Subject: Free public money?

Dear Mr. Pruitt;

Greetings from a retired educator in Edmonton, Alberta, Canada and congratulations on your recent appointment to head the EPA.

Are free government funds still available for environmental activism because I want more money and I can emit as much hot air as the best of them?

Here is an example:

For many years sensible people have been denying the "INCONVENIENT TRUTH" of "GLOBAL WARMING" and/or "CLIMATE CHANGE", so consider the following,

The DANGERS of "CARBON DIOXIDE POLLUTION" and the "GLOBAL WARMING" and/or "CLIMATE CHANGE" it creates are REAL and the SKY really is FALLING! This is a scientifical CERTAINTY and I shall explain why.

The evil, spineless, BASTARD GAS, Carbon Dioxide, is too weak to hold up the sky. CO_2 has risen to 400 (almost 50 more than 350) and there isn't enough of the pure Regal Gasses N_2 and O_2 left now to hold the sky in place, so it falls.

This is a MAJOR CRISIS because the sky is all that prevents the vacuum of space from SUCKING OUT our brains and turning everyone into FLESH-EATING ZOMBIES. [Increasing zombiism is so well documented and understood that quoting sources is not necessary.]

This CRISIS can be averted, however, but only through MASSIVE EMERGENCY TAXATION and SPENDING. Giving enough money to environmentalists and other funding whores will ENABLE them to generate enough hot air to hold the sky up where it belongs. [We will only remain safe as long as the massive funding continues.]

It is time to jerk knee and jump on the global warming / climate change bandwagon!

Motherhood, apple pie, and the entire planet are at stake. Children too.

Please send lots of money to help me keep the sky up where it belongs.

Thank you for your time.

Sincerely yours,

Murray Balascak
