Subj: Telephone Call re Arsenic Rule-making

From: Clark Gaulding

To: Docket

Following is a summary of a call I received on August 17, 1983 from a (b) (6) (b) (6) of Vashon Island.

He expressed a concern ~~that~~ over EPA's obligation to promulgate the NESHAP's before Superfund studies could be completed. Specifically, he was fearful that, if EPA went ahead with the converter controls first, the Agency would be reluctant to adopt further controls later on.

I advised him to participate in hearing and make his concern a matter of record.
