting the EE/CA and may have a site visit involved with that, in which case Mr. Franklin would be the POC.

Mr. Franklin:

The amorphous EE/CA process is unclear for me, will a site visit be occurring anytime soon that LCDR Lindgren can hop along for?

Greg/Chief-

If you have any visits scheduled for the LST, could you give me a heads up and let me tag along? I have yet to see it and it would be good to get eyes on it.
