The wrong number was inadvertently used to submit this priority event, which has been corrected and the notification has been updated since the initial submittal and is attached. Mr. Rick Schubert, subject bee owner, had found a massive bee kill at his hives at 8307 Quail Canyon Drive in Vacaville (3/22/2016). He moved another load of bees into the area (3/23/2016) and the same massive bee death happened to those bees. He moved a third unit of bee hives into the area from out of the area completely and again and the same thing started to happen so he removed those bees before there was another massive kill. He states that he lost queens (breeder of queens also), drones and worker bees and a Report of Loss was issued to the Solano County Agricultural Commissioner's Office (SCAC) for the loss. Loss was reported to the SCAC at between $40-50,000. Please see attached Notification Record for 16-SOL-16.
