Subject: RE: Draft FY18 Priority Permit Candidate List - for Louisiana

Sorry, there was one more Deborah had a question about. For LA0032328, she wanted additional information on what the issue was with wetland assimilation and what is being done to resolve the issue/when it might potentially be resolved. If a study or something needs to be completed before reissuing the permit, she may be okay with removing it, but just wants to understand more what the issue is.

Thanks,

Jackie

Hi Kay,

Deborah agreed with removing LA0041394 and LA0042188, but had questions about the other requests.

For the LOOP permit with WET implementation issues, Deborah thought from a conversation she'd had on this previously that the issue would be fairly easily resolved within the next year. Is

there anything you want me to share with her about why it won't be completed in FY18?

For LA0111091 and LA0124800, are these permits that can be terminated or are they closed by still need permit coverage for lingering discharge? If they can be terminated, she'd like to leave them on the list, but if not she is okay with taking them off. Let me know.

Thanks,

Jackie

Hi Jackie,

Here's a "sneak preview" of my input for Louisiana. Syed is gathering up all the R6 input.

Thanks

K

Subject: RE: Draft FY18 Priority Permit Candidate List - for Louisiana

Hi Syed,

LDEQ provided the following input regarding the preliminary FY18 candidate list:

In regards to consideration for removal, LDEQ has identified the following 6 permits:

LA0041394	City of Shreveport- Lucas WWTP	Proposed removal due to blending issues – federal litigation
LA0042188	City of Shreveport- North Regional WWTP	Proposed removal due to blending issues – federal litigation
LA0049492	LOOP LLC- Deepwater Port Complex	Proposed removal – ongoing negotiations with WET implementation
LA0111091	HARRELSON MATERIALS MANAGEMENT INC.	Proposed removal – facility is in post closure
LA0124800	TIDEWATER LANDFILL LLC	Proposed removal – permit complexities associated with post closure
LA0032328	City of Hammond- South Slough Wetland Wastewater Assimilation Project	Proposed removal - permit complexities associated with wetland assimilation

It should be noted that LA0049492, LOOP, is currently a jointly issued permit by LDEQ & EPA R6. The facility has outfalls which discharge into state waters (LDEQ authority) and federal waters (EPA authority).

Also, LDEQ anticipates that several of the other preliminary FY18 candidates will be issued by Sept 30, 2017. It is our understanding that those will "automatically" be removed from the list by HQs.

Thanks

K

Subject: Draft FY18 Priority Permit Candidate List

Hi All,

I have attached the draft FY18 Priority Permit Candidate list. I pulled data from ICIS-NPDES this morning to create the list. **By August 25th**, please work with your states and let me know if you see any errors or have any requests for candidate removals for permits with unique circumstances preventing their reissuance or termination during the fiscal year. The revised list will then be loaded into PMOS to begin the selection and commitment process.

Like previous years, we will be looking for a selection of 20% of the candidates and a commitment of 80% of the selected permits

If you would like, you may also begin making priority permit selections by highlighting permits in the attached file and adding a reason for selection for each from the list below:

a. National program priority (CAFO)

b. Significant changes to facility's operations

c. National program priority (CSO)

d. Discharge to drinking water resources

e. Revised effluent limitations guidelines

f. Protection of an endangered species

g. Environmental justice

h. Facility located on priority watershed

i. Permit is more than 10 years expired

k. Discharge to an impaired water body (i.e., water body on 303(d) list)

l. Implementation of a WLA from a TMDL

m. Revised water quality standards

o. Other. If "Other" is selected, an explanation/description must also be provided.

Please feel free to call or email me if you have any questions.

Thanks,

Jackie
