Re: NPDES Permit Reissuance package

Hello Margaret:

This is the reissuance package and file for the Leavenworth National Fish Hatchery permit (WA 000190-2). The transmittal letters need to be completed on RO letterhead. The enclosed disc and files includes all of the administrative record. These files will facilitate any changes to the permit, response to comments or transmittal letters determined necessary during concurrence review. The addresses for the permittee, Ecology and Washington Trout are identified on the draft transmittal letter.

I recommend we route this permit through the concurrence process as soon as possible since we have a short time frame to complete reissuance per a consent decree schedule. Sharon Wilson, Courtney Hamamoto and Margo Young have all participated in review of this permit and I hope to have captured all their comments and suggestions in this package. I expect to receive 401 certification for this permit from Ecology before the end of the week and will forward it quickly.

Thanks. Ragsdale
