SOURCE OF SAMPLE: (Exact Location) X201.
Warner Brake & Electric water treatment lagoon. East side of east lagoon.

PHYSICAL OBSERVATIONS, REMARKS: Black sludge, clay soil and algae from lagoon bottom. Oily/septic odor.

TESTS REQUESTED: Scan for solvents, oils, & PCB's. Concentrate on volatiles, i.e. trichloroethylene, etc.

COLLECTED BY: K. Bardo TRANSPORTED BY: K. Bardo → IDPH

LABORATORY

RECEIVED BY: [illegible] DATE COMPLETED: 5/17/83 DATE FORWARDED: 5/17/83
J. Hurley

PCBs < 5. ug/g
Aliphatic hydrocarbons = 2400. ug/g (ppm)
Miscellaneous compounds detected but close to detection limits. They were too low for identification.
The above was determined from an extract of the sample.
The headspace over the sample was also analyzed and acetone & dichloroethylene were detected but not quantitated.

Reference #9 DRAFT

MAR 4 1985

Table I is the listing of EPA Hazard Ranking System (HRS) Waste Characteristics Values (Toxicity/Persistence matrix) used by the NPL quality assurance team. These rating factor values are based on the criteria specified in the HRS (toxicity rating assigned to each substance in Sax, Dangerous Properties of Industrial Chemicals, 4th, 5th and 6th editions). The listing shows the matrix values for ground water and surface water and the toxicity value for air. The values shown are "post multiplier" for use on the HRS worksheets. Changes to this list are made, albeit infrequently, as a result of response to public comment and changes in the reference material. Questions should be directed to the NPL quality assurance team via Mr. Steve Caldwell, EPA Headquarters, (202) 475-8103.

MAR 12 1985

IEPA-DLPC

March 11, 1985

Mr. John D. Student
Facilities Compliance Unit
Compliance Monitoring Section
Illinois Environmental Protection Agency
Division of Land Pollution Control
2200 Churchill Road
Springfield, IL. 62706

Dear Mr. Student:

Enclosed are the 1st quarter Water Analysis forms which have been completed by the consulting engineering firm that provided the actual samples.

As per your approval on November 15, 1985 the name of the lab supervisor is printed-in and the Chain of Custody was substituted for that required signature.

Thank you for your cooperation.

Very Truly Yours,

Jack Ridlon
Manager Manufacturing Services

Dear Ms. Springer;

Enclosed are the laboratory results from the floor of the previous lagoons, as requested by Heidi Hanson in her letter of January 25, 1984 to Mr. Joe Ross. Also enclosed is a copy of the sketch identifying the locations of the samples.

If you require any further information, please contact me.

Very truly yours,

Gene D. Fox

Attention: Mr. Robert A. Wengrow
Rockford Region Manager

Dear Mr. Wengrow:

During our meeting on Monday, November 14, in Chicago, you requested written copies of the lab results from the split sample we took on September 7 from Warner monitoring wells. I indicated that I would provide the reports and you indicated that you would send your written reports when you received them.

This information is being furnished as part of settlement negotiations and is made available to you only for your agency's use and not for dissemination to other parties.

If you have any questions, please call me.

Very truly yours,

Gene D. Fox

Attention: Mr. Robert A. Wengrow
Rockford Region Manager

Dear Mr. Wengrow:

We have submitted analysis reports to the Illinois Attorney General's office as part of settlement negotiations; you have been copied on the cover letter.

We are submitting the same data to your agency on the same basis, namely that it is part of settlement negotiations and is for your use only and not for dissemination outside your agency. If this is unacceptable to you, please contact Thomas Dent or Michael Dolan at Seyfarth, Shaw, Fairweather & Geraldson (312/346-8000). If we do not hear from you within forty-eight (48) hours of receipt of this document, we shall assume the use has been so restricted.

Follows data, some of which has been deemed to be of little value due to technical procedures, from our monitoring wells.

Very truly yours,

Gene D. Fox

Office of Attorney General
Environmental Control Division
188 West Randolph Street
Suite 2315
Chicago, IL 60601

Attention: Mr. Thomas Borecki
Engineer

Dear Mr. Borecki:

We are submitting analysis results as part of our settlement negotiations with you. These results are for your use only and are not for dissemination outside your agency. If this is unacceptable to you, please contact Thomas Dent or Michael Dolan at Seyfarth, Shaw, Fairweather & Geraldson (312/346-8000). If we do not hear from you within forty-eight (48) hours of receipt of this document, we shall assume the use has been so restricted.

Follows data, some of which has been deemed to be of little value due to technical procedures, from our monitoring wells.

Very truly yours,

Gene D. Fox

Warner Brake Closure - 2 impoundments

264.112 a(1) done 2-84

264.112a(1)(2) 16,139 tons total sludge + bulking agent
1.5 cy/t = 10,759 cy

a(3) decontamination of equipment
~~at~~ washdown pad, high pressure water sprayer.
Washwater flowed by gravity to Warner's treatment plant

(a)(4) schedule for final closure ok
(b) - modification of facility
264.114 - decontamination - per plan
264.115 Certification of closure provided

Do we want the closed pond to be used for stormwater retention? OK

Do we want the polishing pond to be filled to grade @ 0%? OK

Warner Brake Closure Plan

East Lagoon to be used for stormwater retention? use it
(see diagram) - what is common backfill? (sand?)
call - info rec'd 3-6-84

Polishing pond - 2-3% grade to promote drainage? ~~2-3%~~
Fill to flat grade
per HAC 3-5-84

Where will tank rinsate water go?
Test soil under tank - ~~monitor?~~ NO
ok

Agency will install mon wells N & E or W

Warner will mon. downgradient
" " mon. pws interconnection?
→ Roger Selberg at PWS

A-G does not want to sue -
'covenant not to sue' - is not enforceable
AG - faster
not much at risk
WB - out of public eye
- not reported on annual report.

R. Wengrow – Phone call 2-7-84 to SAS

Appears that samples are missing

Show 2 samples

4-5 samples per hole

December 16, 1985

Mr. John Student
Facilities Compliance Unit
Compliance Monitoring Section
Illinois Environmental Protection Agency
Division of Land Pollution Control
2200 Churchill Road
Springfield, IL 62706

Dear Mr. Student,

Enclosed are the 4th Quarter Water Analysis forms which have been completed by the consulting engineering firm that provided the actual samples.

After the testing for the 3rd Quarter inadvertently number MW-10S Well was not secured and locked. A small animal crawled into the casing and died, therefore, Olsen Well Company was called and the well was purged. Sampling of the well will be continued the first quarter of 1986.

Cordially,

Jack Ridlon

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY MEMORANDUM

DATE: February 28, 1986

TO: Rama Chaturvedi/Permit Section

FROM: David S. Retzlaff & Robert A. Wengrow

SUBJECT: FACILITY MANAGEMENT PLAN APPENDIX
Question 3-7 and Summary
2010400010 - Winnebago County
Roscoe/Warner Electric Brake & Clutch Company
ILD006114169

Warner Electric Brake & Clutch Company is involved in the manufacture of motion control devices for various industries. The facility is located at the southeast corner of Highway 251 and McCurry Road in Roscoe, Illinois.

There is only one complaint on file. This complaint contained a number of complaints alleging various waste mismanagement practices (see Attachment A).

There have been a number of inspections and site observations since the beginning of 1983. A large number of the site visits involved observation of lagoon closure.

There were two waste treatment lagoons on site. The first mention in our files was a memo from DWPC (Charles Corley) dated 12/2/81. The first DLPC inspection identifying the two lagoons is dated 3/15/83. This was a Subpart F inspection by Ken Bardo. These lagoons underwent clean closure in the fall of 1983.

There was one observation of discolored soil during an August 1, 1983 complaint investigation.

There have been underground tanks used at the facility. However, they have apparently been taken out of service. There is no indication that they have been removed.

3. Description of Any Complaints from Public:

Source of Complaint	Date	Resolution	Subject and Response
Tyrone Meyer	6/20/83	R.Wengrow	See Attachment A

4. Description of All Inspection Reports for Facility:

Date of Inspection	Inspector (Local, State, Federal)	Conclusions or Comments
See attached		

5. During inspection of this facility did the inspector note any evidence of past disposal practices not currently regulated under RCRA such as piles of waste or rubbish, injection wells, ponds or surface impoundments that might contain waste or active or inactive landfills?

X Yes - give date if inspection and describe observation

There were two lagoons on-site first identified in a 12/2/81 memo from Charles Corley of DWPC. The first record of these lagoons in DLPC files is in a 3/15/83 Subpart F inspection by Ken Bardo. These lagoons were part of the waste treatment system. They were closed in November 1983. All contaminated soils were removed.

____ No ____ Don't Know

RECEIVED
MAR 0 5 1986
IEPA-DLPC

6. Do inspection reports indicate observations of discolored soils or dead vegetation that might be caused by a spill, discharge or disposal of hazardous wastes or constituents?

__X__ Yes - indicate date of report and describe observations
Complaint investigation of 8/1/83 indicated stained surface soil in an old drum storage area. There was a black gummy layer about 3 inches below the surface.

_____ No

_____ Don't know

7. Do inspection reports indicate the presence of any tanks at the facility which are located below grade and could possibly leak without being noticed by visual observation?

__X__ Yes - date of inspection and describe information in report
1. Meeting held 6/6/83 in Rockford stated that underground solvent storage tank was tested for leaks. None were detected. It was taken out of service and filled with sand
2. Inspection of 6/5/85 mentions underground gasoline storage tank. Out of service.

_____ No

_____ Don't know

8. Does a groundwater monitoring system exist at the facility? _____

9. If answer to question 8 is yes, is the groundwater system capable of monitoring both regulated RCRA units and other Solid Waste Management Units? _____

Explain - _____

10. Is the groundwater monitoring system in compliance with applicable RCRA groundwater monitoring standards? _____

If no, explain deficiency _____

Attachment A to Question #3 of FMP Appendix.

MEMORANDUM

DATE: August 1, 1983

TO: File

FROM: Pamela D. Lo Pinto

SUBJECT: Winnebago County - LPC 2010400 - Roscoe/Warner Electric Brake
Complaint No. C-83-44-R

This complaint investigation was delayed from 7-14-83 to 8-1-83 so that attorney Tom Dent could be present. Dent, Fox, Hanson and I reviewed each complaint item in Fox's office and then visited the location of each complaint item. The following describes our discussions and my observations regarding the ten complaint items:

1. "Coolant pit leak into ground from overfill also south wall behind grinder"
The grinder has a Henry Separator which removes metal fines from coolant. The coolant reservoir is a below ground tank in a concrete pit. It is possible that the tank overflowed at times and when this occurred coolant would have been captured in the concrete pit. There are no drains in the pit. If the tank and pit overflowed the coolant would travel to floor drains. No solvents were or are used in this southeasterly portion of the facility. The wall behind the Separator is curbed to prevent leakage to outside.

2. "Sonic cleaner was cleaned out by draining into pit of Lindburg now removed and covered up"
The sonic cleaner is a mobile unit containing water and high frequency vibrating and heating elements. The Lindburg was a heat treat furnace. A melt furnace has been used since the '70's. The Lindburg had a capture pit for noncontact cooling water. The pit contents drained to the treatment plant. When the Lindburg was removed the pit was filled with concrete. It is not known if sonic cleaner was dumped into the pit but apparently there would be no cause for concern if it had been.

3. "Tank farm leak on dock was not corrected when reported"
The tank farm consists of four bulk tanks sitting in dirt under storage dock. Two are empty, one contains oil and one contains trichlove. Each tank has bent, meter and dip pipe. Warner officials were not aware of any leaks in this area. Spillage during loading or unloading would have been cleaned up. New metering devices were installed in 1977. From west to east the tanks are:empty, trichlor, oil, empty.

4. "Pump on south wall leak and drain into ground from cracks along wall"
Four pumps are clearly visible along southwall, indoors. The pumps are on a concrete floor and curbing against wall is provided. Overhead plumbing to tank farm was observed. Looking at the pumps (facing south) from left to right the pumps are for tanks which are: Empty, trichlor, oil, empty. The oil pump was leaking slightly during the inspection. Officials said it is

RECEIVED
MAR 0 5 1986
IEPA-DLPC

possible that leaks occured in the past and that leaks would have been small in quantity and promptly cleaned up. The wall outside was inspected and observed to be crumbling. An approximate 6" x 6' area of oily material was observed. Officials were unsure whether material had leaked through the wall or if spillage on the outside dock had occured and accumulated here. It was agreed that the area would be cleaned up and inspected periodically to see if oily material returned.

5. "Drains were installed for special oil storage but others were used as much or more"
A pit with drain, for coolant capture, was observed in the southeast portion of the plant north of and not related to Henry Seperator. No solvents are used in this area. The pit is used to capture spilled oil for reuse. If other drains were used oil would be lost to treatment system.

6. "Coolant pumped from machines into chip tubs then dumped on dock so that coolant would drain from chips - run off to storm drain"
It is common practice for coolant to drain from tubs onto concrete south of dock. Coolant drains to treatment plant - not storm drain. There should be no solvents in the coolant oil.

7. "Equipment washed on ground"
It is common practice to wash items outside of the maintenance area if they are too large to fit in steam cleaner, eg. lift truck, bull gear, semis. Soap and pressure wash or steam are used. Indoors, portable pressure wash/steam unit was observed as well as stationary steam cleaner.

8. "Vapor Degreaser - leak ran into drain"
The steam pump on the degreaser leaks at times but the solvent pump does not. Fox has seen water leaking from steam pump. If solvent pump had leaked it would have been repaired immediately. A leaky pump would be the only item capable of causing a leak of degreasing solvent.

9. "Paint cleaner dumped for wash tanks"
In northern portion of plant the one wash tank was observed - 90' long. Outside, south of dock, we observed the location where, in the past, a stripper tank was stored and used. It contained 50% methylene chloride. A forklift dropped racks of parts into the stripper tank. This process has not been used in three years. Hanson said no dumping of this material had occured, to his knowledge, in the fourteen years he has worked for Warner. If tank was dumped near dock the contents would fall on concrete and drain to treatment system. Mr. Meyer's connection between the wash tank and paint cleaner is not clear.

10. "Wash tank drained into floor drain"
It is common practice to allow the alkaline soap/tramp oil solution to drain from the wash tank to the treatment system. The wash tank is used as an alternative to degreasing. The area near the wash tank is the area that was being cleaned prior to and after my visit of 7-14-83. Floors, pits, and paint booth were steam cleaned and oil dry cleaned up.

Two soil samples were taken in the previous drum storage area in the presence of Gene Fox. #101 was surface soil with oil staining (Photo ~~16~~). #102 was taking of an -1/4" black gummy layer ~ 3" below the surface (Photo 16). Hanson said none of the drums stored here had leaked and that no rinsate was dumped on the ground during clean up. 15 PL

An ISS inspection started on 7-14-83, was completed during this site visit. Copies of Meyer's complaint and Public Health sample results were made by Tom Dent. Sketch attached.

Description of Stored Products

The following hazardous chemicals are stored at the Roscoe Manufacturing Plant at locations noted on two drawings. Quantities are approximate.

Dwg.	Code	Description	Location
A- 1	2- 9,000 gal.	underground tanks for No. 2 fuel oil	Maintenance Addition
A- 2	1- 250 gal.	above ground tank for diesel fuel	Diesel Fire Pump House
A- 3	1- 250 gal.	above ground tank for gasoline	Outdoors (Back Dock Area)
A- 4	2- 1,000 gal.	above ground tanks for propane	Outdoors (Back Dock Area)
B-5	2- 2,500 gal.	above ground tanks for Ferric Chloride	Treatment Plant
B- 5	1- 500 gal.	above ground tank for propane	Treatment Plant
A- 6	1-10,000 gal.	above ground tank for waste oil & coolant	Containment Area (Back Dock Area)
A- 7	1- 4,888 gal.	above ground tank for 1,1,1 Trichloroethane	Containment Area (Back Dock Area)
A- 8	30- 33 lb.	Portable Tanks for propane	Lift Truck Fuel
A- 9	6- 500 gal.	Portable Jumbo Drums for Hydraulic Oil	Outdoors (Back Dock Area)
A-10	3- 500 gal.	Portable Jumbo Drums for Coolant (Concentrate)	Flammable Storage Bld.
A-10	10- 244 cu. ft.	Portable Tank of acetylene	Flammable Storage Bld.
A-10	10- 244 cu. ft.	Portable Tank of Argon 75%-Oxygen 25%	Flammable Storage Bld.
A-10	10- 244 cu. ft.	Portable Tank of Argon 98%-Oxygen 2%	Flammable Storage Bld.
A-10	3- 50 lb.	Portable Tank of CO	Flammable Storage Bld.
A-10	20- 244 cu. ft.	Portable Tank of Nitrogen	Flammable Storage Bld.
A-10	10- 244 cu. ft.	Portable Tank of Oxygen	Flammable Storage Bld.
A-12	4- 325 gal.	Tanks Vapor Degrease	Dept.611,612,616
A-12	4- 185 gal.	Tanks Vapor Degreaser Still	Dept.611,612,616
A-13	1- 30 gal.	Tank Vapor Degreaser	Dept. 623
A-13	1- 15 gal.	Tank Vapor Degreaser Still	Dept. 623
A-10	30- 55 gal.	Drums of Oils & Coolants	Flammable Storage Bld.
A-10	25- 55 gal.	Drums of Adhesives and Epoxies	Flammable Storage Bld.
A-10	30- 55 gal.	Drums of Paints and Thinners	Flammable Storage Bld.
A-10	20- 55 gal.	Drums of Chlorinate Solvents	Flammable Storage Bld.
A-10	5- 55 gal.	Drums of Non-Chlorinated Solvents and Cleaners	Flammable Storage Bld.
A-10	30- 55 gal.	Drums of Acids and Alkalines	Flammable Storage Bld.
A-10	50- 5 gal.	Cans of Paints and Thinners	Flammable Storage Bld.
A-10	100- 1 gal.	Cans of Paints and Thinners	Flammable Storage Bld.

COUNTY:	FILE HEADING:	FILE NUMBER:
Winnebago	Roscoe/Hononegah Estates	LPC General

SOURCE OF SAMPLE: (Exact Location) G204. John Deere - Bergens Outdoorsmen building. Faucet on north wall.

PHYSICAL OBSERVATIONS, REMARKS: Clear, no odor.

TESTS REQUESTED: Scan for volatile synthetic organic chemicals! Nearby drinking water contained (in decreasing concentration): trichloroethylene; t-1,2-dichloroethene; 1,1,1-trichloroethane; 1,1-dichloroethylene; tetrachloroethane; and 1,2-dichloropropane

COLLECTED BY: K. Bardo

TRANSPORTED BY: K. Bardo → IDPH

SOURCE OF SAMPLE: (Exact Location) X201.

Warner Brake & Electric water treatment lagoon. East side of east lagoon.

PHYSICAL OBSERVATIONS, REMARKS: Black sludge, clay soil and algae from lagoon bottom. Oily/septic odor.

TESTS REQUESTED: Scan for solvents, oils, + PCB's. Concentrate on volatiles, i.e, trichloroethylene, etc.

COLLECTED BY: K. Bardo TRANSPORTED BY: K. Bardo → DPH

LABORATORY

RECEIVED BY: JC DATE COMPLETED: 5/17/83 DATE FORWARDED: 5/17/83

J Hurley

PCBs < 5 ug/g

Aliphatic hydrocarbons = 2400 ug/g (PPM)

Miscellaneous compounds detected but close to detection limits. They were too low for identification.

The above was determined from an extract of the sample. The headspace over the sample was also analyzed and acetone & dichloroethylene were detected but not quantitated.
