Rosemont Copper Project
Hydrology/Water Quality Meeting
18 April 2017
Corps of Engineers Phoenix Regulatory Office
3636 N Central Ave, Suite 900
Phoenix, AZ 85012-1939
(602) 230-6950

Purpose: The Corps seeks understanding of the following questions as part of our charge to review, assess and resolve the difference between the District's and the Arizona Governor's recommendation on issuance of the Section 404 permit.

1. Would the proposed fill in waters of the U.S. as a result of construction and operation of the mine cause violations of SWQS (mercury, silver, etc.)?
2. Would the proposed fill in waters of the U.S. as a result of construction and operation of the mine cause impacts to the downstream Tier III waters?

Time	Topic	Lead
1:00-1:15	Introductions/Review Meeting Purpose	USACE/William James
1:15-1:45	EIS Modeling and baseline information	USFS/Garrett
1:45-2:15	Hydrology modeling and conclusions	HudBay
