---

Mr. Eaton,

Sorry for the delayed response but I have been out of the office for the past week. Although my department has nothing to do with waste removal and/or disposal I believe the information you have provided may be of use to the U.S. Environmental Protection Agency (EPA). I will be forwarding your information to the remedial project manager for the San Jacinto Waste Pits site who's contact information is below.

Gary Miller
EPA Remedial Project Manager

Subject: San Jacinto TCDD

Dear Ms. Walker,

I just read the article concerning the dioxin contamination at the San Jacinto Waste Pit site (http://www.yourhoustonnews.com/spring/news/harris-county-s-billion-dollar-san-jacinto-river-dioxin-lawsuit/article_d8e354f2-377b-11e3-82eb-001a4bcf887a.html).
I'm not sure if you've ever considered incineration for the higher level PCDD's, but our facility is licensed to accept any level of dioxin regardless of RCRA waste code...including F-listed dioxins.
A facility in Quebec Canada may seem like the other end of the world...but with the advances in rail transportation we are able to transport and incinerate soils all across North America very cost effectively.
If you have dioxin impacted material at the site which may not be suitable to be placed under a cap...I would greatly appreciate the opportunity to provide your remedial contractor with a quotation for such services.
Could you get back to me on this when you have a moment?

Kind regards.
Bill Eaton
