X No Violation

__ Warning Letter
__ To Form 2. Report
__ To Quarterly Report

X TAS Checked
X TAS Coded
X Form 177
__ Flowform
__ Malf'n - Wang

NARRATIVE:

The incinerator was not in operation. Insulated wire was noted at the facility, including plastic coated wire. The plastic coated wire was to be separated from the fabric and rubber coated wire.

Since the incinerator was operated only a few days each month, occasional visual readings will be taken to determine compliance status.
