4/5/02

Hi Nancy,

Here is additional groundwater data from the former McKesson Chemical facility, 9005 Sorenson, SPS. This data was not included in the tables sent over on 1/18/02. However when the monitoring report was submitted this data was incorporated into the data sheet sections. Wells PS-S1 and PS-S2 are pilot study wells located in the area of the former AST area where a ~~documented~~ former LUST resided and a documented release occurred.

Any questions I can be reached at 818) 557-2856.

Lori
