Hi Robin,

Not a lot has happened recently. OAR decided to seek Science Advisory Board (SAB) input on their emissions estimating methodologies (EEMs) that are being developed from the National Air Emissions Monitoring Study (NAEMS). Because we are going to rely on the NAEMS EEMs in the development of our rule, we are slowing down until OAR's EEMs are further along.

The current schedule (have not updated) is at the end of the latest Analytic Blue Print: [redacted]

Hi Lynn,

I'm just wondering what the status is of the rule-making. Could you send us an updated schedule/calendar for development of the rule?

Thank you,
Robin
