	Description	Page No.
	Present Air Quality Components	4-26
	Meteorological Condition Affecting Atmospheric Mixing	4-30
	Present and Projected Future Emission Levels	4-36
	Projected Air Quality	4-36
	WATER FACILITIES	5-1
	Existing Water Supply	5-1
	Projected Water Supply	5-3
CHAPTER 6	WASTE LOAD PROJECTIONS	6-1
	Previous Work	6-1
	Existing Flow and Quality Data	6-1
	Projected Characteristics	6-1
CHAPTER 7	EXISTING WASTEWATER FACILITIES	7-1
	General	7-1
	Treatment Plant Design Data	7-1
	Montara Wastewater Treatment Plant	7-1
	Half Moon Bay Wastewater Treatment Plant	7-4
	Granada Wastewater Treatment Plant	7-4
	Operation and Performance	7-9
	Montara Plant	7-9
	Half Moon Bay Plant	7-9
	Granada Treatment Plant	7-9
CHAPTER 8	WATER QUALITY AND TREATMENT REQUIREMENTS	8-1
	Water Quality Control in California	8-1
	Review of Water Quality	8-2
	Coastal Waters	8-2
	Groundwater Quality	8-5
	Water Quality Objectives	8-5
	Ocean Disposal	8-5
	Land Disposal	8-7
	Irrigation	8-8
	Disposal of Infiltration & Percolation	8-8
CHAPTER 9	WASTEWATER RECLAMATION	9-1
	Precedent Uses	9-1
	General Potential Local Uses	9-2
	Landscape Irrigation	9-3
	Agriculture Irrigation	9-4
	Recreational Lake	9-4
	Municipal Reuse	9-4

	Description	Page No.
	Subsurface Disposal/Groundwater Recharge	9-5
	Specific Potential Uses	9-7
	Treatment Requirements for Reuse	9-8
	Potential Short Term Market for Reclaimed Wastewater	9-9
CHAPTER 10	PROJECT ALTERNATIVE ANALYSIS	9-9
	Planning Considerations	10-1
	Development of Alternatives	10-1
	Evaluation of Alternatives	10-4
	Plan A - Local Treatment with Combined Effluent Disposal to Half Moon Bay (or South Bay)	10-6
	Plan B - Partial Consolidation With Effluent Disposal to North Montara and Half Moon Bay (or South Bay)	10-9
	Plan C - Local Treatment with Effluent Disposal to North Montara and Half Moon Bay	10-9
	Plan D - Partial Consolidation With Effluent Disposal to North Montara and Half Moon Bay	10-12
	Plan E - Local Treatment with Effluent to North Montara and Half Moon Bay (or South Bay)	10-12
	Plan F - Consolidation to Regional Treatment and Disposal Facilities	10-12
	Plan G - Local Treatment with Effluent Disposal To North Montara and Half Moon Bay	12-16
	Design Features and Criteria	10-16
	Treatment Plants	10-16
	Cost Effectiveness Analysis	10-19
	Economic Impacts	10-19
	Detailed Evaluation of Most Viable Alternatives	10-24
	Environmental Impact Analysis	10-33
	Construction	10-34
	Waste Treatment	10-35
	Growth Inducing Impact	10-35
	Ocean Discharge	10-35
	Social Impact Analysis	10-36
	Analysis of Additional Considerations	10-38
	Scarce Resources	10-39
	Flexibility and Reliability	10-39
	Ability to Implement	10-40
	Compatibility With Local Planning Goals and Objectives	10-40
	Bypass Analysis	10-40
	Flood Protection	10-40
	Public Acceptance	10-41
	Summary of Alternatives Analysis	10-41
		10-42
