Thanks.

David,

My number is 214-665-7364. Please let me know whether or not we may send our request via an email with electronic copy of permit documents and to whom. Thanks.

Hi Issac-

An EFH staff representative in the Southeast that you can start with is David Dale (cc'd) (David.Dale@noaa.gov) . He might then direct you to someone else in the Southeast but he is a place to start.

Janine

Hi Issac,

I'm not familiar with the EFH folks down in our southeast region, however Janine and Terra are part of the EFH team here in HQ.

Janine/Terra, can you help Issac?

Thanks,

Kellie

Kellie,

EPA and LDEQ will jointly issue a permit which authorizes LOOP to discharge to inland water, LA territorial sea and the GOM. EPA is responsible for once-thru-cooling water and deck drainage discharges to the GOM. EPA determines that the permitting action will not adversely affect essential fish habitat in the GOM and will send a letter to NFMS/NOAA to seek concurrence from NFMS. Do you have the regional NFMS contact on this concurrence matter? Thanks.
