Subject: RE: ACTION Items Due on 3/28 for the week of 4/3-7/2017

1) Louisiana Offshore Oil Port (LOOP), LLC, Deepwater Port Complex, (joint venture of Marathon Pipe Line LLC, Valero Terminaling and Distribution Company, and Shell Oil Company) (LPDES Permit No. LA0049492, AI No. 4634), The existing wastewater permit which was jointly issued by EPA & LDEQ expired September 30, 2013. EPA and LDEQ are continuing to work together on the proposed reissuance of the permit regarding appropriate permit requirements for brine discharges. This situation is similar to the Strategic Petroleum Reserves (SPR) under the U.S. Department of Energy, (Big Hill Oil Storage, TX0092827, and Bryan Mound Oil Storage, TX0074012) which EPA reissued in Nov. 2014. Next steps will likely include conference calls between EPA, LDEQ and LOOP. The joint LDEQ/EPA permit will be reissued ASAP.

2) City of Baton Rouge/Parish of East Baton Rouge Parish Municipal Separate Storm Sewer System (MS4), (LPDES Permit No. LAS000101, AI No.90427), owned or operated by Louisiana Department of Transportation and Development (District 61) (AI No. 113707), City of Central (AI No. 165591), Louisiana State University (LSU) (AI No. 113708), Southern University (SU) (AI No. 113710). R6 is currently reviewing this preliminary permit and will issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit. The regulatory due date was March 17, 2017 and an extension was granted agreed to through March 31, 2017. R6 has identified concerns with the draft permit and there is ongoing enforcement action with this permittee. A phone call is planned to discuss with LDEQ staff on 3/30/17 and another extension is likely to work informally to resolve the issues.

3) Lion Copolymer Geismar, LLC, Geismar Facility, (LPDES Permit No. LA0000752, AI No. 1433) R6 is currently reviewing this preliminary permit and plans to issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of April 5, 2017. This facility is part of a group of facilities which informally a pipeline and has been controversial in the past. EPA may issue an Interim Objection.

Subject: RE: ACTION Items Due on 3/21 for the week of 3/27-31/2017

See BLUE highlights below to decide if you want to carry forward Baton Rouge MS4.

Plus, I finally received the revised Cal-Maine package from LDEQ late yesterday, but have not had a chance to look at it at all yet.

New ones:

1) Entergy Operations, Inc., Waterford 3 Steam Electric Station, LPDES Permit No LA0007374, (AI No. 35260) R6 is currently reviewing this preliminary permit and plans to issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 27, 2017. The letter will likely include comments which are not expected to be controversial.

2) Chemical Waste Management, Inc. - Lake Charles Facility, LPDES Permit No. LA0054828, (AI No. 742) R6 is currently reviewing this preliminary permit modification and plans to issue a response letter to LDEQ regarding the proposed modification of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 27, 2017. The letter will likely include comments which are not expected to be controversial.

Thanks

K

Subject: RE: ACTION Items Due on 3/14 for the week of 3/20-24/2017

Hi Brent/Angela,

Regarding the facilities listed below for last week, if you are tired of dragging **LOOP, **INVISTA**, **Cal-Maine** along each week, I really doubt that anything will actually be issued during the week of 3/20-24.

I will plan to re-list them in the future as things unfold…..

**

Here's an update for Baton Rouge MS4 & "new" listings for the week of 3/20-24/2017:

1) City of Baton Rouge/Parish of East Baton Rouge Parish Municipal Separate Storm Sewer System (MS4), (LPDES Permit No. LAS000101, AI No.90427), owned or operated by Louisiana Department of Transportation and Development (District 61) (AI No. 113707), City of Central (AI No. 165591), Louisiana State University (LSU) (AI No. 113708), Southern University (SU) (AI No. 113710).

R6 is currently reviewing this preliminary permit and will issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 17, 2017 or soon after, if there is an extension agreement. R6 has identified concerns with the draft permit and there is ongoing enforcement action with this permittee. Two Week Extension Granted by LDEQ. Phone call planned to discuss with LDEQ staff on 3/23/17.

2) WestRock CP,LLC, Hodge Mill (LPDES Permit No. LA0007684, AI No. 3647), R6 reviewed the proposed Louisiana Pollutant Discharge Elimination System (LPDES) permit modification and EPA will issue a response letter to LDEQ which contains recommendations which will clarify the permit and fact sheet language for this paper mill. EPA's regulatory due date is March 20, 2017. ISSUED

3) Entergy Louisiana, LLC -Waterford 1 & 2 Electric Generating Plant, (LPDES Permit No. LA0007439, AI No. 83898), R6 is currently reviewing this preliminary permit and will issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 23, 2017. The letter will likely include comments which are not expected to be controversial.

Signed & Will be ISSUED 3/22

4) Bio-Lab, Inc., Lake Charles Facility, (LPDES Permit No. LA0125041, AI No. 26073), R6 is currently reviewing this preliminary permit and will issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 23, 2017. The letter will likely include recommendations for clarifications in the permit and fact sheet, or possibly an Interim Objection. This chemical manufacturer is located within another chemical manufacturer's complex. Discharges are to the Calcasieu River which is an impaired waterbody and has an approved Total Maximum Daily Load (TMDL) for Toxics. Expect to issue comment letter on 3/23

5) City of Natchitoches, Wastewater Treatment Plant, (LPDES Permit No. LA0095222, AI No. 38060), R6 is currently reviewing this preliminary permit and will issue a response letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 24, 2017. Letter will likely include comments which are not expected to be controversial. ISSUED

Subject: ACTION Items - for 3/8/17- 3/17/17

Brent,

The first three facilities were listed previously and I updated slightly. The 4th one is "new."

Thanks

K

1) Louisiana Offshore Oil Port (LOOP), LLC, Deepwater Port Complex, (joint venture of Marathon Pipe Line LLC, Valero Terminaling and Distribution Company, and Shell Oil Company) (LPDES Permit No. LA0049492, AI No. 4634), The existing wastewater permit which was jointly issued by EPA & LDEQ expired September 30, 2013. EPA and LDEQ are

continuing to work together on the proposed reissuance of the permit regarding appropriate permit requirements for brine discharges. This situation is similar to the Strategic Petroleum Reserves (SPR) under the U.S. Department of Energy, (Big Hill Oil Storage, TX0092827, and Bryan Mound Oil Storage, TX0074012) which EPA reissued in Nov. 2014. (Note: LDEQ included LOOP as an FY2017 "Priority Permit." If it cannot be issued in FY 2017, EPA R6 must get EPA HQs approval to "switch" to another Priority Permit Candidate which LDEQ can issue in FY2017 to meet our R6 commitment for End-of Year.) Next steps include an internal meeting on March 15, 2017, followed by a call with LDEQ later in March 2017. The joint LDEQ/EPA permit will be reissued ASAP.

2) INVISTA S.à.r.l., wholly-owned subsidiary of Koch Industries, (formerly duPont), Victoria County (TPDES Permit No. TX0006050, Texas State Permit No. WQ0000476000). EPA R6 issued an Interim Objection and Request for Additional Information to TCEQ on July 25, 2012. TCEQ finally responded in November 2016 with a revised proposed permit package and also provided corrected information in January 2017. EPA R6 is currently re-reviewing the old and new documentation and will issue *either*: 1) a Withdrawal of Interim Objection Letter, if the issues have been resolved, **or** 2) a Follow-up Letter (re: the original July 25, 2012 action), stating specifically what the remaining issues are and offering suggestions for resolution, if appropriate. Letter to be issued to TCEQ in late-March 2017.

3) Cal-Maine Foods, Inc., Cal-Maine Farms Pine Grove Complex (LPDES Permit No. LA0115894, AI No. 94326) An Interim Objection and Request for Additional Information was *drafted* for issuance on October 7, 2016; however, LDEQ requested that LDEQ and EPA continue to work informally to resolve EPA's concerns regarding this Concentrated Animal Feeding Operation (CAFO) of approximately 800,000 laying hens which produces poultry eggs. LDEQ anticipates sending a revised proposed permit package to EPA R6 in the near future. EPA anticipates that LDEQ has resolved the concerns and EPA R6 expects to issue a Letter with any final comments by late-March 2017.

4) City of Baton Rouge/Parish of East Baton Rouge Parish Municipal Separate Storm Sewer System (MS4), (LPDES Permit No. LAS000101, AI No.90427), owned or operated by Louisiana Department of Transportation and Development (District 61) (AI No. 113707), City of Central (AI No. 165591), Louisiana State University (LSU) (AI No. 113708), Southern University (SU) (AI No. 113710).

R6 is currently reviewing this preliminary permit and proposes to issue a letter to LDEQ regarding the proposed reissuance of the Louisiana Pollutant Discharge Elimination System (LPDES) permit by the regulatory due date of March 17, 2017. (EPA R6 also has ongoing enforcement action with this permittee.)
