Re: San Jacinto River Waste Pits

Dear Mr. Miller:

The ~~rain over the past six weeks is a~~ heavy rainfall in May area good reason why the hazardous materials in the San Jacinto River Waste Pits should not be exposed for an 18-24 month period while being dug up and hauled away by trucks.

The current cap has never leaked since its installation in 2011 and apparently did its job again during the recent heavy rains and flooding.

Please recommend Alternative 3 for remediation action for the Waste Pits.

Sincerely,

(b) (6)
