U.S. EPA Region 6 Public Notice
Wilcox Oil Company Site
Citizens' Grant Available
February 2014

The U.S. Environmental Protection Agency (EPA) is announcing the availability of a Technical Assistance Grant (TAG) for the **Wilcox Oil Company Site**, located in Bristow, Creek County, Oklahoma.

This TAG is available to a local citizens' group to procure the services of a technical advisor to increase citizen understanding of information that will be developed about the site in the Superfund process.

By law, only one grant for up to $50,000 may be awarded to a citizens' group at any one Superfund site. To be eligible for a grant, a group must incorporate. Also, the applicant must meet a 20 percent matching requirement, which may be in cash or donated services.

Community groups near Superfund sites may be eligible for technical assistance. There are two kinds of technical assistance available to help communities understand technical documents: a Technical Assistance Grant (TAG); and a Technical Assistance Services for Communities (TASC) Contract.

If you are interested in applying for this grant, or for more information on funding availability or the possibility of being eligible for funding, please call:
