Greg, George and Marc.

Here is a revision based on Greg's and George's comments. Marc is getting on a plane coming back from the West Coast and will respond later today. Greg-I did have my name just under Marc's but it must have been lost in the Co-meeting Chair line so I put a separation on it.

Bill:

Great letter. I have a couple of MINOR suggestions that are NOT essential, rather suggestions.

...To think we were able to pull together the logistics and build a top flight program in a few months is a significant credit to each of you.

We have built it, they are coming. Currrently, more than 220 participants have registered. The rest is up to the presenters to close the deal. Again, thank you for your hard work! Each of you can be very proud ...

Feel free to distribute as needed, regardless of updating. Thank you for spearheading this effort.

George

Take a look at the short note to the Steering Committee and Staff to see if you are ok with Greg sent it out to the appropriate list server.

Thanks,

Bill
