Subject: Public Comment Regarding Quendall Terminals Project

Hi Kathryn,

I am writing in my capacity as a resident of King County and an avid bicyclist to urge the EPA to work aggressively to clean up the Quendall Terminals area of Lake Washington. I would like to see immediate efforts to reclaim this land and repurpose it to allow for public access and habitat restoration.

I often ride the bike trail along the lower east side of Lake Washington. The Quendall Terminals area has the potential to be another pearl in the string pearls of lovely parks encircling Lake Washington. It can go from being an eyesore to something comparable to Gene Coulon Park. Please consider this when making your plans for cleaning up this site.

Thanks.
