RE: Colbert Landfill Cleanup

Dear Mr. (b) (6) :

This letter is in response to our telephone conversation on March 12, 1990. Spokane County is conducting the design and construction work for the cleanup actions at the Colbert Landfill site. Their work is being done with the oversite of the Washington State Department of Ecology (Ecology) and the U. S. Environmental Protection Agency (EPA). The cleanup decisions that have been made are protective of both public health and the environment. The cleanup levels are mandated in EPA's Record of Decision document, dated September 1987. Also, Spokane County has agreed to meet those same cleanup levels in a negotiated Consent Decree with Ecology and EPA, which was signed by a Federal judge in Spokane in February 1989. Ecology and EPA are involved to ensure the work done by Spokane County meets all applicable human health and environmental standards.

If you have any questions regarding this letter, please call me at (206) 438-3043 or leave a message on our toll free line 1-800-458-0920 and I will return your call. I would also suggest that you contact Dean Fowler at (509) 456-3604. Dean is the Colbert Landfill project manager for Spokane County.

Sincerely,

Mike Blum
