Subject:	agenda for GW106 and Lahaina grant negotiations discussion
Date:	04/27/2011 11:04 PM

Hi Nancy,

As I mentioned in our phone call earlier today, I am trying to get some additional detail for the grant negotiation groundwater programs agenda. There are two separate sessions: 1) GW 106 and 2) Lahaina. The purpose of the additional detail is to give Nancy Woo a good idea of what we will be discussing, why and what we hope to gain from the discussion. I spoke with David and we agreed that I would work with you and Kate to add detail to the agendas and then share with him. We would like to have all of this completed before our workgroup meeting on Tuesday.

The type of information we are looking for is below. I have included a few suggestions to get us started based upon the preliminary agendas David provided for these sessions. I will give you a call in the morning and would like to see if we can include additional detail where possible.

Thanks!

Hudson

<u>GW 106, Source Water, LCCs</u>
Brief description: Groundwater 106 grant activities and source water protection efforts
Brief background/context: General background on status of 106 workplan progress, funding drawdowns, old/new grants, status/majore elements of source water efforts, etc. We may be able to cut/paste some of this from David's email to Nancy prior to the last DOH-EPA monthly call.

Specific discussion items:
- Update of EPA LCC rule implementation efforts
- Status of ongoing GW106 work (specifically LCMS purchase, status of grant fund expenditures, others?)
- Resolve X? issues
- Discuss planning for FY12 grant
- Status of source water program (any specific issues for focus?) EPA issues (?)

Anticipated outcome of discussions: It may be easier to address this for each topic
Time required: 1 hr
Prep materials: ?

<u>Lahaina Wastewater Reclamation Facility</u>
Brief description: Coordination with DOH regarding UIC and CWA activities ongoing at this facility and resolution of X issues.
Brief background/context: This section will require some brief background on each of the discussion items. **We may be able to cut/paste most of this from David's email to Nancy prior to the last DOH-EPA monthly call.**

Specific Discussion Items:
- 401 Water Quality Certification:
  Discuss status of DOH information request and ?
  Discuss potential data gathering overlap/synergy issues between DOH/Army COE effort and County effort
  Timing/process of Section 401 effort (not clear what this means)
- Tracer study (UH WRRC/Geology & Geophysics)—planning and implementation
  Status of contract award

Scheduling issues
Contract deadline (referring to when EPA grant expires?)

- Seep Sampling (to be conducted for 12 months following tracer study)
  Potential contract with M Dailer; cost estimate for the work; potential funding mechanisms
  Coordination with DLNR/DAR to assist with sample collection (will they assist if work is contracted to M Dailer?)
  Development of draft sampling and analysis plan for EPA QA office approval
  Sampling Schedule
- CWA 308 Information Request
  Enhanced effluent monitoring (purpose?)
- Other issues? Maui County NPDES permit application inquiry?

Anticipated Outcome of discussion: it may be easier to address this for each topic
Time Required: 1 hour; any suggestions about how to allocate time?
Prep materials: 401 letter to county extending date?
