Hi Curt
I am tied up this week in a national meeting (unfortunately being held in hot Dallas). Let me get an update on the site and I will get back with you.

John C Meyer
Acting Associate Director (6SF-R)
Superfund Division
214.665.6742
Cell 214.460.5897

Hi John,

Could I get an update on Arkwood, please?

Also, do I still need to FOIA the project updates and other communications submitted by McKesson? I know Gloria Moran wrote to John Edgcomb (in rsponse to his complaints about me and about EPA's talking to me without McKesson's "permission"); in her letter, Gloria promised Mr. Edgcomb that McKesson would be informed of EPA's communications with me "as appropriate" without McKesson's needing to FOIA the communications.

Am I being afforded the same courtesy and treatment as McKesson is by Regional Counsel?

I complained to you before of Gloria's writings to my Dad and to John Edgcomb in response to Edgcomb's threatening letters to her.

I am still a member of the public. I am also my father's spokesperson. The two are not mutually exclusive, as Gloria has previously maintained. I am **not** an owner or PRP, although Gloria has said that I could become one, which I found threatening and coercive.

Now I need to know what EPA and McKesson has been talking about since the end date of my last FOIA request, the responses for which did not include current project updates up to the end date of my FOIA request. Makes me wonder what other documentation was not released with that final. Are you satisfied that I got all the documentation, including all ancient history as well as the most recent things that came through while I was waiting for the request to be completed?

Thanks. Have a good Fall season.

Curt
