Subject:	PENR: 20-FRE-16 (11 solar farm employees experience symptoms after possible drift from a ground application to pistachios)
Date:	Monday, April 18, 2016 3:49:41 PM
Attachments:	20-FRE-16 PENR.pdf

On April 18, 2016, eleven solar farm employees were possibly drifted on from a ground application of the pesticides Luna Experience and Lambda-Cy that was being applied to a pistachio orchard located about .5 miles away from the solar farm. The solar farm employees reported symptoms of headache, eye, nose, and throat irritation, and one of the employees vomited. Emergency services were dispatched and CalFire decontaminated the eleven solar farm employees before they were transported to a local hospital for further evaluation.

Fresno CAC staff have collected some samples and are investigating the incident.
