Mr. A. M. McKinnon
Director of Public Works
City Hall
Mountain View, California

Dear Mr. McKinnon:

I have taken the liberty of adding your name to the distribution list for the reports of environmental surveys performed for Advanced Technology Laboratories. These surveys are performed for the purpose of indicating that our work with radioactive materials here at ATL has no effect on the amounts of naturally occurring radioactive materials in the samples analyzed. As you will note, vegetation, water and sewage samples were taken from various points in the vicinity of the ATL site. All findings were within normal limits for naturally occurring radioactive materials. I thought perhaps this information would be of some interest to you.

As you perhaps recall, in March, 1961, we were given permission to discharge radioactive liquids into the sanitary sewer system of the City of Mountain View, subject to the provisions of City ordinance No. 175.638. Thus far we have not found it necessary to do so and do not anticipate any future need to do so. Should this situation change, you will be notified accordingly.

Sincerely,

Jack Williams
