RE: SEWAGE VIOLATION

Gentlemen:

Attention: Mr. Rudy Salivar, Vice President

A sample of the liquid industrial waste being discharged into the City of Mountain View's Sewer System by your operations on August 17, 1967 at 0925 hours showed a pH value of 3.8.

Such a heavy acid concentration could have disasterous results in the Sewage Treatment Plant Digesters by seriously damaging or permanently destroying the bacterial action of the digester.

The City of Mountain View Sewer Ordinance 175.638 has limits set for a pH value from 5.5 to 9.0 with 7.0 considered to be a neutral solution. In view of the seriousness of this type of violation, it is requested that corrective action be taken immediately.

Very truly yours,

Eugene Downs
Public Works Superintendent
