FROM: Mary Schroeder

☒ Information only

SUBJECT: 0312370 1 Cook Co. Palos Hgts/MSD

☐ Response requested

ILD 980677587

The Metropolitan Sanitary District of Greater Chicago operated a sludge disposal project at this location during 1979 and 1980. Approximately 15,000 cubic yards of sludge was deposited during this time. During its operation the site was inspected by the State. The sludge was spread, compacted & seeded in early 1980. An inspection in 1981 disclosed that vegetation had been established & there was no evidence of leachate seeps or run-off problems. It is for this reason that no further action is recommended. ~~Thad~~
