## 1.0 INTRODUCTION

ESS Group, Inc. (ESS) submits this plan on behalf of One India Street, LLC ("OIS, LLC") to comply with the U.S. Environmental Protection Agency ("EPA") requirements for Notification of a Self-Implementing On-Site Cleanup and Disposal Plan ("SIP") pursuant to 40 CFR § 761.61(a). This SIP describes the proposed excavation and off-Site disposal of soils classified as PCB remediation waste at the property located at 1 India Street in Providence, Rhode Island (the "Site"). A Site Locus Map is included as Figure 1.

## 2.0 BACKGROUND

### 2.1 Site Description and Current Uses

The Site consists of 4.02-acres of land identified by the City of Providence Assessor's Map as Plat 18, Lots 48, 332, and 343. The Site is located at 41º 48' 55.9" N latitude, 71º 24' 1.6" W longitude. Universal Transverse Mercator (UTM) coordinates are easting 300616.1, northing 4631867.5. The elevation of the Site is approximately six to nine feet (NAVD 88). The Site is located in an area zoned "W3", Port/Maritime Industrial District. The Site is bounded to the west by the Providence River; to the north by India Street; to the south by the Providence River/Providence Harbor; and to the east by the grass and dirt areas and beyond by the Providence Harbor. The closest residential properties are located approximately 0.30-mile north of the Site. The Site is located in an area which is classified by the Rhode Island Department of Environmental Management ("RIDEM") as "GB". "GB" areas are defined as groundwater resources "known or presumed unsuitable for drinking water use without treatment."

The Site is occupied by a single-story large industrial building (~approximately 30,000 square foot $ft^2$), asphalt paved areas, docks, and open space. A paved parking area is located to the west of the building along with the entrance to the facility off of India Street. A grassy area extends east from the south end of the building to the Providence Harbor. A large dock also runs along the south-southwestern boundary of the Site along the Providence River and is used for tugboat docking. The area located to the north of the Site building is covered with a mix of gravel and dirt. To the east of the Site building is another grassy area and beyond the grass is a grass and dirt covered area. The general Site layout and features are shown on Figure 2.

McAllister Towing of Narragansett Bay, LLC ("McAllister") operates a tugboat transportation business at the Site. The major operations conducted by McAllister consist of dispatching tugfleets, docking tugboats, light maintenance activities, limited petroleum oil storage (non-PCB containing), and administrative services. The primary raw materials used at the Site include lubricating oil; hydraulic oil; engine oil; gear oil; marine paint; degreaser; used tires; and rope. Although chemical use is generally limited, McAllister Towing also uses mineral spirits (approximately one 55-gallon drums per year) for use in the facility's part washer. One 240-gallon steel aboveground storage tank is located on-Site and is used to store used oil from the facility's tugboats. J. Goodison Company, Inc. ("Goodison"), a full service marine and industrial repair contractor, leases the northern portion of the warehouse and a portion of the grassy area in the northern and eastern areas of the Site. Goodison is planning to use these areas of the Site for its marine repair operations (e.g., boat/ship repair, painting, cleaning, welding). PCBs are not currently stored, managed, or used in any of the operations by McAllister or Goodison on the Site.

### 2.2 Site History

Based on a review of available information (i.e., aerial photographs, historical topography maps, and Sanborn maps, City Directories), the Site was first developed circa 1881 for industrial and railroad use. The Providence Steamboat Company and the Fox Point Freight Yard were the earliest occupants of the Site and conducted tugboat/towing and railroad operations, respectively. A historical Sanborn Fire Insurance map from 1889 depicts a freight warehouse and portions of cotton warehouses, storage warehouses and railroad tracks on-Site. A 1921 Sanborn map shows that several new railroad tracks were added replacing several storage buildings and portions of the Site. Portions of the Site that were

© 2014 ESS Group, Inc.

previously labeled the Providence and Stonington Steam Ship Company are now labeled the New England Steamship Company, New York and Providence Line and Fox Point Wharf. Cotton warehouses and freight warehouses on this portion of the Site have been removed. A 1951 Sanborn map lists Foxpoint Warehouses & Terminal Company as a tenant. The southern tip of the Site has now been reclaimed by water, while other areas along the southern property boundary that were used for docking have now been filled in. Several of the rail lines have been removed in the northern area of the Site for the construction of the India Street Shed (current site building). The Center Shed and Transit Shed are present south of the India Street Shed with several new rail lines servicing these buildings. A 1956 Sanborn map shows the Site operated as Providence Steamboat Company. The Transit Shed (southernmost building) has been removed from the Site, while the River Shed has been expanded to the east at its southeast corner to include a small Transit Shed. Several more rail lines have been removed from the site and eastern adjacent property. A 1982 Sanborn maps shows the Site as having only one rail line (in-active) and only the India Street Shed, the River Shed and the Office & Freight House. The small Transit Shed that was added on to the River Shed has been removed. The Site is still shown as being operated by the Providence Steamboat Company.

The bulkheads were constructed in 1960. The asphalt parking area was constructed in 1975. The Providence and Worcester Short Line Rail spur (P&V) and switching facilities operated at the Site from 1889 through 1965. The on-Site railroad spur was abandoned in 1965 (based on Transportation Safety Board records of abandonment) and the tracks were removed in 1970. The freight buildings (the Center Shed; demolished circa 1960s or 1970s) and the India Street Shed (currently on-Site) were reportedly used for temporary freight storage and transfer from railroad and barge operations during the operational period of the P&V spur and at least up through 1978.

## 2.3 Recent Site Ownership

The Providence Steamboat Company, later known as Maurania Corporation LLC (“Maurania”), owned the Site from 1954 until 2010. In 2007, McAllister began operating the tugboat transportation business at the Site as a lessee. On November 2, 2010, OIS, LLC purchased the Site from Maurania, and McAllister continues to use a portion as a tugboat towing service company.

## 2.4 Regulatory Filings

### 2.4.1 Initial PCB and COC Detections

As a potential prospective purchaser of the Site, OIS, LLC performed a Limited Phase II Environmental Site Assessment (“ESA”), in June 2009 that included five soil borings, three of which were completed as groundwater monitoring wells, and the collection and laboratory analysis of soil and groundwater samples. Results of the Limited Phase II ESA indicated that certain soils contained concentrations of lead and arsenic above both the Residential Direct Exposure Criteria (“RDEC”) and the Industrial/Commercial Direct Exposure Criteria (“I/CDEC”) as set forth in RIDEM’s Remediation Regulations. In addition, several semi-volatile organic compounds (“SVOCs”) were detected above the applicable RDEC. Impacts to groundwater were not identified. Refer to Section 2.4.2 for more detail on these constituents of concern (“COCs”).

Additional Site investigations (i.e., soil borings, well installations, soil and groundwater sampling and analysis) were subsequently conducted by Woodard and Curran (“W&C”) (on behalf Maurania) and ESS (on behalf of OIS, LLC) from August 2009 through December 2011 to further characterize Site-wide soil and groundwater quality. PCB concentrations were detected in various soils above the RIDEM I/DEC of 10 milligrams per kilogram (mg/kg) and GB Leachability Criteria of 10 mg/kg. In addition, PCB concentrations in Site soils met the criteria established by the Toxic Substance Control Act (“TSCA”) regulations 40 CFR §§ 761.3, 761.50(b)(3) and 761.61 for bulk PCB remediation waste. Refer to Section 2.4.3 for more detail on the PCB detections.

© 2014 ESS Group, Inc.

### 2.4.2 RIDEM Filings and Consultations

The exceedances of RDEC and I/CDEC for lead, arsenic and SVOCs, considered some of the COCs in soil, constituted a "release", pursuant to RIDEM Remediation Regulations. On July 15, 2009, Maurania reported these data to RIDEM in a Notification of Release. RIDEM subsequently issued a "Letter of Responsibility" to Maurania on July 24, 2009. The following reports and/or notifications have also been provided to RIDEM:

- A Site Investigation Report ("SIR") was filed with RIDEM by Maurania on October 30, 2009. The SIR addressed only a portion of the overall Site, it was submitted prior to the completion of the site investigation, and did not address the majority of the PCB contamination in soil that was ultimately discovered at the Site. This version of the SIR was not approved by RIDEM (via a Remedial Decision Letter) because the sale of the property was being actively negotiated and the investigation of the PCB contamination was ongoing.
- A new SIR was submitted to RIDEM by OIS, LLC on May 17, 2012. This SIR covered the entire Site and addressed all the COCs (metals, SVOCs, TPH, pesticides, and PCBs). In response, RIDEM issued a Program Letter indicating that they deemed the site investigation complete, and that Public Notice must be performed. No public comments were received as part of the Public Notice/Public Comment process.
- RIDEM provided a Remedial Decision Letter to OIS, LLC on March 13, 2013. The purpose of the Remedial Decision Letter was to approve the SIR, identify the preferred remedial alternative (as presented in the SIR), and authorize the preparation and submittal of a Remedial Action Work Plan ("RAWP") in order to achieve the objectives of the environmental clean-up.

Subsequent to EPA's review and approval of this SIP, a RAWP will be filed with RIDEM outlining the details of the proposed remedial actions to address the COCs. Remediation activities, pursuant to RIDEM regulations, have not yet been completed on the Site to address the COCs.

### 2.4.3 EPA Filings and Consultation

On behalf of Maurania, W&C submitted a SIP to the EPA on March 26, 2010 to address PCB detections in soil on certain portions of the Site. On April 21, 2010, EPA responded (via email) to W&C indicating that EPA had reviewed the SIP and determined the Notification under § 761.61(a)(3) was incomplete. This was primarily due to the EPA's determination that the nature and extent of PCB contamination in soil had not been fully delineated. EPA indicated that upon completing additional Site characterizations for PCBs, the results could be incorporated into the SIP and resubmitted to EPA as a completed Notification, in order to support the proposed remedial approach for PCBs.

Since the submittal of the initial SIP by Maurania to EPA, OIS, LLC purchased the Site (November 2010). ESS and OIS, LLC representatives met with EPA on March 8, 2011 to confirm OIS, LLC's commitment to remediating the PCBs in soil pursuant 40 CFR § 761.61(a). The contents of this SIP describe the results of the additional PCB characterizations for delineating the horizontal and vertical extents of PCBs in soil and provide a remediation approach for the soil that is considered PCB remediation waste. Note that OIS, LLC is separately addressing soil exceedences of TPH, SVOCs, pesticides, and metals identified on select soils at the Site under the RIDEM Remediation Regulations. Remediation activities, pursuant to 40 CFR § 761.61(a)(3), have not yet been completed on the Site to address the bulk PCB remediation waste.

© 2014 ESS Group, Inc.

## 3.0 PLAN CONTENTS

The remaining sections of this SIP address the components of the plan required by 40 CFR § 761.61(a)(3) and the verification method proposed to document that cleanup has been achieved as required by Subpart O of the regulations, and include the following:

- *The nature of the contamination, including the kinds of materials contaminated.* Based on ESS's understanding of the Site history (Section 2.2) and the findings of the Site characterizations completed to date on the Site (Section 4.0), ESS is of the opinion that the source of the PCBs (primarily Aroclors 1248, 1254) is from a former undocumented bulk release(s) of PCB-containing oil, hydraulic fluid, plasticizer, and/or adhesive components that occurred along the former railroad tracks abutting the southeastern side of the on-Site building. The pattern and distribution of the PCBs in soil suggests that a PCB release occurred at a time when the Center Shed still existed at the Site (pre-1978). The PCB release has impacted soil from the ground surface to depths as great as 9 feet grade. PCBs have not been detected beneath the on-Site building or on the former concrete foundations situated southeast of the building.

  The Site is accessible and located in the general vicinity of several coal and oil-burning generation facilities. Such facilities would likely have used hydraulic fluids for cooling, plasticizers for tensile strength in piping and adhesive components, and insulating materials, all of which (until 1972) would have contained PCBs (most likely Aroclor 1248). The Site's proximity to water and railroad freight lines and on-Site freight transfer/storage capacity would have been used by an industry transporting freight and chemicals in and out of the South Coast of Massachusetts and the greater Providence area of Rhode Island. This might suggest that some bulk freight transferor servicing one of the coal and oil-burning power plants in the area could have shipped into the Site, perhaps been off-loaded and stored temporarily in one of the former warehouses, and then re-loaded and transported to the end-user. It is not known precisely when the release occurred but is expected to be 35+ years ago.

- *A summary of the standard operating procedures (SOPs) employed during characterization of the Site, including a table or cleanup Site map showing PCB concentrations measured in the pre-cleanup characterization samples.* Procedures used to sample soil and groundwater on the Site are detailed in Section 4.0. The soil analytical results for pre-characterization samples are presented on Table 1. Figure 3 depicts the locations of all pre-characterization soil and groundwater samples.

- *A Site map showing the PCB sampling locations cross referenced to the sample identification numbers provided as part of the characterization information. The extent of the identified PCB contaminated area(s) must be clearly identified.* Figure 3 shows all the PCB sampling locations. Figure 4 shows all the PCB sample locations, soils identification, soil sampling depths, and corresponding PCB concentrations. This figure also shows the extent of PCBs in soil (color coded for PCB concentrations >50 mg/kg; >25 mg/kg and <50 mg/kg; >10 mg/kg and <25 mg/kg; >1 mg/kg and 10 mg/kg; and <1 mg/kg). Figure 7 (Capping Plan) shows the proposed area of capping where PCBs will remain (post-remediation) >1 mg/kg and <10 mg/kg.

- *A cleanup plan for the Site, including the proposed disposal technology and approach, and a cleanup schedule. The plan must include contingency plans in the event that higher PCB concentrations and/or a wider distribution of PCBs are identified during the cleanup.* The proposed cleanup plan is presented in Section 5.0. The proposed schedule for implementing the cleanup plan is presented in Section 6.0.

- *A written certification, signed by the owner of the property where the cleanup site is located and the party conducting the cleanup, that all sampling plans, sample collection procedures, sample preparation procedures, extraction procedures, and instrumental/chemical analysis procedures used to assess or characterize the PCB contamination at the cleanup site, are on file at the location*

© 2014 ESS Group, Inc.

*designated in the certificate, and are available for EPA inspection.* The signed Certification by the Site owner (One India Street, LLC) is presented in Appendix A.

- *QA/QC plan for documenting that the cleanup levels have been achieved (e.g. confirmatory sampling/analysis QA/QC). The QA/QC plan should at a minimum include information on the types/numbers of samples; extraction/analytical methods; MS/MSDs (both frequency and acceptance criteria), etc.* Section 5.5 provides detail on the proposed verification sampling, pursuant to 40 CFR § 761 Subpart O.

## 4.0 SITE CHARACTERIZATION

This section provides a discussion of the nature and extent of PCB-impacted soils at the Site, consistent with the requirements of 40 CFR § 761.61(a)(3). Accordingly, PCB impacted soils are identified, described, and depicted on Site maps that identify sampling locations to provide a cross-reference to data summary tables. As discussed in Section 2.4.1, soil and groundwater investigations were completed on the Site between June 2009 and December 2011. The initial subsurface investigations (ESS – 2009 and W&C – 2009) focused on Site-wide characterization of soil and groundwater. After PCBs were initially detected in soil above 1 mg/kg (W&C - 2009), subsequent investigations were completed by W&C (2010) and ESS (2010 through 2011) that focused on delineating the horizontal and vertical extent of PCBs in soil. The general summary of the subsurface investigation program is as follows:

- A total of 220 soil borings have been completed on the Site.
- A total of 974 soil samples have been submitted for laboratory testing of PCBs (Method 8082).
- Of the 974 total soil samples analyzed, PCBs (sum of detected Aroclors) were detected above 10 mg/kg in 261 samples from 97 boring locations.
- A total of 9 groundwater monitoring wells have been installed on the Site.
- A tidal influence study was completed.

The following sections provide more detail on the selection of soil sample locations, sample collection methods, and the analytical results of the characterization data.

### 4.1 Soil Sample Collection

The soil sampling events between 2009 and 2011 resulted in a series of iterative sampling events as described below. The scope of each subsequent event was based on the results of the previous sampling. Each sampling event included multiple samples being collected from each boring using one-foot vertical sample intervals. Certain samples were designated for analysis and other samples were held by the laboratory pending the results of the initial samples. After review of the initial results, the laboratory was instructed to run additional samples, as appropriate. The objective of this approach was to continue to analyze samples from a particular boring only until a clear determination as to the level of impact could be made horizontally and/or vertically, depending on the location.

#### 4.1.1 Data Quality Objectives

The objectives of the sampling were to collect data consistent with the Site Investigation requirements of 40 CFR § 761.61 and the RIDEM Remediation Regulations. To meet these objectives, soil samples were collected to fill spatial data gaps, to assess the extent of identified impacts at the Site or to assess potential leaching to groundwater. Specific data quality objectives (“DQO”) were identified as follows:

1) Fill data gaps across the Site for the purpose of determining whether various portions of the Site require excavation and or capping. These samples were typically distributed across the Site or in the vicinity of potential source areas based on historic information.

© 2014 ESS Group, Inc.

2) Refine the horizontal extent of identified PCB impacts to identify the area requiring excavation and or capping. These samples were initially collected in the vicinity of SB-21 and sample locations were expanded away from SB-21 horizontally on an iterative basis to determine the extent of impacts.

3) Refine the vertical extent of identified impacts to establish the depth of soil that may require excavation. These samples were typically be collected in one foot vertical intervals.

In order to accomplish the DQOs, soil and groundwater samples were collected as indicated above. For PCBs in soil, since it was important to be able to quantify the sum of Aroclors to levels below 1 mg/kg, a detection limit of approximately 0.05 mg/kg was targeted for the individual Aroclors.

### 4.1.2 Sampling Methods

Soil sampling was conducted in accordance with generally accepted procedures for collecting soil samples for the purpose of environmental analysis. All samples were collected from the specified interval by hand auger or by Geoprobe® direct push drilling with soil collected in acetate sleeves. Soils were then homogenized, and transferred to a labeled, laboratory-approved container. The hand auger was decontaminated between each sampling location with an anionic washing detergent/water solution followed by a water rinse to limit the potential for cross-contamination and a new acetate sleeve was used each time the Geoprobe® drilled a new hole or re-entered an existing boring. Soil boring locations were logged on field boring logs and samples were logged on a standard chain of custody form, and stored on ice for delivery to the laboratory. Analysis of all samples was performed by Alpha Analytical Labs of Westborough, Massachusetts. Samples were extracted using either USEPA Method 3540C or 3546 and analyzed for PCBs using USEPA Method 8082.

The PCB samples collected during the first Site-wide general sampling event in August 2009 (Sample Groups L0911346 and L0911480, samples SB-13 through SB-15, SB-18,SB-18A, SB19 through SB-22, SB-25, SB-16A, SB- 17, SB-17A, SB-23, and SB-24) were extracted using Method 3540C (Soxhlet Extraction). Due to the detection of relatively high PCB concentrations at SB-21 and the anticipated relatively high PCB concentrations in surrounding soil samples, the laboratory used the microwave extraction (Method 3546) for samples collected in and around SB-21 during the subsequent sample Rounds 1 to 4. At certain sample locations where PCB concentrations were anticipated to be relatively low, the lab did use the Soxhlet Method during follow-up sample events. It should be noted that all soil samples analyzed after 2009 were extracted using Method 3540C Soxhlet extraction. Boring logs are provided in Appendix B. Laboratory certificates of analysis and QA/QC information are provided in Appendix C. A figure depicting the locations and results of all PCB soil samples is presented as Figure 4.

### 4.1.3 PCB Soil Sampling - September through December 2009

Investigation for PCBs in soil began on September 11, 2009 and continued through to December 11, 2009 due to the continued presence of elevated concentrations of PCBs above the RIDEM RDEC, I/C DEC, and GB Leachability Criteria in soil sampled. Soil sampling was initially conducted with hand augers. However, it became apparent that exceedances were likely to extend vertically beyond the effective use of hand augering techniques. All future work was conducted with a track-mounted direct push Geoprobe® rig utilizing acetate liners for discrete interval sampling. Soil samples were collected from 56 boring locations along the southern portion of the Site. Three soil borings were sampled from beneath the Site building. During this period of sampling, a total of 261 samples were analyzed for total PCBs. Samples were collected from various depths between 0’ and 10’ below ground surface (bgs).

© 2014 ESS Group, Inc.

#### 4.1.4 PCB Groundwater Sampling – January 2010

On January 21, 2010, groundwater was sampled from the previously installed groundwater monitoring wells WC-1, WC-2, and WC-5 for PCBs using a modified low-flow technique. The wells were purged with a peristaltic pump with dedicated tubing placed at the mid-point of the water column. Field measurements of geochemical parameters were collected using a flow-through cell and multi-parameter YSI meter during purging. Once parameters stabilized, a groundwater sample was collected from each well for PCB analysis. Monitoring well locations are shown on Figure 3 and groundwater sampling results are discussed in Section 4.2.2.

#### 4.1.5 PCB Soil Sampling – May 2010

PCB soil investigations continued in May 2010 to further delineate the horizontal and vertical extent of PCB soil exceedances. Soil sampling was conducted with a track-mounted direct-push Geoprobe rig utilizing acetate liners for discrete interval sampling. Samples were collected from 67 boring locations along the southern portion of the Site. During this period of sampling, a total of 211 samples were analyzed for total PCBs. Samples were collected from various depths between 0' and 12' bgs.

#### 4.1.6 PCB Soil Sampling – June through December 2011

PCB soil investigations continued from June through December to further delineate the horizontal extent of PCB soil exceedances. Soil sampling was conducted with a track-mounted direct-push Geoprobe rig utilizing acetate liners for discrete interval sampling. Samples were collected from 94 boring locations along the southern portion of the Site. During this period of sampling, a total of 473 samples were analyzed for total PCBs. Samples were collected from various depths between 0' and 12' bgs.

Two additional samples were collected from the concrete building foundation immediately south of the grass alley. Concrete sampling was conducted in accordance with EPA Region I Standard Operating Procedure for Sampling Concrete in the Field.

#### 4.1.7 Compliance with Subpart N Cleanup Site Characterization Sampling

The soil and groundwater sampling described above was performed in consideration of and in general conformance with the sampling methods prescribed in Subpart N. This section identifies differences from Subpart N methods and discussed the implication of the variance. The spacing of soil sample locations was initially performed on a 10-foot grid spacing around boring SB-21 in accordance with Subpart N. Once it became apparent that PCB impacts were present within a relatively large area, subsequent grid spacing of 10 feet by 20 feet was used. In certain outlying areas, where PCB concentrations were expected to be below action levels or below the levels detected in the assumed source area, a wider spacing interval was at times employed. For example, in the building, there were access limitations and it was expected that PCB impacts did not extend under the building; as a result, a wider spacing was used. Based on the relative consistency of Site data and the conceptual Site model discussed below, this spacing is viewed as adequate to define the preliminary extent of excavation.

While no vertical sampling frequency is specified under Subpart N of TSCA, the vertical sampling interval used during this investigation was a one-foot interval which was composited prior to sample collection. This interval was selected since it was anticipated that PCB impacts extended to subsurface soils and it is difficult to collect samples from a finer interval and have a high degree of confidence that the sample interval actually collected corresponds to the assumed depth below grade. The one-foot interval was also used in consideration of the delineation of excavation depths and the practicality of establishing excavation limits to an interval of less than one foot. Based on the

© 2014 ESS Group, Inc.

relative consistency of Site data and the conceptual Site model discussed below, this spacing is viewed as adequate to define the preliminary extent of excavation.

## 4.2 Results of Site Characterization

### 4.2.1 Soils

The soil PCB results were compared to multiple regulatory criteria including the RIDEM Industrial Direct Exposure Criteria and GB Groundwater Leachability Criteria of 10 mg/kg and 40 CFR § 761.61(a) cleanup goals. Data indicates that PCBs are present in soils Site-wide at concentrations ranging from non-detect (ND) to 125,500 mg/kg, with PCBs detected above the RIDEM Industrial Exposure Criteria in 261 of the 974 samples. Aroclors 1248, 1254, 1260 and 1268 were the only Aroclors detected in the samples. A summary of the PCB soil analytical results is presented on Table 1 and sample locations and results are shown on Figure 4. This figure shows the PCB sampling locations cross-referenced to the sample identification numbers and the extent of the PCB contaminated area(s), as required (§ 761.61(a)(3)(i)(C)). Laboratory certificates of analysis for PCB samples are included in Appendix C.

Sampling was conducted during the period between August 2009 and December 2011 and included sampling locations in and around the suspected release area (the grass alley), inside the Site building adjacent to the alley, and outside the alley adjacent to the former building foundation. Samples were collected from various depth intervals between 0' and 12' bgs. The following discussion has been separated into Type 1 soils (≥ 50 mg/kg PCBs) and Type 2 soils (PCBs < 50 mg/kg but >10 mg/kg).

The following conclusions have been reached with regard to Type 1 soils (PCBs ≥ 50 mg/kg):

- Type 1 soils are present over a large portion of the suspected release area as depicted on Figure 4. PCBs were detected at concentrations > 50 mg/kg in 146 of the 974 samples collected Site-wide. The depth of impact varies from approximately 0 feet to 9 feet bgs as depicted on Figure 4.

The following conclusions have been reached with regard to Type 2 soils (PCBs < 50 mg/kg but >10 mg/kg):

- Type 2 soils are present over a large portion of the suspected release area as depicted on Figure 4. PCBs were detected at concentrations < 50 mg/kg but >10 mg/kg in 115 of the 974 samples collected Site-wide. The depth of impact varies from approximately 0 feet to 9 feet bgs as depicted on Figure 4.

Further details regarding the remediation plan for the PCB-impacted soils are provided in Section 5.0. As mentioned in Section 4.1.2, PCB samples were extracted using both Method 3540C and 3546. In general, the microwave extraction Method 3546 was only used on soil samples within or in the immediate vicinity of SB-21 during the sampling events (W&C – 2009). Soil samples used to further define the extent and bounds of the PCB excavation area were extracted using the Soxhlet Method 3540C. All future verification samples will be extracted using Soxhlet extraction.

As shown on Figures 4 and 5, the horizontal and vertical extent of PCBs impacts in Site soils has been delineated sufficiently to fully define a soil removal remediation approach. As shown on Figure 4, PCB concentrations along the extents of the soil investigation area have achieved total PCB concentrations below 1.0 mg/kg.

### 4.2.2 Groundwater

The groundwater at the Site is classified as RIDEM GB Groundwater. There are no GB Groundwater Objectives established for PCBs. The samples collected during the sampling event on January 21, 2010 indicated the following results (WC-1, WC-2, and WC-5):

© 2014 ESS Group, Inc.

- No PCB Aroclors were detected in groundwater above the laboratory detection limits (0.00025 mg/L) at WC-1 and WC-5.
- No PCB Aroclors were detected in groundwater above the laboratory detection limits at WC-2, with the exception of Aroclor 1248. Aroclor 1248 was detected at a concentration of 0.000533 milligrams per liter (mg/L), which was slightly above the RIDEM GA Groundwater Objective of 0.0005 mg/L.
- As indicated, groundwater impacts are minimal in the area near WC-2. As discussed in Section 5.0, PCB impacted soil above the RIDEM GB Leachability Criteria of 10 mg/kg will be removed in this area from surface grade to the vertically delineated extent of PCB >10 mg/kg.

EPA's review of the initial SIP (W&C - March 26, 2010) resulted in a comment regarding the PCB detection in sample WC-2. EPA requested that the laboratory should provide a discussion as to the adequacy of the Method 8082 method (i.e., perform a review of the raw data for all wells and indicate if any non-Aroclor peaks were identified within the retention time ("RT") window for PCBs). ESS requested this information from Alpha Analytical Labs. The laboratory indicated that there were some non-target peaks in samples WC-2 and WC-5 within the PCB RT window. Sample WC-1 did not have any non-target peaks identified. The laboratory concluded that the quantitation of Aroclor 1248 in sample WC-2 was unaffected by the other peaks present in the sample (i.e. the other identified peaks elute earlier). Additionally, although the other peaks present in the sample do elute in the RT window of Aroclor 1248 these peaks are not identified and/or are not part of another Aroclor.

A summary of the groundwater analytical data collected from on-Site wells during the January 21, 2010 sampling event are presented as Table 2. Laboratory certificates of analysis are provided as Appendix C.

#### 4.2.3 Tidal Influence Study

In May 2011, ESS performed a tidal study to determine how tidal sequences influenced groundwater elevations at the Site. Data loggers were installed in three groundwater monitoring wells (WC-2, WC-6, and SB-127) at the Site. Monitoring wells WC-2 and SB-127 are situated within the proposed PCB soil remediation area (refer to Figure 5). Monitoring well WC-6 is the located closest to the Providence River and just outside the proposed PCB soil remediation area (refer to Figure 5). During a 14-day period between May 11 and May 24, 2011, water level data was recorded from each of the three groundwater monitoring wells. The 14-day period included a spring high tide event. This data was then compared to the water level information from National Oceanic and Atmospheric Administration (NOAA) for the Providence, Rhode Island tidal gauge. Based on the water level data collected, a groundwater vs. tidal influence graph was generated. This graph determines that the groundwater at the Site fluctuates with the tide. The amplitude of the groundwater fluctuation varies throughout the Site. During high tide, the mean lower low water for the Providence tidal gauge ranged from 0 to 6 feet. A graph showing the groundwater and tidal interactions data is provided as Appendix D.

The groundwater monitoring well with the greatest depth to water fluctuation (~2 feet) was WC-6.. Depth to water fluctuations in monitoring wells WC-2 and SB-127 (located within proposed soil remediation area) were approximately 0.5 foot and 1 foot, respectively. The water table fluctuations were expected at the Site and within the proposed soil remediation area. Dewatering activities (refer to Section 5.4) will occur within certain sections of the soil excavation area, particularly the areas that extend greater than 5 to 6 feet below existing grade.

© 2014 ESS Group, Inc.

## 4.3 Data Usability Assessment

A review of data quality and data usability was tabulated for the results of 974 soil characterization samples collected between 2009 and 2011 and three groundwater samples collected in January 2010. This precision, accuracy, representativeness, completeness, comparability, and sensitivity ("PARCCS") parameter evaluation includes an assessment of the parameters and quality assurance/quality control ("QA/QC") samples as they affect the usability of Site sample results. These indicators have been examined in the context of the intended use of the data and an overall assessment of Site soil and groundwater conditions. This data review includes a completeness check of field documentation including sample collection and preservation methods, a completeness check of laboratory data and documentation, a review of the internal laboratory QA/QC procedures and results including surrogate recoveries, blank results, laboratory control standard results, and reporting limits, as well as an evaluation of sample holding times. The assessment was performed in general conformance with EPA Region I Data Validation Functional Guidelines for Evaluating Environmental Analyses for polychlorinated biphenyls (PCBs) revised February 2004 (USEPA, 2004).

Sample extraction and analysis was performed by Alpha Analytical, Inc. of Westborough, Massachusetts. Soil samples were extracted by EPA Method 3540C (Soxhlet Extraction) and EPA Method 3546 (Microwave Extraction) and analyzed for PCBs by EPA Method 8082. The PCB samples collected during the first Site-wide general sampling event in August 2009 were extracted using Method 3540C (Soxhlet Extraction). During subsequent sampling events many samples (188 samples in total), particularly those collected from borings anticipated to be in the most highly impacted area, were extracted using Method 3546 (microwave extraction). All subsequent sampling in 2010 and 2011 was extracted using Soxhlet Extraction.

While it is acknowledged that it would have been preferable to extract all samples using the Soxhlet Extraction method, it is ESS' professional opinion that the data generated from samples extracted by EPA Method 3546 are considered usable based on the following:

- EPA states in Method 3546 that this extraction method will "achieve analyte recoveries equivalent to those from Soxhlet extraction (Method 3540)".
- In all samples extracted by Method 3546 where dilutions were not required to quantitate the samples, the surrogate recoveries were within the acceptance criteria.

All groundwater samples were extracted by EPA Method 3510C (Separatory Funnel Liquid-Liquid Extraction) and analyzed for PCBs by EPA Method 8082. Laboratory report numbers and associated QA/QC results for all Site samples are summarized in Table 3.

## 4.4 Data Usability Conclusions

Based on a review of the analytical results with regard to the PARCCS parameters, this data quality/data usability assessment indicates that soil and groundwater data are of sufficient quality for use in rendering an opinion of soil and groundwater conditions at the Site. No data were rejected and completeness was achieved. Furthermore, DQOs were met. Finally, the sample results are representative of Site conditions.

© 2014 ESS Group, Inc.

## 5.0 REMEDIATION PLAN

### 5.1 Proposed PCB Soil Clean-up Goal

As shown on the PCB Soil Sampling Results Plan (Figure 4), Bulk PCB remediation waste exists on-Site in an area south and southeast of the Site building. Pursuant to 40 CFR § 761.61(a)(4), the PCB soil clean-up levels for this type of PCB waste depends on whether it is in a "high occupancy" or "low occupancy" area, as those terms are defined by 40 CFR § 761.61(a)(4)(i)(A) and (B), respectively. As stated in Section 1.0, OIS, LLC intends to lease portions of the Site that are now impacted with PCBs and, as the owner, intends to maintain the highest use potential for tenants. Consequently, a high occupancy remediation plan is being proposed.

The goal is to remove soils with PCB concentrations > 10 mg/kg, within the limits shown on Figure 5. Following excavation activities, the area with PCB concentrations in soil remaining above 1 mg/kg will be covered with a low permeability cap (and an Environmental Land Use Restriction; ELUR) that meets the requirements of 40 CFR § 761.61 (a)(7) and (a)(8), as applicable. The specifics of the ELUR are discussed in Section 5.8. The approximate area of PCB impacts > 1 mg/kg and the areas to be addressed by the cap and ELUR are depicted on Figure 7.

### 5.2 General Overview of Proposed Remediation

The entire Site is to undergo remedial activities due to Site wide detections of TPH, SVOCs, pesticides, various metals. Therefore, a soil or RIDEM-approved alternative cover will be installed over all Site soils including those areas where PCB concentrations between 1 mg/kg and 10 mg/kg will remain in-place after the completion of excavation activities. The following sections only describe the proposed remediation activities proposed to address PCB bulk remediation waste.

The proposed remediation activities will generally include the following:

- Removal and off-Site disposal of PCB-impacted soil as bulk PCB remediation waste;
- Collection of verification samples for PCB analysis;
- Final restoration of soil excavation areas to their original ground surface coverings and capping of appropriate areas to meet the requirements of 40 CFR § 761.61 (a)(7) and (a)(8); and
- Recording of an ELUR due to PCB concentrations (between 1 mg/kg and 10 mg/kg) that are to remain in-place.

Prior to the remedial activities, Site preparation and controls will be established and implemented. PCB-impacted soils, classified as PCB bulk remediation waste, will be excavated and transported off-Site for disposal at an approved facility(ies). Soils with PCB concentrations ≥ 50 mg/kg will be transported to a permitted hazardous waste landfill (e.g., the Chemical Waste Management Chemical Services facility located in Model City, New York, or equivalent), and soils with PCB concentrations < 50 mg/kg but > 10/mg/kg will be transported to a non-hazardous waste disposal facility (to be determined upon Contractor selection).

The clean-up activities are proposed to be conducted under a SIP per 40 CFR § 761.61(a). Given Site conditions and future uses, the applicable cleanup goal for residual PCBs in adjacent soils is the RIDEM I/C DEC and GB Leachability Criteria of ≤ 10 mg/kg.

After soils have been excavated to the extent proposed in this plan, verification sampling will be conducted in accordance with 40 CFR § 761.289(b)(1) Subpart O sampling plan, as described in Section 5.6. Verification samples will be extracted using USEPA Method 3540C (Soxhlet extraction) and analyzed for PCBs using USEPA Method 8082.

© 2014 ESS Group, Inc.

If the results of the verification sampling indicate that PCB concentrations exceed 10 mg/kg, additional soil excavation will be conducted and additional verification sampling (at an off-set grid) will be performed until sampling results confirm that PCB levels are ≤ 10 mg/kg.

### 5.3 Site Preparation and Controls

Prior to initiating the soil excavation, the following Site controls will be implemented:

- A Health & Safety Plan ("HASP") will be developed specific to the work activities. All workers will follow applicable Federal and State regulations regarding the work activities, including but not limited to OSHA regulations, respiratory protection, personal protective equipment, etc.
- Additional notifications and plans required for the work activities will be prepared and submitted for approval, as needed. This may include a RAWP, a Stormwater Pollution Prevention Plan ("SWPPP"), RI Remediation General Permits ("RGP"), and approvals through the Rhode Island Coastal Resource Management Council ("CRMC").
- Prior to any work, the boundaries of the excavation area and proposed excavation grid will be surveyed, properly secured, and a permit number obtained from Dig Safe.
- Access to the active work areas will be controlled through fencing with controlled access points.
- Water misting will be used as a dust suppressant, as appropriate.
- Air monitoring within the support work zone and perimeter to this zone will be conducted during the active removal of soils. To reduce dust levels and exposures to dust, a combination of engineering controls and personal protective equipment will be implemented as part of the work activities.

### 5.4 Soil Removal/Dewatering

All soils designated for removal will be excavated and transported off-Site for disposal at an approved facility as bulk PCB remediation waste. Soil removal activities will be conducted in compliance with 40 CFR § 761.61 and in accordance with the RIDEM Remediation Regulations. The remediation goal is to remove contaminated soils and verify that remaining soil concentrations are ≤ 10 mg/kg, the RIDEM GB Leachability Criteria for PCBs. Post-removal verification sampling will be conducted in all soil excavation areas to demonstrate that the clean-up goals have been achieved (refer to Section 5.5).

Currently, the area subject to remediation covers an estimated area of 13,666 square feet ($ft^2$). Soils will be classified as Type 1 soils (PCB concentrations ≥ 50 mg/kg) and Type 2 soils (PCB concentrations < 50 mg/kg but > 10/mg/kg). Type 1 and Type 2 soils comprise an area of approximately 10,561 $ft^2$ and 3,105 $ft^2$, respectively. Based on Site investigation data, the approximate volumes of Type 1 and 2 soils include:

- Approximately 1,630 cubic yards ($yds^3$) of Type 1 soil (PCB concentrations in soil ≥ 50 mg/kg);
- Approximately 340 $yds^3$ of Type 2 soil (PCB concentrations < 50 mg/kg but > 10/mg/kg).

The proposed soil excavation has been separated into three primary areas, designated Areas A, B and C as shown on Figure 5. Area A, situated on the southern portion of PCB excavation area, will be the first area excavated. Type 1 soils (> 50 mg/kg PCBs) will be excavated first. Once Type 1 soils have been excavated to the clean-up goal of < 10 mg/kg, Type 2 soils will then be excavated. The aforementioned steps and processes will be subsequently repeated in Areas B and C until a cleanup level of < 10 mg/kg is achieved across the entire impacted area. Soil excavation sequencing is subject to change based on feedback from the selected remediation contractor and conditions encountered in the subsurface during

© 2014 ESS Group, Inc.

performance of the work. As requested[1] by USEPA, the selected remediation contractor will submit a Implementation Work Plan to USEPA which will outline the soil excavation sequencing program.

Figure 5 depicts the locations of the characterization samples collected and the proposed remediation areas, excavation depths, and differentiation between Type 1 (> 50 mg/kg) and Type 2 (< 50 mg/kg and >10/mg/kg) soils.

Excavation dewatering will be necessary in areas where soil removal extends greater than 5 to 6 feet below grade. Dewatered effluent will be either: (i) containerized on-Site in fractionation tanks and then transported off-Site to an appropriate facility for disposal; or (ii) treated on-Site (via a mobile treatment system) then discharged to an approved location (i.e., surface water body). All local, state, and federal permits and approvals necessary for the soil excavation and construction dewatering activities will be in-place prior to the commencement of work.

### 5.5 Verification Sampling

Following completion of the initial soil excavation, post-excavation samples will be collected in accordance with 40 CFR § 761.289(b)(1) Subpart O sampling plan. Based on the conceptual site model for the PCB release, the defined extent of PCB-impacted soils and excavation areas, and the existing data, a verification sampling frequency of one composite confirmatory sample per a maximum of nine discrete soil samples (i.e., approximately a 10' x 10' grid with 3-meter hexagonal grid spacing) is proposed, resulting in 41 composite verification samples.

Samples will be extracted by USEPA Method 3540C (Soxhlet Extraction) and analyzed for PCBs by USEPA Method 8082. The proposed verification sampling plan and Excavation Areas A, B, and C are shown on Figure 6. Soil excavation will begin at Area A with Type 1 soils (>50 mg/kg PCBs) being removed first. Once Type 1 soils have been excavated to the depths shown on Figure 5, discrete and composite verification soil samples will be collected as shown on Figure 6.

Upon receipt of the verification sample analytical results, the sample results will be compared to the following cleanup levels:

- If > 50 mg/kg, additional soil excavation activities will be performed in the respective grid areas (an additional six inches of soil excavated), the soil will be segregated as hazardous waste and verification samples collected at the frequency indicated above using off-set sampling locations. This process will be repeated until a cleanup level of < 10 mg/kg is achieved.
- If > 10 mg/kg but < 50 mg/kg additional soil excavation activities will be performed in the respective grid areas (an additional six inches of soil excavated), soil will be segregated into the non-hazardous stockpile for off-site disposal, and verification samples collected at the frequency indicated above using offset sampling locations.

Once Type 1 soils have been excavated to the clean-up level, Type 2 soils will be excavated from Area A, discrete and composite verification samples will be collected.

Upon receipt of the verification sample analytical results, the sample results will be compared to the following cleanup levels:

- If ≤ 10 mg/kg, the clean-up will be considered complete in the non-hazardous areas.
- If > 10 mg/kg, additional soil excavation activities will be performed in the respective grid areas and verification samples will be collected at the frequency indicated above using offset sampling locations.

[1] USEPA and ESS conference call on December 4, 2013.

© 2014 ESS Group, Inc.

- This process will be repeated until a cleanup level < 10 mg/kg is achieved.

The aforementioned steps and processes will be subsequently repeated in Area B and C until a cleanup level of < 10 mg/kg is achieved across the entire impacted area.

Additional details regarding the verification sampling plan are provided below:

- All samples will be transported to the laboratory under standard chain of custody procedures, extracted using USEPA Method 3540C (Soxhlet extraction), and analyzed for PCBs using USEPA Method 8082.
- In addition to the samples indicated above, field duplicate and matrix spike/matrix spike duplicate samples will be collected at a frequency of one per 20 primary samples. One equipment field blank will be collected during the verification sampling process. Temperature blanks will be included with every cooler. These samples will be submitted to the laboratory as part of the QA/QC procedures associated with sample collection. One method blank will be analyzed with each extraction batch.

## 5.6 Storage and Disposal

The following activities will be completed with regard to the proper storage and disposal of PCB remediation waste:

- At the end of each work day, any open excavations will be secured by temporary fencing and covered with an acceptable materials (i.e., 8-mil polyethylene sheeting). The excavation area(s) will be equipped with proper erosion and sediment control devices, as outlined in a SWPPP.
- A secure, lined, covered, and marked waste container (roll-off or equivalent) or 55-gallon U.S. Department of Transportion ("DOT")-approved steel containers will be staged for the collection of PCB wastes generated during the work activities in accordance with 40 CFR § 761.65 and/or soils will be direct loaded in transportation vehicles for shipment to the disposal facility.
- All containers will be properly labeled and marked in accordance with 40 CFR § 761.40.
- Upon completion of the work or when a container is considered full, the PCB remediation waste will be transported off-Site under manifest or bills of lading for disposal at an approved disposal facility(ies). Soils classified as hazardous waste (≥ 50 mg/kg) will be segregated for disposal at a hazardous waste landfill (e.g. the Chemical Waste Management facility located in Model City, New York, or equivalent) or approved RCRA Part B facility in accordance with 40 CFR § 761.61(a) (e.g., Heritage Environmental Services LLC hazardous waste landfill located in Roachdale, Indiana, or equivalent). Soils classified as non-hazardous (< 50 mg/kg) will be segregated for disposal at a non-hazardous waste disposal facility.
- Copies of all manifests, waste shipment records, bills of lading, and certificates of disposal will be collected and provided as part of the final report to EPA.
- Groundwater recovered from open excavations will be either temporarily stored in DOT-approved frac tanks and disposed of off-Site at an appropriate facility or will be treated on-Site (via a mobile treatment system) and subsequently discharged to an RIDEM-approved discharge location. No discharge of effluent will occur during non-working hours.

## 5.7 Site Restoration

Following completion of the excavation activities and verification that the cleanup levels have been met, all soil excavation areas will be backfilled and compacted with clean fill (or surrounding urban fill) and a low permeability cap will be installed over the entire area where PCBs exist in soil at concentrations above 1 mg/kg. The low permeability cap will be an asphalt cap with a minimum of 6-inch thickness. The

© 2014 ESS Group, Inc.

asphalt will be laid in three-inch by three inch perpendicular lifts. The area of the proposed low permeability cap and cap design specifications are shown on Figure 7. The Site controls will be dismantled and all wastes will be transported off-Site for proper disposal.

### 5.8 Environmental Land Use Restriction

As previously stated, an ELUR will be part of the proposed final remedy at the Site. For this Site, an ELUR specifically for the area where PCBs exist in soil at concentrations above 1 mg/kg also would need to be recorded. The ELUR for the PCB area would state that the land has been used for PCB remediation waste disposal, document the existence of the cap and the requirement to maintain the cap, and document the applicable cleanup levels left at the site under the cap, as required by 40 C.F.R. § 761.61 (a)(8). The ELUR will include exhibits such as a metes and bounds description of the area of the Site that the ELUR would affect and a post-construction soil management plan that describes maintenance of the Site caps as well as providing details of inspections that must be conducted to ensure the integrity of these caps. Immediately after recording the ELUR in the Land Evidence Records of the City of Providence, a certification signed by the property owner will be submitted to the EPA Regional Administrator stating that the ELUR has been recorded in accordance with 40 C.F.R. § 761.61 (a)(8)(i)(A).

### 5.9 Recordkeeping and Documentation

Following completion of the remedial and Site restoration activities, records and documents per 40 C.F.R. Part 761 will be generated and maintained at one location. These documents will be made available to EPA upon request. A final report documenting the completion of the work activities and including but not limited to a description of the work activities, verification analytical results, volumes of disposed materials, and waste disposal documentation will be prepared and submitted to EPA.

## 6.0 SCHEDULE

ESS proposes the following schedule to implement the SIP.

| Activity | Timeframe |
|---|---|
| PCB Soil Remediation | August – September 2014 |
| Re-grading and Capping | September – October 2014 |
| Draft ELUR | November – December 2014 |
| USEPA Final SIP Report | January – April 2015 |
| RIDEM Closure Report | January – April 2015 |
| Recording of ELUR | March – April 2015 |

© 2014 ESS Group, Inc.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

| Aroclor 1268 | 10 | 10 | 10 | 10 | mg/kg |
| | | | | | |

Notes:

1. BOLD Values Exceed the RIDEM Residential and Industrial Direct Exposure Criteria and the GB Leachability Criteria
2. BOLD Shaded (Yellow) Values are greater than 50 mg/kg (TSCA).
3. "ND" = Not detected above the presented laboratory reporting limit
4. "P" = The relative percent difference between the two columns exceeds the method specific criteria. The higher of the two results is shown.
5. Results qualified as estimated "J" and non-detects estimated "UJ" have field duplicate samples with relative percent differences above acceptance criteria
6. "JL" = Estimated value with potential low bias because sample was extracted after the 14-day holding time
7. The method blank associated with samples qualified with "B", has a concentration above the reporting limit for a specified Aroclor.

| Laboratory ID | Sample ID | Media | Date Collected | Extraction Method | Reporting Limit | Minimum Criteria | PCBs Detected? | Precision Qualification | Accuracy Qualification | Representativeness Qualification | Comparability Qualification | Completeness Qualification | Sensitivity Qualification |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0911346-01 | SB-13 (0'-2') | Soil | 8/12/09 | Method 3540C | 0.0775 | 1 | No | None | The surrogate recovery for the Method Blank and LCSD is above the individual acceptance criteria for Decachlorobiphenyl (155%/155%), but within the overall method allowances. | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911346-03 | SB-14 (0'-2') | Soil | 8/12/09 | Method 3540C | 0.179 | 1 | No | None | None | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911346-05 | SB-15 (0'-2') | Soil | 8/12/09 | Method 3540C | 0.196 | 1 | No | None | None | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911480-02 | SB-16 (3'-6') | Soil | 8/12/09 | Method 3540C | 0.0383 | 1 | No | None | None | None | None | None | None |
| L0911480-04 | SB-16A (2'-5') | Soil | 8/12/09 | Method 3540C | 0.0383 | 1 | No | None | None | None | None | None | None |
| L0911346-07 | SB-18A (0'-2') | Soil | 8/14/09 | Method 3540C | 0.0351 | 1 | No | None | None | None | None | None | None |
| L0911346-09 | SB-18 (0'-2') | Soil | 8/14/09 | Method 3540C | 0.177 | 1 | Yes | None | None | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911480-06 | SB-17 (3'-5') | Soil | 8/14/09 | Method 3540C | 0.0379 | 1 | No | None | None | None | None | None | None |
| L0911480-08 | SB-17A (3'-5') | Soil | 8/14/09 | Method 3540C | 0.0402 | 1 | No | None | None | None | None | None | None |
| L0915001-01 | SB-41(0'-1') | Soil | 10/20/09 | Method 3540C | 0.0410 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. The surrogate recovery is above the individual acceptance criteria for Decachlorobiphenyl (202%), but within the overall method allowances. | None | None | None | None |
| L0915001-02 | SB-41(1'-2') | Soil | 10/20/09 | Method 3540C | 0.0364 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-03 | SB-41(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0570 | 1 | No | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-04 | SB-42(0'-1') | Soil | 10/20/09 | Method 3540C | 0.202 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. The surrogate recovery is above the individual acceptance criteria for Decachlorobiphenyl (220%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by matrix interferences encountered during the concentration of the samples. |
| L0915001-05 | SB-42(1'-2') | Soil | 10/20/09 | Method 3540C | 0.0338 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-06 | SB-42(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0355 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-07 | SB-43(0'-1') | Soil | 10/20/09 | Method 3540C | 0.732 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclors 1248 and 1254. Because the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed. Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915001-08 | SB-43(1'-2') | Soil | 10/20/09 | Method 3540C | 0.382 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915001-09 | SB-43(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0341 | 1 | No | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |

| Laboratory ID | Sample ID | Media | Date Collected | Extraction Method | Reporting Limit | Minimum Criteria | PCBs Detected? | Precision Qualification | Accuracy Qualification | Representativeness Qualification | Comparability Qualification | Completeness Qualification | Sensitivity Qualification |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0915001-10 | SB-44(0'-1') | Soil | 10/20/09 | Method 3540C | 0.211 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. The surrogate recovery is above the individual acceptance criteria for Decachlorobiphenyl (182%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by matrix interferences encountered during the concentration of the samples. |
| L0915001-11 | SB-44(1'-2') | Soil | 10/20/09 | Method 3540C | 0.181 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by matrix interferences encountered during the concentration of the samples. |
| L0915001-12 | SB-44(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0395 | 1 | No | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-13 | SB-45(0'-1') | Soil | 10/20/09 | Method 3540C | **1.84** | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the sample and by the elevated concentrations of target compounds in the sample. |
| L0915001-14 | SB-45(1'-2') | Soil | 10/20/09 | Method 3540C | 0.0390 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-15 | SB-45(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0342 | 1 | No | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0915001-16 | SB-46(0'-1') | Soil | 10/20/09 | Method 3540C | 0.181 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915001-17 | SB-46(1'-2') | Soil | 10/20/09 | Method 3540C | 0.0717 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915001-18 | SB-46(2'-3') | Soil | 10/20/09 | Method 3540C | 0.0375 | 1 | Yes | The LCS/LCSD RPD is above acceptance criteria for Aroclor 1016 (77%); however, individual LCS/LCSD recoveries are within method limits. The dual column RPD is above acceptance criteria for Aroclor 1248; however, no obvious column interferences are present. The result has been qualified with a "P". | The surrogate recovery for the LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. | None | None | None | None |
| L0911346-11 | SB-19 (0'-4') | Soil | 8/14/09 | Method 3540C | 0.181 | 1 | No | None | None | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911346-13 | SB-20 (0'-2') | Soil | 8/14/09 | Method 3540C | 0.175 | 1 | No | None | None | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample. |
| L0911346-15 | SB-21 (0'-2') | Soil | 8/12/09 | Method 3540C | **7.75** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by matrix interferences encountered during concentration of sample and by elevated concentrations of target compounds in sample. |
| L0911346-17 | SB-22 (0'-3') | Soil | 8/14/09 | Method 3546 | 0.194 | 1 | Yes | None | The surrogate recovery is above the individual acceptance criteria for Decachlorobiphenyl (167%), but within the overall method allowances. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0911346-19 | SB-25 (0'-3') | Soil | 8/12/09 | Method 3546 | 0.383 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |

|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0913917-20 | SB-29A (1'-2') | Soil | 10/1/09 | Method 3546 | **3.91** | 1 | Yes | Field duplicate RPDs were above acceptance criteria of 50% for detects of Aroclor 1248 and Aroclor 1254. Field duplicate RPD was above acceptance criteria of 50% for the non-detect of Aroclor 1254. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-01 | SB-29A (2'-3') | Soil | 10/1/09 | Method 3546 | 0.394 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-02 | SB-29A (3'-4') | Soil | 10/1/09 | Method 3546 | 0.0441 | 1 | Yes | Field duplicate RPDs were above acceptance criteria of 50% for Aroclor 1254. | None | None | None | None | None |
| L0913919-03 | SB-29A (4'-5') | Soil | 10/1/09 | Method 3546 | 0.0403 | 1 | Yes | None | None | None | None | None | None |
| L0913919-04 | SB-29A (5'-6') | Soil | 10/1/09 | Method 3546 | 0.0468 | 1 | No | Field duplicate RPDs were above acceptance criteria of 50% for the non-detect for Aroclor 1248. | None | None | None | None | None |
| L0913919-05 | SB-30A (0'-1') | Soil | 10/1/09 | Method 3546 | **38.8** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-06 | SB-30A (1'-2') | Soil | 10/1/09 | Method 3546 | **7.83** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-07 | SB-30A (2'-3') | Soil | 10/1/09 | Method 3546 | **7.58** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-08 | SB-30A (3'-4') | Soil | 10/1/09 | Method 3546 | 0.0372 | 1 | Yes | None | None | None | None | None | None |
| L0913919-09 | SB-31 (0'-1') | Soil | 10/1/09 | Method 3546 | **399** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-10 | SB-31 (1'-2') | Soil | 10/1/09 | Method 3546 | **3830** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-11 | SB-32 (0'-1') | Soil | 10/1/09 | Method 3546 | **782** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-12 | SB-32 (1'-2') | Soil | 10/1/09 | Method 3546 | **1920** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-13 | SB-33 (0'-1') | Soil | 10/1/09 | Method 3546 | **205** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. Results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to dilution required by the matrix interferences encountered during concentration of the sample and the dilution required by the elevated concentrations of target compounds in the sample. |
| L0913919-14 | SB-33 (1'-2') | Soil | 10/1/09 | Method 3546 | **388** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-15 | SB-34 (0'-1') | Soil | 10/1/09 | Method 3546 | **398** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-16 | SB-34 (1'-2') | Soil | 10/1/09 | Method 3546 | **929** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-17 | SB-35 (0'-1') | Soil | 10/1/09 | Method 3546 | **375** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |

|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0913919-18 | SB-35 (1'-2') | Soil | 10/1/09 | Method 3546 | **363** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-19 | SB-36 (0'-1') | Soil | 10/1/09 | Method 3546 | **18.7** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913919-20 | SB-36 (1'-2') | Soil | 10/1/09 | Method 3546 | 0.714 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-01 | SB-37 (0'-1') | Soil | 10/1/09 | Method 3546 | **7.70** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-02 | SB-37 (1'-2') | Soil | 10/1/09 | Method 3546 | **3.91** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-03 | SB-38 (0'-1') | Soil | 10/1/09 | Method 3546 | **7.90** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-04 | SB-38 (1'-2') | Soil | 10/1/09 | Method 3546 | **3.86** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-05 | SB-39 (0'-1') | Soil | 10/1/09 | Method 3546 | **19.8** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-06 | SB-39 (1'-2') | Soil | 10/1/09 | Method 3546 | **3.72** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-07 | SB-40 (0'-1') | Soil | 10/1/09 | Method 3546 | **75.7** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-08 | SB-40 (1'-2') | Soil | 10/1/09 | Method 3546 | **3.83** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-09 | SB-529A (0'-1') | Soil | 10/1/09 | Method 3546 | **7.85** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-10 | SB-529A (1'-2') | Soil | 10/1/09 | Method 3546 | **7.43** | 1 | Yes | Field duplicate RPDs were above acceptance criteria of 50% for the detects of Aroclor 1248 and Aroclor 1254. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-11 | SB-529A (2'-3') | Soil | 10/1/09 | Method 3546 | 0.394 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913920-12 | SB-529A (3'-4') | Soil | 10/1/09 | Method 3546 | 0.0392 | 1 | Yes | Field duplicate RPDs were above acceptance criteria of 50% for the detects of Aroclor 1254. | None | None | None | None | None |
| L0913920-13 | SB-529A (4'-5') | Soil | 10/1/09 | Method 3546 | 0.0434 | 1 | Yes | None | None | None | None | None | None |
| L0913920-14 | SB-529A (5'-6') | Soil | 10/1/09 | Method 3546 | 0.0381 | 1 | Yes | Field duplicate RPDs were above acceptance criteria of 50% for the detects of Aroclor 1248. | None | None | None | None | None |
| L0913922-05 | SB-28A (4'-5') | Soil | 10/1/09 | Method 3546 | 0.0371 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | None | None | None | None | None |
| L0913922-06 | SB-28A (5'-6') | Soil | 10/1/09 | Method 3546 | 0.0388 | 1 | No | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | None | None | None | None | None |

|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0913922-09 | SB-31 (2'-3') | Soil | 10/1/09 | Method 3546 | **186** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-10 | SB-31 (3'-4') | Soil | 10/1/09 | Method 3546 | **3.82** | 1 | Yes | The dual column RPD is above the acceptance criteria for Aroclor 1254; however, no obvious column interferences are present. The results have been qualified with a "P". | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-11 | SB-31 (4'-5') | Soil | 10/1/09 | Method 3546 | **1.94** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-12 | SB-31 (5'-6') | Soil | 10/1/09 | Method 3546 | 0.357 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-15 | SB-32 (4'-5') | Soil | 10/1/09 | Method 3546 | **18500** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-16 | SB-32 (5'-6') | Soil | 10/1/09 | Method 3546 | **3820** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-19 | SB-33 (4'-5') | Soil | 10/1/09 | Method 3546 | **4.11** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-20 | SB-33 (5'-6') | Soil | 10/1/09 | Method 3546 | 0.479 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-23 | SB-34 (4'-5') | Soil | 10/1/09 | Method 3546 | 0.0371 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | None | None | None | None | None |
| L0913922-24 | SB-34 (5'-6') | Soil | 10/1/09 | Method 3546 | 0.0389 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | None | None | None | None | None |
| L0913922-25 | SB-35 (2'-3') | Soil | 10/1/09 | Method 3546 | **976** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-26 | SB-35 (3'-4') | Soil | 10/1/09 | Method 3546 | **740** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-27 | SB-35 (4'-5') | Soil | 10/1/09 | Method 3546 | **758** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-28 | SB-35 (5'-6') | Soil | 10/1/09 | Method 3546 | **1.81** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-29 | SB-36 (2'-3') | Soil | 10/1/09 | Method 3546 | **1.82** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-30 | SB-36 (3'-4') | Soil | 10/1/09 | Method 3546 | 0.361 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |

|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0913922-33 | SB-37 (2'-3') | Soil | 10/1/09 | Method 3546 | **1.82** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-34 | SB-37 (3'-4') | Soil | 10/1/09 | Method 3546 | 0.372 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-37 | SB-38 (2'-3') | Soil | 10/1/09 | Method 3546 | 0.362 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-38 | SB-38 (3'-4') | Soil | 10/1/09 | Method 3546 | 0.401 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0913922-41 | SB-39 (2'-3') | Soil | 10/1/09 | Method 3546 | 0.364 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-42 | SB-39 (3'-4') | Soil | 10/1/09 | Method 3546 | 0.0384 | 1 | Yes | The LCS/LCSD RPD is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. | None | None | None | None | None |
| L0913922-45 | SB-40 (2'-3') | Soil | 10/1/09 | Method 3546 | 0.764 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0913922-46 | SB-40 (3'-4') | Soil | 10/1/09 | Method 3546 | 0.739 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B". |
| L0915001-19 | SB-50(0'-1') | Soil | 10/20/09 | Method 3546 | **4370** | 1 | Yes | None | The surrogate recovery for LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclors 1248 and 1254. Because the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed. Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915001-20 | SB-50(1'-2') | Soil | 10/20/09 | Method 3546 | **36.4** | 1 | Yes | None | The surrogate recovery for LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances. The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclors 1248 and 1254. Because the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed. Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-01 | SB-50(2'-3') | Soil | 10/20/09 | Method 3546 | **375** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-02 | SB-51(0'-1') | Soil | 10/20/09 | Method 3546 | **1.86** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-03 | SB-51(1'-2') | Soil | 10/20/09 | Method 3546 | 0.0375 | 1 | Yes | None | None | None | None | None | None |
| L0915002-04 | SB-51(2'-3') | Soil | 10/20/09 | Method 3546 | 0.0346 | 1 | Yes | None | None | None | None | None | None |
| L0915002-05 | SB-52(0'-1') | Soil | 10/20/09 | Method 3546 | **3.70** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-06 | SB-52(1'-2') | Soil | 10/20/09 | Method 3546 | 0.415 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-07 | SB-52(2'-3') | Soil | 10/20/09 | Method 3546 | 0.353 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-08 | SB-53(0'-1') | Soil | 10/20/09 | Method 3546 | **777** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915002-09 | SB-53(1'-2') | Soil | 10/20/09 | Method 3546 | **1020** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |

Since the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed. Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915740-22 | SB-60 (0'-1') | Soil | 10/20/09 | Method 3546 | 0.761 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. Since the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed. Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915740-23 | SB-60 (1'-2') | Soil | 10/20/09 | Method 3540C | 0.388 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |
| L0915740-24 | SB-60 (2'-3') | Soil | 10/20/09 | Method 3546 | 0.0341 | 1 | No | None | None | None | None | None | Method Blank has a concentration above the reporting limit for Aroclor 1248. Since the sample was non-detect for this target analyte, no further actions were taken. |
| L0916482-01 | SB-59 (3'-4') | Soil | 10/20/09 | Method 3546 | **45.0** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. Method Blank has a concentration above the reporting limit for Aroclor 1248. Since the associated sample concentration is greater than 5x the Method Blank concentration for this analyte, no qualification of the results was performed. |
| L0916482-02 | SB-59 (4'-5') | Soil | 10/20/09 | Method 3546 | 0.0367 | 1 | Yes | None | None | None | None | None | None |
| L0916482-03 | SB-59 (5'-6') | Soil | 10/20/09 | Method 3546 | 0.0380 | 1 | Yes | None | None | None | None | None | None |

| Laboratory ID | Sample ID | Media | Date Collected | Extraction Method | Reporting Limit | Minimum Criteria | PCBs Detected? | Precision Qualification | Accuracy Qualification | Representativeness Qualification | Comparability Qualification | Completeness Qualification | Sensitivity Qualification |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| L0918108-01 | SB-61(0'-1') | Soil | 12/11/09 | Method 3540C | 0.0369 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-02 | SB-61(1'-2') | Soil | 12/11/09 | Method 3540C | 0.0350 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-03 | SB-61(2'-3') | Soil | 12/11/09 | Method 3540C | 0.0350 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-04 | SB-61(3'-4') | Soil | 12/11/09 | Method 3540C | 0.0353 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-05 | SB-61(4'-5') | Soil | 12/11/09 | Method 3540C | 0.0358 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-06 | SB-61(5'-6') | Soil | 12/11/09 | Method 3540C | 0.0347 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-07 | SB-61(6'-7') | Soil | 12/11/09 | Method 3546 | 0.0348 | 1 | Yes | None | None | None | None | None | None |
| L0918108-08 | SB-61(7'-8') | Soil | 12/11/09 | Method 3546 | 0.0320 | 1 | Yes | None | None | None | None | None | None |
| L0918108-09 | SB-62(0'-1') | Soil | 12/11/09 | Method 3540C | 0.0739 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | Elevated detection limits due to dilution required by matrix interferences encountered during the concentration of the sample. |
| L0918108-10 | SB-62(1'-2') | Soil | 12/11/09 | Method 3540C | 0.0362 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-11 | SB-62(2'-3') | Soil | 12/11/09 | Method 3540C | 0.0353 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-12 | SB-62(3'-4') | Soil | 12/11/09 | Method 3540C | 0.0368 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-13 | SB-62(4'-5') | Soil | 12/11/09 | Method 3540C | 0.0364 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-14 | SB-62(5'-6') | Soil | 12/11/09 | Method 3540C | 0.180 | 1 | No | None | The surrogate recoveries were outside the acceptance criteria for Decachlorobiphenyl (306%/368%); however, the sample was not re-extracted due to coelution with obvious interferences. The results are not considered to be biased. The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | Elevated detection limits due to dilution required by matrix interferences encountered during the concentration of the sample. |
| L0918108-16 | SB-62(7'-8') | Soil | 12/11/09 | Method 3540C | 0.207 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | Elevated detection limits due to dilution required by matrix interferences encountered during the concentration of the sample. |
| L0918108-17 | SB-63(0'-1') | Soil | 12/11/09 | Method 3540C | 0.0356 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-18 | SB-63(1'-2') | Soil | 12/11/09 | Method 3540C | 0.0353 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-19 | SB-63(2'-3') | Soil | 12/11/09 | Method 3540C | 0.0353 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918108-20 | SB-63(3'-4') | Soil | 12/11/09 | Method 3540C | 0.0378 | 1 | No | None | The surrogate recoveries for Method Blank are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (16%/19%). The associated samples are non-detect and have acceptable surrogate recoveries; therefore, no further actions were taken. | None | None | None | None |
| L0918110-01 | SB-63(4'-5') | Soil | 12/11/09 | Method 3546 | 0.0369 | 1 | No | None | None | None | None | None | None |
| L0918110-02 | SB-63(5'-6') | Soil | 12/11/09 | Method 3546 | 0.0701 | 1 | No | None | None | None | None | None | Elevated detection limits due to dilution required by matrix interferences encountered during the concentration of the sample. |
| L0918110-03 | SB-63(6'-7') | Soil | 12/11/09 | Method 3546 | 0.0371 | 1 | No | None | None | None | None | None | None |
| L0918110-04 | SB-63(7'-8') | Soil | 12/11/09 | Method 3546 | 0.0355 | 1 | No | None | None | None | None | None | None |
| L0918110-05 | SB-64(0'-1') | Soil | 12/11/09 | Method 3546 | **4.21** | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples and the analytical dilutions required by the elevated concentrations of target compounds in the samples. |
| L0918110-06 | SB-64(1'-2') | Soil | 12/11/09 | Method 3546 | 0.739 | 1 | Yes | None | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | None | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |

| L1109549-02 | CS-2 | Soil | 6/27/11 | Method 3540C | **1.43** | 1 | No | Method blank has a concentration above the reporting limit for Aroclor 1254, however the criteria was achieved upon re-extraction outside of the holding tim. The results of the original analysis are reported and are qualified with a "B" for any sample concentrations that are less than 5x the blank concentration for this analyte. | The surrogate recoveries are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. | | None | None | Elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples. |
| L1109549-02-RE | CS-2 | Soil | 6/27/11 | Method 3540C | 0.0993 | 1 | No | None | The surrogate recoveries were outside the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (23%/19%) and Decachlorobiphenyl (10%/11%). | | None | None | Elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples. |
| L1109566-01 | SB-165 (0-1) | Soil | 6/9/11 | Method 3540C | 0.184 | 1 | Yes | None | None | Samples were extracted beyond the 14-day holding time established by the method. | None | None | Elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples. |

**Notes:**
All soil reporting limits are presented in milligrams per kilogram (mg/kg). All groundwater reporting limits are presented in micrograms per liter (µg/L)
Depth is presented in parentheses in feet below ground surface, where 0 represents ground surface.
Bolded values indicate laboratory reporting limits exceed the minimum reporting criteria due to required dilutions.

LCS/LCSD = Laboratory Control Sample/Laboratory Control Sample Duplicate

RPD = Relative Percent Difference
GW = Groundwater

Locus Map Not To Scale

## General Notes

1. THE PARCEL IS LOCATED IN THE CITY OF PROVIDENCE ON ASSESSOR'S PLAT 18 LOTS 48, 332 & 343.
2. THE OWNER PER DEED BOOK 9852 PAGE 228 IS ONE INDIA STREET, LLC.
3. THE PARCEL IS LOCATED IN ZONE VE (18) PER FEDERAL EMERGENCY MANAGEMENT AGENCY FLOOD INSURANCE RATE MAP 44007C0309H, DATED APRIL 18, 2011.
4. THE PARCEL IS ZONED W2 PER THE ASSESSOR'S ONLINE DATABASE. PLEASE CONTACT THE ZONING DEPARTMENT FOR ANY ADDITIONAL INFORMATION OR FOR A CERTIFICATE OF ZONING.
5. THERE WERE NO CEMETERIES, GRAVE SITES AND OR BURIAL GROUNDS OBSERVED WITHIN THE LIMITS OF THE SURVEY.
6. THERE WERE NO VISIBLE ABOVE GROUND ENCROACHMENTS OBSERVED, OTHER THAN SHOWN ON SURVEY.
7. FIELD SURVEY PERFORMED ON MARCH 12 & 22, 2013.
8. ALL UNDERGROUND UTILITIES SHOWN ON THIS PLAN HAVE BEEN LOCATED FROM FIELD SURVEY OBSERVATIONS ONLY TOGETHER WITH EXISTING PLANS BY OTHERS. DIPRETE ENGINEERING IS NOT RESPONSIBLE FOR MISSING UNDERGROUND UTILITIES, EITHER IN SERVICE OR ABANDONED, NOT OBSERVED AT THE TIME OF THE SURVEY. (PLEASE CONTACT DIGSAFE 72 WORKING HOURS PRIOR TO ANY CONSTRUCTION AT 1-800-344-7233).
9. THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A TITLE REPORT. DIPRETE ENGINEERING IS NOT RESPONSIBLE FOR ANY UNKNOWN OR UNRECORDED EASEMENTS THAT A TITLE REPORT WOULD DISCLOSE.
10. SITE SUBJECT TO UTILITY EASEMENT DESCRIBED IN DEED BOOK 1029 PAGE 325.
11. A CLOSING LINE IS AN ARBITRARY SURVEY LINE USED FOR COMPUTATIONAL PURPOSES ONLY AND IS NOT TO BE MISINTERPRETED AS A PROPERTY LINE.

## Datum Note:

1. ELEVATIONS SHOWN HEREON, IN U.S. SURVEY FEET, ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), AS DETERMINED BY DIPRETE ENGINEERING USING REAL TIME KINEMATIC G.P.S. OBSERVATIONS.

Screening Data: PID (ppm), FID (ppm)
Rock Quality Designation
Sample Type
Blows per 6 inches or Core Run (time/ft.)
Well Construction

Materials Description
Soils: moisture, density[1], color, size, major and minor constituents[2]
Rock: color, rock type, hardness, major mineral types, weathering, and degree of fracturing

**LEGEND:**
ND: not detected
N/A: not applicable
bgs: below ground surface
NM: not measured

SAMPLE TYPES:
D: drive
W: washed
TP: test pit
ST: Shelby Tube
A: auger
HA: hand auger
C: cored
RC: rotasonic core

**ROCK**
ROCK QUALITY DESIGNATION (RQD):
reported in % = [length of core in pieces 4" and longer/length of run] x 100

**SOIL**
[1] Density designation based on blow counts for each 12" of penetration using a 140 lb. wt x 30" drop on a 2" O.D. spilt spoon sampler. If blow counts are not taken then density may be estimated

MOISTURE:
dry
damp
moist
wet

[2] PROPORTIONS USED:
Trace: <10%
Little: 10-20%
Some: 20-35%
And: 35-50%

[1] GRANULAR SOILS DENSITY:
0-4: very loose
5-9: loose
10-29: medium dense
30-49: dense
50+: very dense

[1] PLASTIC SOILS DENSITY:
0-2: very soft
3-4: soft
5-8: medium stiff
9-15: stiff
16-30: very stiff
>30: hard

ROCK QUALITY DESIGNATION (RQD):
reported in % = [length of core in pieces 4" and longer/length of run] x 100

**SOIL**
[1] Density designation based on blow counts for each 12" of penetration using a 140 lb. wt x 30" drop on a 2" O.D. spilt spoon sampler. If blow counts are not taken then density may be estimated

MOISTURE:
dry
damp
moist
wet

[2] PROPORTIONS USED:
Trace: <10%
Little: 10-20%
Some: 20-35%
And: 35-50%

[1] PLASTIC SOILS DENSITY:
0-2: very soft
3-4: soft
5-8: medium stiff
9-15: stiff
16-30: very stiff
>30: hard

[1] GRANULAR SOILS DENSITY:
0-4: very loose
5-9: loose
10-29: medium dense
30-49: dense
50+: very dense

Materials Description

Soils: moisture, density[1], color, size, major and minor constituents[2]

Rock: color, rock type, hardness, major mineral types, weathering, and degree of fracturing

**LEGEND:**

ND: not detected
N/A: not applicable
bgs: below ground surface
NM: not measured
NR: not recorded

SAMPLE TYPES:
D: drive
W: washed
TP: test pit
ST: Shelby Tube
A: auger
HA: hand auger
C: cored
RC: rotasonic core

**ROCK**

ROCK QUALITY DESIGNATION (RQD):
reported in % = [length of core in pieces 4" and longer/length of run] x 100

**SOIL**

[1] Density designation based on blow counts for each 12" of penetration using a 140 lb. wt x 30" drop on a 2" O.D. spilt spoon sampler. If blow counts are not taken then density may be estimated

[1]PLASTIC SOILS DENSITY:
0-2: very soft
3-4: soft
5-8: medium stiff
9-15: stiff
16-30: very stiff
>30: hard

MOISTURE:

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

Sample Receipt

At the client's request, the sample identified as "SB-21 (3'-5')" on the chain of custody is reported as "SB-21 (2'-5')".

VOA vials were not received for samples "SB-21 (3'-5)" and "SB-25(7'-8')". The client confirmed that these vials were received by the laboratory on August 12, 2009, and placed on hold. They should not have been included on this chain of custody.

Samples "SB-17A (3'-5')" and "SB-17 (3'-5')" were received without the container for the Total Solids analysis. At the client's request, sample containers with the same client ID's, which were received on August 12, 2009, were utilized for Total Solids analysis.

**Project Name:** 1 INDIA ST. **Lab Number:** L0911346
**Project Number:** Not Specified **Report Date:** 08/24/09

**Case Narrative (continued)**

Volatile Organics

The surrogate recovery for L0911346-08, -12, and -18 is above the acceptance criteria for 4-Bromofluorobenzene (141%, 142%, and 141%, respectively). Since the samples were non-detect for all target analytes, re-analysis is not required.

L0911346-10: The internal standard (IS) response for 1,4-Dichlorobenzene-d4 and the surrogate recovery for 4-Bromofluorobenzene (167%) were outside the acceptance criteria; however, re-analysis achieved similar results (4-Bromofluorobenzene at 151%). The results of both analyses are reported.

L0911346-14: The internal standard (IS) response for 1,4-Dichlorobenzene-d4 and the surrogate recovery for 4-Bromofluorobenzene (156%) were outside the acceptance criteria; however, re-analysis achieved similar results (4-Bromofluorobenzene at 154%). The results of both analyses are reported.

The surrogate recovery for the WG376069-3 Method Blank, associated with L0911346-21 and -22, is above the acceptance criteria for 4-Bromofluorobenzene (133%). Since the Method Blank was non-detect for all target analytes, re-analysis is not required.

The surrogate recovery for the WG376233-3 Method Blank, associated with L0911346-08, -10, -12, and -14, is above the acceptance criteria for 4-Bromofluorobenzene (133%). Since the Method Blank was non-detect for all target analytes, re-analysis is not required.

The surrogate recovery for the WG376233-6 Method Blank, associated with L0911346-10, -14, and -18, is above the acceptance criteria for 4-Bromofluorobenzene (140%). Since the sample was Method Blank for all target analytes, re-analysis is not required.

Semivolatile Organics

L0911346-01 has elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the sample and by the elevated concentrations of target compounds in the sample.

The surrogate recoveries for L0911346-01 are below the acceptance criteria for 2-Fluorophenol, Phenol-d6, Nitrobenzene-d5, 2-Fluorobiphenyl, 2,4,6-Tribromophenol and 4-Terphenyl-d14 (all at 0%) due to the dilutions required to quantitate the sample. Re-extraction is not required; therefore, the results of the original

| **Project Name:** | 1 INDIA ST. | **Lab Number:** | L0911346 |
| **Project Number:** | Not Specified | **Report Date:** | 08/24/09 |

**Case Narrative (continued)**

analysis are reported.
L0911346-03 has elevated detection limits due to the dilution required by the sample matrix.
The WG375725-2 LCS recovery, associated with L0911346-01, -03, -05, -07, -09, -11, -13, -15, -17 and -19, was above the acceptance criteria for 2,4-Dinitrotoluene (97%); however, the associated samples were non-detect for this target compound. The results of the original analysis are reported.

PCB
L0911346-01, -03, -05, -09, -11, and -13 have elevated detection limits due to the dilutions required by matrix interferences encountered during the concentration of the samples.
L0911346-15 has elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the sample and by the elevated concentrations of target compounds in the sample.
L0911346-17 and -19 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.
The surrogate recoveries for L0911346-15 and -19 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the sample. Re-extraction is not required; therefore, the results of the original analysis are reported.
The surrogate recovery for L0911346-17 is above the individual acceptance criteria for Decachlorobiphenyl (167%), but within the overall method allowances.
The surrogate recovery for the WG376426-1 Method Blank and WG376426-3 LCSD, associated with L0911346-01, is above the individual acceptance criteria for Decachlorobiphenyl (155%/155%), but within the overall method allowances.

Pesticides
L0911346-09, -17, and -19 have elevated detection limits due to the dilutions required by the elevated concentrations of non-target compounds in the samples.

| | | | |
|---|---|---|---|
| **Project Name:** | 1 INDIA ST. | **Lab Number:** | L0911346 |
| **Project Number:** | Not Specified | **Report Date:** | 08/24/09 |

**Case Narrative (continued)**

The surrogate recovery for L0911346-11 is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (23%), but within the overall method allowances.
The dual column RPD for L0911346-15 is above the acceptance criteria for 4,4'-DDT; however, obvious column interferences are present. Due to these interferences, the lower of the two values is reported for this compound. The results have been qualfied with a "P".
The surrogate recovery for the WG375637-2 LCS, associated with L0911346-07, -09, -11, -13, -15, -17 and -19, is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (27%), but within the overall method allowances.

Metals
L0911346-01, -03, -05, -07, -09, -11, and -19 have elevated detection limits for all analytes, except Mercury, due to the dilutions required by non-target analyte spectral interferences encountered during analysis.
L0911346-15 has elevated detection limits for all analytes, except Mercury, due to the dilution required by target and non-target analyte spectral interferences encountered during analysis.
The WG375968-4 MS recovery associated with L0911346-17 is above the acceptance criteria for Chromium (135%). A post digestion spike was performed with an acceptable recovery of 84%.
The WG375968-4 MS recovery for Lead (132%) associated with L0911346-17, is invalid because the sample concentration is greater than four times the spike amount added.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

30 Standard Methods for the Examination of Water and Wastewater. APHA-AWWA-WPCF. 18th Edition. 1992.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised July 7, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 150.1, 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Nitrite-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, EPA 150.1, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), SM6251B, 314.0.

*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Nitrate-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCB-Water)
600/4-81-045-PCB-Oil

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D; ENZ. SUB. SM9223;

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM6215B, 9222B, 9223B Colilert, EPA 200.7, 200.8, 245.2, 110.2, 120.1, 150.1, 300.0, 325.2, 314.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 331.0. Organic Parameters: 504.1, 524.2, SM6251B.)
*Non-Potable Water* (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 150.1, 300.0, 305.1, 310.1, 325.2, 340.2, 350.1, 350.2, 351.1, 353.2, 354.1, 365.2, 375.4, 376.2, 405.1, 415.1, 420.1, 425.1, 1664A, SW-846 9010, 9030, 9040B, EPA 160.1, 160.2, 160.3, SM426C, SM2310B, 2540B, 2540D, 4500H+B, 4500NH3-H, 4500NH3-E, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 2320B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-117-07-1-B, LACHAT 10-107-06-1-B, LACHAT 10-107-04-1-C, LACHAT 10-107-04-1-J, LACHAT 10-117-07-1-A, SM4500CL-E, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3005A, 3015A, 3510C, 5030B, 8021B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A.)
*Solid & Chemical Materials* (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 7.3.3.2, 7.3.4.2, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040, 9045C, 9050C, 1311, 3005A, 3050B, 3051A. Organic Parameters: SW-846 3540C, 3545, 3580A, 5030B, 5035, 8021B, 8260B, 8270C, 8330, 8151A, 8082, 8081A.)

**New Jersey Department of Environmental Protection** Certificate/Lab ID: MA935. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 2540C, 2320B, 314.0, 331.0, 110.2, SM2120B, 2510B, 5310C, EPA 150.1, SM4500H-B, EPA 200.8, 245.2. Organic Parameters: 504.1, SM6251B, 524.2.)
*Non-Potable Water* (Inorganic Parameters: SM5210B, EPA 410.1, SM5220D, 4500Cl-D, EPA 300.0, SM2120B, SM4500F-BC, EPA 200.7, 351.1, LACHAT 10-107-06-2-D, EPA 353.2, SM4500NO3-F, 4500NO2-B, EPA 1664A, SM5310B, C or D, 4500-PE, EPA 420.1, SM4500P-B5+E, 2540B, 2540C, 2540D, EPA 120.1, SM2510B, SM15 426C, SM9221CE, 9222D, 9221B, 9222B, 9215B, 2310B, 2320B, 4500NH3-H, 4500-S D, EPA 350.2/.1, SM5210B, SW-846 3015, 6020, 7470A, 5540C, 4500H-B, EPA 200.8, SM3500Cr-D, EPA 245.1, 245.2, SW-846 9040B, 3005A, EPA 6010B, 7196A, SW-846 9010B, 9030B. Organic Parameters: SW-846 8260B, 8270C, 3510C, EPA 608, 624, 625, SW-846 5030B, 8021B, 8081A, 8082, 8151A, 8330, NJ OQA-QAM-025 Rev.7.)
*Solid & Chemical Materials* (Inorganic Parameters: SW-846 9040B, 3005A, 6010B, 7196A, 5030B, 9010B, 9030B, 1030, 1311, 3050B, 3051, 7471A, 9014, 9012A, 9045C, 9050A, 9065. Organic Parameters: SW-846 8021B, 8081A, 8082, 8151A, 8330, 8260B, 8270C, 1311, 1312, 3540C, 3545, 3550B, 3580A, 5035L, 5035H, NJ OQA-QAM-025 Rev.7.)

**New York Department of Health** Certificate/Lab ID: 11148. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM9223B, 9222B, 8215B, EPA 200.8, 200.7, 245.2, SM5310C, EPA 314.0, 331.0, SM2320B, EPA 300.0, 325.2, 110.2, SM2120B, 4500CN-E, 4500F-C, EPA 150.1, SM4500H-B, 4500NO3-F, 2540C, EPA 120.1, SM 2510B. Organic Parameters: EPA 524.2, 504.1.)
*Non-Potable Water* (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, EPA 405.1, SM5210B, EPA 410.4, SM5220D, EPA 305.1, SM2310B-4a, EPA 310.1, SM2320B, EPA 200.7, 300.0, 325.2, LACHAT 10-117-07-1A or B, SM4500Cl-E, EPA 340.2, SM4500F-C, EPA 375.4, SM15 426C, EPA 350.1, 350.2, LACHAT 10-107-06-1-B, SM4500NH3-H, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-041-C, SM4500-NO30F, EPA 354.1, SM4500-NO2-B, EPA 365.2, SM4500P-E, EPA 160.3, EPA 160.1, SM2540C, EPA 160.2, SM2540B, SM2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, S\M3500Cr-D, EPA 245.1, 245.2, 7470A, 110.2, SM2120B, 335.2, LACHAT 10-204-00-1-A, EPA 150.1, 9040B, SM4500-HB, EPA 1664A, EPA 415.1, SM5310C, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, EPA 376.2, SM4500S-D, EPA 425.1, SM5540C, EPA 3005A, 3015. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, 8021B, EPA 3510C, 5030B, 9010B, 9030B.)
*Solid & Hazardous Waste* (Inorganic Parameters: EPA 9040B, 9045C, 1010, 1030, SW-846 Ch 7 Sec 7.3, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8081A, 8151A, 8330, 8082, 8021B, 3540C, 3545, 3580, 5030B, 5035.)

**Pennsylvania Department of Environmental Protection** Certificate/Lab ID : 68-03671. ***NELAP Accredited.***
*Non-Potable Water* (Organic Parameters: EPA 3510C, 625, 608, 8081A, 8082, 8151A, 8270C, 8330)
*Solid & Hazardous Waste* (Inorganic Parameters: EPA 1010, 1030, 1311, 3050B, 3051, 6010B, EPA 7.3.3.2, EPA 7.3.4.2, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065. Organic Parameters: 3540C, 3545, 3580A, 5035, 8021B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)
**Rhode Island Department of Health** Certificate/Lab ID: LAO00065. ***NELAP Accredited via NY-DOH.***
Refer to MA-DEP Certificate for Potable and Non-Potable Water.

Refer to NY-DOH Certificate for Potable and Non-Potable Water.

**Utah Department of Health** Certificate/Lab ID: AAMA. ***NELAP Accredited.***
*Non-Potable Water* (Inorganic Parameters: Chloride EPA 300.0)

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

Sample Receipt

A project number was supplied by the client.

Semivolatile Organics

L0911480-02, -11 and -13 have elevated detection limits due to the dilutions required by the sample matrices.

The WG376229-2/-3 LCS/LCSD recoveries, associated with L0911480-02, -04, -06, -08, -11 and -13, were above the acceptance criteria for 2,4-Dinitrotoluene (104%/109%); however, the associated samples were non-detect for this target compound. The results of the original analysis are reported.

| **Project Number:** | 222610.01 | **Report Date:** | 08/26/09 |

**Case Narrative (continued)**

Petroleum Hydrocarbon Quantitation

The surrogate recovery for L0911480-11 was below the acceptance criteria for o-Terphenyl (18%); however, re-extraction achieved similar results (27%). The results of both extractions are reported.

L0911480-11 RE has an elevated detection limit due to the dilution required by the elevated concentration of target compound in the sample.

The surrogate recovery for the WG376208-3 Laboratory Duplicate, associated with L0911480-02, is below the acceptance criteria for o-Terphenyl (16%). The associated sample has an acceptable surrogate recovery, and the duplicate RPD is within method criteria; therefore, no further action was taken.

PCB

The surrogate recovery for L0911480-11 is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (23%) , but within the overall method allowances.

Pesticides

The surrogate recoveries for L0911480-04 were below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (18%/11%) and Decachlorobiphenyl (16%/17%); however, re-extraction achieved similar results (2,4,5,6-Tetrachloro-m-xylene at 23%/15% and Decachlorobiphenyl at 27%). The results of both extractions are reported.

L0911480-11 and -13 have elevated detection limits due to the dilutions required by the sample matrices.

Metals

L0911480-11 and -13 have elevated detection limits for all analytes, except Mercury, due to the dilutions required by non-target analyte spectral interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

EPA · Environmental Protection Agency.

LCS · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD · Laboratory Control Sample Duplicate: Refer to LCS.

MS · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.

MSD · Matrix Spike Sample Duplicate: Refer to MS.

NA · Not Applicable.

NC · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

ND · Not detected at the reported detection limit for the sample.

NI · Not Ignitable.

RDL · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

**A** - Spectra identified as "Aldol Condensation Product".

**B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank.

**D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

**E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

**H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

**P** - The RPD between the results for the two columns exceeds the method-specified criteria.

**Q** - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.)

**R** - Analytical results are from sample re-analysis.

**RE** - Analytical results are from sample re-extraction.

**J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

*Report Format:* Data Usability Report

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised August 25, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB by GC

L0912669-01 through -04 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

The surrogate recoveries for L0912669-01 through -04 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analysis are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised August 27, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

L0913042-01 has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

The surrogate recoveries for L0913042-01 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilution required to quantitate the sample. Re-extraction is not required; therefore, the results of the original analysis are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised September 22, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), 314.0, 332.
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D
*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables, 600/4-81-045-PCB-Oil

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM6215B, 9222B, 9223B Colilert, EPA 200.7, 200.8, 245.2, 120.1, 300.0, 314.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 331.0. Organic Parameters: 504.1, 524.2, SM6251B.)
*Non-Potable Water* (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 420.1, 1664A, SW-846 9010, 9030, 9040B, SM426C, SM2310B, 2540B, 2540D, 4500H+B, 4500NH3-H, 4500NH3-E, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 2320B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-117-07-1-B, LACHAT 10-107-06-1-B, LACHAT 10-107-04-1-C, LACHAT 10-107-04-1-J, LACHAT 10-117-07-1-A, SM4500CL-E, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. | **Project Name:** | 1 INDIA ST | **Lab Number:** | L0913917 |
| **Project Number:** | 0222610.01 | **Report Date:** | 10/09/09 |

**Case Narrative**

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCBs

L0913917-01, -02, -05, -06, -09 through -14 and -16 through -20 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

L0913917-15 has elevated detection limits due to the dilution required by the matrix interferences encountered during the concentration of the sample and the analytical dilution required by the elevated concentrations of target compounds in the sample.

The surrogate recoveries for L0913917-01, -02, -05, -06, -09 through -13 and -15 through -20 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (All at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original

**Case Narrative (continued)**

analysis are reported.

The surrogate recovery for L0913917-14 is outside the individual acceptance criteria for Decachlorobiphenyl (645%), but within the overall method allowances. The results of the original analysis are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

*Report Format:* Data Usability Report

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 1, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), 314.0, 332.
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D
*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables, 600/4-81-045-PCB-Oil

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM6215B, 9222B, 9223B Colilert, EPA 200.7, 200.8, 245.2, 120.1, 300.0, 314.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 331.0. Organic Parameters: 504.1, 524.2, SM6251B.)
*Non-Potable Water* (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 420.1, 1664A, SW-846 9010, 9030, 9040B, SM426C, SM2310B, 2540B, 2540D, 4500H+B, 4500NH3-H, 4500NH3-E, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 2320B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-117-07-1-B, LACHAT 10-107-06-1-B, LACHAT 10-107-04-1-C, LACHAT 10-107-04-1-J, LACHAT 10-117-07-1-A, SM4500CL-E, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. |---|---|---|---|
| **Project Name:** | 1 INDIA ST. | **Lab Number:** | L0913919 |
| **Project Number:** | 0222610.01 | **Report Date:** | 10/12/09 |

**Case Narrative**

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

L0913919-01, -05, -06, -07, -09 through -12, and -14 through -20 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

L0913919-13 has elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the sample and by the elevated concentrations of target compounds in the sample.

The surrogate recoveries for L0913919-01, -05, -06, -07, and -09 through -20 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analyses are

**Case Narrative (continued)**

reported.

The WG383508-1 Method Blank, associated with L0913919-01, -05, -06, -07, and -09 through -20, has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B".

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

*Report Format:* Data Usability Report

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 1, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCBs

L0913920-01 through -11 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

The surrogate recoveries for L0913920-01 through -11 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (All at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analysis are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 1, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.

|---|---|---|---|
| **Project Name:** | 1 INDIA ST | **Lab Number:** | L0913922 |
| **Project Number:** | 0222610.01 | **Report Date:** | 10/20/09 |

**Case Narrative**

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

L0913922-09 through -12, -15, -16, -19, -20, -25 through -30, -33, -34, -37, -38, -41, -45 and -46 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

The surrogate recoveries for L0913922-09 through -12, -15, -16, -19, -20, -25 through -30, -33, -34, -37, -38, -41, -45 and -46 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analysis are reported.

The dual column RPD for L0913922-10 is above the acceptance criteria for Aroclor 1254; however, no obvious

**Case Narrative (continued)**

column interferences are present. The results have been qualified with a "P".

The WG384319-1 Method Blank associated with L0913922-09 through -12, -15, -16, -19, -20, -25, -26 and -27 has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B".

The WG384323-1 Method Blank associated with L0913922-28, -29, 30, -33, -34, -37, -41, -45 and -46 has a concentration above the reporting limit for Aroclor 1248. The results of the original analyses are reported and are qualified with a "B".

The WG384812-2/-3 LCS/LCSD RPD associated with L0913922-05, -06, -23, -24, -38 and -42 is above the acceptance criteria for Aroclor 1016 (58%); however, the individual LCS/LCSD recoveries are within method limits. The results of the associated samples are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 19, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), 314.0, 332.
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D
*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables, 600/4-81-045-PCB-Oil

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***

|---|---|---|---|
| **Project Name:** | 1 INDIA ST. | **Lab Number:** | L0915001 |
| **Project Number:** | 222610.01 | **Report Date:** | 10/28/09 |

**Case Narrative**

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

The surrogate recovery for L0915001-01, -04, and -10 is above the individual acceptance criteria for Decachlorobiphenyl (202%, 220%, and 182%, respectively), but within the overall method allowances.
L0915001-04, -10, and -11 have elevated detection limits due to the dilutions required by matrix interferences encountered during the concentration of the samples.
L0915001-07, -08, -16, -17, -19, and -20 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

| | | | |
|---|---|---|---|
| **Project Name:** | 1 INDIA ST. | **Lab Number:** | L0915001 |
| **Project Number:** | 222610.01 | **Report Date:** | 10/28/09 |

**Case Narrative (continued)**

L0915001-13 has elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the sample and by the elevated concentrations of target compounds in the sample.

The surrogate recoveries for L0915001-07, -08, -13, -19, and -20 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analyses are reported.

The dual column RPD for L0915001-18 is above the acceptance criteria for Aroclor 1248; however, no obvious column interferences are present. The result has been qualified with a "P".

The WG385404-1 Method Blank, associated with L0915001-07, -19, and -20, has a concentration above the reporting limit for Aroclors 1248 and 1254. Since the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed.

The WG386068-2/-3 LCS/LCSD RPD, associated with L0915001-01 through -06, and -08 through -18, is above the acceptance criteria for Aroclor 1016 (77%); however, the individual LCS/LCSD recoveries are within method limits. The results of the associated samples are reported.

The surrogate recovery for the WG386068-3 LCSD is below the individual acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene (29%), but within the overall method allowances.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 22, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Case Narrative**

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

L0915002-01, -02, -05 through -11 and -14 through -20 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

The surrogate recoveries for L0915002-01, -02, -05 through -11 and -14 through -20 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analyses are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 22, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), 314.0, 332.
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D
*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables, 600/4-81-045-PCB-Oil

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM6215B, 9222B, 9223B Colilert, EPA 200.7, 200.8, 245.2, 120.1, 300.0, 314.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 331.0. Organic Parameters: 504.1, 524.2, SM6251B.)
*Non-Potable Water* (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 420.1, 1664A, SW-846 9010, 9030, 9040B, SM426C, SM2310B, 2540B, 2540D, 4500H+B, 4500NH3-H, 4500NH3-E, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 2320B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-117-07-1-B, LACHAT 10-107-06-1-B, LACHAT 10-107-04-1-C, LACHAT 10-107-04-1-J, LACHAT 10-117-07-1-A, SM4500CL-E, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3005A, 3015A, 3510C, 5030B, 8021B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A.)
*Solid & Chemical Materials* (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 7.3.3.2, 7.3.4.2, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040, 9045C, 9050C, 1311, 3005A, 3050B, 3051A. Organic Parameters: SW-846 3540C, 3545, 3580A, 5030B, 5035, 8021B, 8260B, 8270C, 8330, 8151A, 8082, 8081A.)

**New Jersey Department of Environmental Protection** Certificate/Lab ID: MA935. ***NELAP Accredited.***

*Non-Potable Water* (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, 5210B, EPA 410.4, SM5220D, 2310B-4a, 2320B, EPA 200.7, 300.0, LACHAT 10-117-07-1A or B, SM4500Cl-E, 4500F-C, SM15 426C, EPA 350.1, LACHAT 10-107-06-1-B, SM4500NH3-H, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-041-C, SM4500-NO3-F, 4500-NO2-B, 4500P-E, 2540C, 2540B, 2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, S\M3500Cr-D, EPA 245.1, 245.2, 7470A, SM2120B, SM4500-CN-E LACHAT 10-204-00-1-A, EPA 9040B, SM4500-HB, EPA 1664A, SM5310C, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, SM4500S-D, SM5540C, EPA 3005A, 3015. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, EPA 3510C, 5030B, 9010B, 9030B.)
*Solid & Hazardous Waste* (Inorganic Parameters: 1010, 1030, SW-846 Ch 7 Sec 7.3, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 1312, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8081A, 8151A, 8330, 8082, 3540C, 3545, 3546, 3580, 5030B, 5035.)

**North Carolina Department of the Environment and Natural Resources** Certificate/Lab ID : 666. Organic Parameters: MA-EPH, MA-VPH.

**Pennsylvania Department of Environmental Protection** Certificate/Lab ID : 68-03671. ***NELAP Accredited.***
*Non-Potable Water* (Organic Parameters: EPA 3510C, 5030B, 625, 624. 608, 8081A, 8082, 8151A, 8260B, 8270C, 8330)
*Solid & Hazardous Waste* (Inorganic Parameters: EPA 1010, 1030, 1311, 3050B, 3051, 6010B, EPA 7.3.3.2, EPA 7.3.4.2, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065. Organic Parameters: 3540C, 3545, 3580A, 5035, 8021B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

**Rhode Island Department of Health** Certificate/Lab ID: LAO00065. ***NELAP Accredited via NY-DOH.***
Refer to MA-DEP Certificate for Potable and Non-Potable Water.
Refer to NY-DOH Certificate for Potable and Non-Potable Water.

**Utah Department of Health** Certificate/Lab ID: AAMA. ***NELAP Accredited.***
*Non-Potable Water* (Inorganic Parameters: Chloride EPA 300.0)

**Analytes Not Accredited by NELAP**

Certification is not available by NELAP for the following analytes: **EPA 8260B:** Freon-113, 1,2,4,5-Tetramethylbenzene. **EPA 8330A:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT. **EPA 8270C:** Methyl naphthalene, Dimethyl naphthalene, Total Methylnapthalenes, Total Dimethylnaphthalenes. **EPA 625:** 4-Chloroaniline. **EPA 350.1** for Ammonia in a Soil matrix.

## Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

---

PCB

L0915028-01, -02, -05, and -06 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

The surrogate recoveries for L0915028-01, -02, -05, and -06 are below the acceptance criteria for 2,4,5,6-Tetrachloro-m-xylene and Decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction is not required; therefore, the results of the original analyses are reported.

The WG385602-1 Method Blank, associated with L0915028-01, -02, -05, and -06, has a concentration above the reporting limit for Aroclor 1248. Since the associated sample concentrations are greater than 5x the blank concentration for this analyte, no qualification of the results was performed.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

***Acronyms***

| | |
|---|---|
| EPA | · Environmental Protection Agency. |
| LCS | · Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes. |
| LCSD | · Laboratory Control Sample Duplicate: Refer to LCS. |
| MS | · Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. |
| MSD | · Matrix Spike Sample Duplicate: Refer to MS. |
| NA | · Not Applicable. |
| NC | · Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit. |
| ND | · Not detected at the reported detection limit for the sample. |
| NI | · Not Ignitable. |
| RDL | · Reported Detection Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. |
| RPD | · Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report. |

***Terms***

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

***Data Qualifiers***

| | |
|---|---|
| **A** | - Spectra identified as "Aldol Condensation Product". |
| **B** | - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. |
| **D** | - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte. |
| **E** | - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument. |
| **H** | - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection. |
| **P** | - The RPD between the results for the two columns exceeds the method-specified criteria. |
| **Q** | - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RDL. (Metals only.) |
| **R** | - Analytical results are from sample re-analysis. |
| **RE** | - Analytical results are from sample re-extraction. |
| **J** | - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs). |

*Report Format:* Data Usability Report

**Project Name:** 1 INDIA ST. **Lab Number:** L0915028

**Project Number:** Not Specified **Report Date:** 10/28/09

1 Test Methods for Evaluating Solid Waste: Physical/Chemical Methods. EPA SW-846. Third Edition. Updates I - IIIA, 1997.

30 Standard Methods for the Examination of Water and Wastewater. APHA-AWWA-WPCF. 18th Edition. 1992.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Woods Hole Labs shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Woods Hole Labs.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

# Certificate/Approval Program Summary

Last revised October 22, 2009 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

**Connecticut Department of Public Health** Certificate/Lab ID: PH-0574. ***NELAP Accredited Solid Waste/Soil.***

*Drinking Water* (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Haloacetic Acids, Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB).)
*Wastewater/Non-Potable Water* (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Calcium Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH.)
*Solid Waste/Soil* (Inorganic Parameters: Lead in Paint, pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), Reactivity. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3.3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons. )

**Maine Department of Human Services** Certificate/Lab ID: 2009024.
*Drinking Water* (Inorganic Parameters: SM9215B, 9221E, 9222B, 9222D, 9223B, EPA 180.1, 300.0, 353.2, SM2130B, 2320B, 4500Cl-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B,4500NO3-F, EPA 200.7, EPA 200.8, 245.1. Organic Parameters: 504.1, 524.2, SM 6251B.)
*Wastewater/Non-Potable Water* (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, Lachat 10-107-06-1-B, SM2320B, 2340B, 2510B, 2540C, 2540D, 426C, 4500Cl-D, 4500Cl-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B.5, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624.)

**Massachusetts Department of Environmental Protection** Certificate/Lab ID: M-MA086.
*Drinking Water*
Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl)
(EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate)
353.2 for: Nitrate-N, Nitrite-N; SM4500NO3-F, 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, 2320B, SM2540C, SM4500H-B.
Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics)
(504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), 314.0, 332.
Microbiology Parameters: SM9215B; MF-SM9222B; ENZ. SUB. SM9223; EC-SM9221E; MF-SM9222D
*Non-Potable Water*
Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn)
(EPA 200.7 for: Al,Sb,As,Be,Cd,Cr,Co,Cu,Fe,Pb,Mn,Mo,Ni,Se,Ag,Sr,Tl,Ti,V,Zn,Ca,Mg,Na,K)
245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2540B, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-B,C-Titr, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CN-CE, 2540D, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1
Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics)
(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables, 600/4-81-045-PCB-Oil

**New Hampshire Department of Environmental Services** Certificate/Lab ID: 200307. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM6215B, 9222B, 9223B Colilert, EPA 200.7, 200.8, 245.2, 120.1, 300.0, 314.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 331.0. Organic Parameters: 504.1, 524.2, SM6251B.)
*Non-Potable Water* (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 420.1, 1664A, SW-846 9010, 9030, 9040B, SM426C, SM2310B, 2540B, 2540D, 4500H+B, 4500NH3-H, 4500NH3-E, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 2320B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-117-07-1-B, LACHAT 10-107-06-1-B, LACHAT 10-107-04-1-C, LACHAT 10-107-04-1-J, LACHAT 10-117-07-1-A, SM4500CL-E, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3005A, 3015A, 3510C, 5030B, 8021B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A.)
*Solid & Chemical Materials* (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 7.3.3.2, 7.3.4.2, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040, 9045C, 9050C, 1311, 3005A, 3050B, 3051A. Organic Parameters: SW-846 3540C, 3545, 3580A, 5030B, 5035, 8021B, 8260B, 8270C, 8330, 8151A, 8082, 8081A.)

**New Jersey Department of Environmental Protection** Certificate/Lab ID: MA935. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 2540C, 2320B, 314.0, SM2120B, 2510B, 5310C, SM4500H-B, EPA 200.8, 245.2. Organic Parameters: 504.1, SM6251B, 524.2.)
*Non-Potable Water* (Inorganic Parameters: SM5210B, EPA 410.4, SM5220D, 4500Cl-D, EPA 300.0, SM2120B, SM4500F-BC, EPA 200.7, 351.1, LACHAT 10-107-06-2-D, EPA 353.2, SM4500NO3-F, 4500NO2-B, EPA 1664A, SM5310B, C or D, 4500-PE, EPA 420.1, SM4500P-B5+E, 2540B, 2540C, 2540D, EPA 120.1, SM2510B, SM15 426C, SM9221CE, 9222D, 9221B, 9222B, 9215B, 2310B, 2320B, 4500NH3-H, 4500-S D, EPA 350.1, SM5210B, SW-846 3015, 6020, 7470A, 5540C, 4500H-B, EPA 200.8, SM3500Cr-D, EPA 245.1, 245.2, SW-846 9040B, 3005A, EPA 6010B, 7196A, SW-846 9010B, 9030B. Organic Parameters: SW-846 8260B, 8270C, 3510C, EPA 608, 624, 625, SW-846 5030B, 8021B, 8081A, 8082, 8151A, 8330, NJ OQA-QAM-025 Rev.7.)
*Solid & Chemical Materials* (Inorganic Parameters: SW-846 9040B, 3005A, 6010B, 7196A, 5030B, 9010B, 9030B, 1030, 1311, 3050B, 3051, 7471A, 9014, 9012A, 9045C, 9050A, 9065. Organic Parameters: SW-846 8021B, 8081A, 8082, 8151A, 8330, 8260B, 8270C, 1311, 1312, 3540C, 3545, 3550B, 3580A, 5035L, 5035H, NJ OQA-QAM-025 Rev.7.)

**New York Department of Health** Certificate/Lab ID: 11148. ***NELAP Accredited.***
*Drinking Water* (Inorganic Parameters: SM9223B, 9222B, 9215B, EPA 200.8, 200.7, 245.2, SM5310C, EPA 314.0, 332.0, SM2320B, EPA 300.0, SM2120B, 4500CN-E, 4500F-C, 4500H-B, 4500NO3-F, 2540C, EPA 120.1, SM 2510B. Organic Parameters: EPA 524.2, 504.1.)
*Non-Potable Water* (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, 5210B, EPA 410.4, SM5220D, 2310B-4a, 2320B, EPA 200.7, 300.0, LACHAT 10-117-07-1A or B, SM4500Cl-E, 4500F-C, SM15 426C, EPA 350.1, LACHAT 10-107-06-1-B, SM4500NH3-H, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-041-C, SM4500-NO3-F, 4500-NO2-B, 4500P-E, 2540C, 2540B, 2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, S\M3500Cr-D, EPA 245.1, 245.2, 7470A, SM2120B, SM4500-CN-E LACHAT 10-204-00-1-A, EPA 9040B, SM4500-HB, EPA 1664A, SM5310C, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, SM4500S-D, SM5540C, EPA 3005A, 3015. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, EPA 3510C, 5030B, 9010B, 9030B.)
*Solid & Hazardous Waste* (Inorganic Parameters: 1010, 1030, SW-846 Ch 7 Sec 7.3, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 1312, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8081A, 8151A, 8330, 8082, 3540C, 3545, 3546, 3580, 5030B, 5035.)

**North Carolina Department of the Environment and Natural Resources** Certificate/Lab ID : 666. Organic Parameters: MA-EPH, MA-VPH.

**Pennsylvania Department of Environmental Protection** Certificate/Lab ID : 68-03671. ***NELAP Accredited.***
*Non-Potable Water* (Organic Parameters: EPA 3510C, 5030B, 625, 624. 608, 8081A, 8082, 8151A, 8260B, 8270C, 8330)
*Solid & Hazardous Waste* (Inorganic Parameters: EPA 1010, 1030, 1311, 3050B, 3051, 6010B, EPA 7.3.3.2, EPA 7.3.4.2, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065. Organic Parameters: 3540C, 3545, 3580A, 5035, 8021B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

**Rhode Island Department of Health** Certificate/Lab ID: LAO00065. ***NELAP Accredited via NY-DOH.***
Refer to MA-DEP Certificate for Potable and Non-Potable Water.
Refer to NY-DOH Certificate for Potable and Non-Potable Water.

**Utah Department of Health** Certificate/Lab ID: AAMA. ***NELAP Accredited.***
*Non-Potable Water* (Inorganic Parameters: Chloride EPA 300.0)

**Analytes Not Accredited by NELAP**

Certification is not available by NELAP for the following analytes: **EPA 8260B:** Freon-113, 1,2,4,5-Tetramethylbenzene. **EPA 8330A:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT. **EPA 8270C:** Methyl naphthalene, Dimethyl naphthalene, Total Methylnapthalenes, Total Dimethylnaphthalenes. **EPA 625:** 4-Chloroaniline. **EPA 350.1** for Ammonia in a Soil matrix.
