Subject: San Jacinto Modeling Work Shop #2

Gary – As we have discussed, we will be ready to provide the second fate and transport modeling work shop for the San Jacinto Waste Pits Superfund Site on November 3rd. The content of the work shop will focus on our preliminary calibration results for the hydrodynamic, sediment transport, and chemical fate and transport models. Because of ongoing project demands, we would prefer to conduct this work shop in a Web-x format to minimize travel times for everyone.

Please confirm that this date and format will meet EPA's and the other agencies' needs.

Thanks,
David
