April 6, 1967

Director of Public Works
City of Mountain View, California

Dear Sir:

We are in the process of installing a larger and elaborate neutralizing system. This is to replace our present unit that is inadequate.

Our neutralizing will be done by means of the batch method; it will contain two (2) 2000 gallon holding tanks with space allowed at bottom for settling of solids. We will use anhydrous ammonia controlled by Leeds and Northrup, P. H. Electronic Equipment. We will also have a recorder giving us charts for our records. With this system we should have no problems maintaining the specs required by the City of Mountain View.
