SEMS-RM DOCID # 1164727

CITY OF MOUNTAIN VIEW

INTER-OFFICE MEMORANDUM

DATE: April 4, 1961

TO: A. N. McKinnon, Director of Public Works

FROM: H. M. Halbesma, Chief Building Inspector

RE: FAIRCHILD SEMICONDUCTOR CORPORATION SETTLEMENT TANK

Attached you will find two copies of a plumbing diagram and two copies of construction details for a settlement tank on the site of the proposed addition to Fairchild Semiconductor Corporation, 545 Whisman Road, Mountain View, California.

This tank will receive trichlorethylene, nitric acid, hydrofluoric acid, and sulphuric acid from the chemical mixing room. At the present time, there is an identical settlement tank located adjacent to the existing building.

In reviewing the building plans with Robert A. [redacted]dge, Assistant Chief Engineer for the William J. Moran Company which is the designer and builder for this addition, I mentioned that we would insist on an approved means of obtaining samples of the discharge from this tank at a point from between said tank and the public sewer main. I might add that the nitric acid, hydrofluoric acid, and the sulphuric acid are discharged in very small amounts in that this chemical mixing room is also used a wash-down room for all equipment used throughout the plant.
