TO: John T. O'Halloran, City Manager

FROM: A. M. McKinnon, Director of Public Works

RE: SMITH & LOVELLESS SEWAGE PUMPING STATIONS

Two Smith & Loveless factory built Sewage Pumping Stations, described on the attached sheet, are currently stored in the yard of the Municipal Operations Center. Serial No. 551 was installed in 1957 on San Antonio Road as a part of the Sears Warehouse Sewer Main Extension project and was removed in 1964 when the agreement for joint use of the Los Altos sewer main in San Antonio Road ended the need for pumping.

Serial No. 1255 was installed on Fairchild Drive in 1959 as a part of the Ellis-Middlefield project; its capacity was increased in 1964 and it was removed in 1965 when construction of the East Trunk Sewer ended the need for pumping.

A study of possible future need for sewage pumping indicates that it is unlikely that two of these high capacity pumps would be needed at the same time. It is therefore proposed that the City Council adopt a Resolution authorizing the Purchasing Agent to sell either one (not both) of the Smith & Loveless Pumping Stations.
