Subject: Split sampling with McKesson for Arkwood Site
Date: 05/18/2011 02:07 PM

Kent: Please contact Jean Mescher , Director of Environmental Services for McKesson, for split sampling at the next event. Jean will put USGS through to the on-site contractor who does the treatment of the new Cricket Spring. Please contact Jean Mescher at jean.mescher@mckesson.com and telephone at 608-848-4134 in Wisconsin.
I believe the professional in-charge of O&M at Arkwood is Mr. James Fleer of Oxford Environmental & Safety.
USGS will get the contact, the authorization for split sampling, and lab parameters for testing from Jean Mescher
