2 June 1960.
Visited: Hickathorn

Field insp of Lauritzen Canal off above plant.

I WRA, R²S, & HCL observed waters & shore of Lauritzen Canal near and under U/H wharf during the afternoon of 2 June 1960. Primary objective was observation of:

Observation objectives
1. discharges (pipes &c)
2. evidence of dumping wastes under wharf.

II Under the wharf, in the "bay" spanning 2 trestle ~~roads~~ bents directly under ~~a~~ a ladder leading from the shed roof to the clerestory roof of the main UH bldg, theff were observed:

Liquid discharges (see photo)
1. one submerged pipe terminating in to Lauritzen Canal.
2. Four surface discharges running down bank into Canal. ~~&~~

Solids dumped (?)

III At bent #37, a white powder or granular material was seen on the Canal bank (under U-H wharf). A sample was obtained & sent to San Tab, about 2 weeks later, for insecticide analysis.

Note Markowitz placed on 27 June & reported 43.7 % DDT

IV Six pipes terminating under the wharf ~~was~~ were observed between those reported in ~~P~~ II & the N. end of Lauritzen Canal.

Liquid discharges

of Rpts (filmerrors) of 9, 10, 14, & 15 June.

V → No effort was made to trace the pipes found
