---

Hi guys. I was finally able to get the Air Force's national BRAC QPP for PFOS-PFOAs on a good CD. I copied it to my HD and it is attached for your reference and any comments you might have.

The attached file came from a CD I got from Plattsburgh, as per my previous email below.

I also just received a site-specific Work Plan for the Fire Protection Training Area at Griffiss, and will forward that later. The CD with the QPP and site-specific Work Plan for Griffiss was no good. I am assuming it is the same QPP as for Plattsburgh, as it's a national QPP for AF BRAC bases. I will forward the Griffiss documents when I get a good copy electronically.

To clarify, the fire training areas are being sampled first (per the site-specific Work Plans), and the record search reports discussing other potential sites at the bases, and any need / plans to sample them, have not yet been completed for either base.

Please let me know if you have any questions. Thanks!

Bob

Chloe,

I cant find anything indicating what I've sent you so far on PFOS-PFOAs at Plattsburgh, but fieldwork is about to get underway at FT-002 for this.

Attached for your information (and review and any comments you might have) is the Perfluorinated Compounds (PFCs) Release Determination Work Plan Addendum for the former Fire Training Area at Plattsburgh. The General PFC Release Determination at Multiple BRAC Bases Quality Program Plan (QPP), which includes the SOPs and QAPP for the overall nation-wide program was to be sent for reference under separate cover due to file size limits. I'm not sure the AF ever sent it. I am checking and will let you know.

Also attached is an April 2014 letter outlining the approach they plan to take at Plattsburgh, and a

Sept 2012 internal AF memo transmitting the AF Aug 2012 Interim Guidance on PFCs.

Sorry if I didn't send you all this before. Please feel free to forward to anyone you feel appropriate. The April 2014 Plattsburgh letter and July 2014 Addendum are specific to Plattsburgh (the latter specifically to the FT-002 site). So not of much value to Marian (I did cc her), but the other stuff is AF-BRAC-wide. I have not received much further specific on Griffis, maybe just a notification letter outlining approach, as well as the same AF guidance and transmittal letter, and I may have sent that Griffis correspondence out to you and Angela and mentioned that I had already received same from Plattsburgh. Havent received anything site-specific on Griffiss yet.

Please let me know if you have any questions and maybe re-explain to me what type of role we plan to take in this. Thanks.

Bob
