Subject: Wilcox Refinery draft fact sheet

As follow up from yesterday call with ODEQ, it was discussed that an EPA/ODEQ fact sheet maybe appropriate.

With the recent concern from the Church pastor living onsite and the recently discovered seep in the creek (ODEQ & USFW). The pastor and the residents living onsite may ask what is this about, what are we doing and what they should do.

I put together a draft outline of what could be a fact sheet to summarize what is Superfund; what has been done; what are we doing; what would happen next; and space for EPA/ODEQ to present some general recommendations to those residents (ODEQ and their Health Department will have to help us there, these are just some ideas).

But before sharing this with ODEQ, I want to ask you if you have any other ideas or suggestions. What do you think?
