Todd, Exemption 6: PII

As I said on the phone a few minutes ago, we will bring a copy of the attached agreement with us when we meet next week. I will call you on your mobile phone as requested, [redacted] to arrange a specific time for our meeting on either Tuesday April 4 or Wednesday April 5. During our meeting myself and another EPA employee, Mike Martin, will take an approximated inventory of what is stored on the 3rd floor of your building by Mr. Rochester. We will also use a piece of equipment called an XRF unit to take some lead readings of the glass at this site. The XRF is non-intrusive, meaning that we will not need to remove anything or damage anything to take the readings.

We will also collect at least one sample of glass from one of the boxes stored at this location.

As I also told you, I will be attempting to make arrangements with Mr. Rochester later this week for sampling at your building and some other properties. Mr. Rochester may choose to accompany us to your site.

If you have any questions or concerns, please call me or e-mail as listed below.
