RE: Underground Injection Control (UIC) Permit Application R06-AR-0001
Class VI Pre-Construction Permit Application
Administrative Review of Application

Dear Mr. Konings,

The United States Environmental Protection Agency, Region 6 (EPA) has received the Lapis Energy LP UIC Class VI permit application via the Geologic Sequestration Data Tool (GSDT) for the Project Blue Class VI Injection Well No. 1 in El Dorado, Arkansas. EPA has reviewed the permit application pursuant to 40 CFR §124.3(c) and has determined that it contains the information required by the regulations to be deemed administratively complete. Please note that administrative completeness only confirms the submission of required elements; it does not imply or confirm the presence of adequate technical content required for permitting.

EPA will now begin its technical review to evaluate the application's technical content. During this phase, EPA may request additional information and clarification of previously submitted information.

If you have any questions about this letter, please contact Brody Friesenhahn at (214) 665-7529

Sincerely,

Johnson, Ken-E
