Subject:	85-KER-15 Priority Closing Report: Five workers complained of symptoms and sought medical attention after entering an almond facility that was treated with dichlorvos.
Date:	Tuesday, April 26, 2016 9:57:57 AM
Attachments:	85-KER-15 Closining Report.pdf

On October 26, 2016, at 7:00 a.m., the first employee entered an almond facility and four others entered at 8:00 a.m. Shortly after entering, the five complained of various symptoms (headache, dizziness, and nausea) to their supervisors. On October 23, 2015, at about 4:00 p.m., the almond facility that was treated with dichlorvos, the active ingredient in Card-O-Vap 8 (EPA Reg. No. 8536-41). The facility was aerated prior to entry. CAC staff did not find non-compliances during their investigation.
