Subject:	Chlorination of effluent prior to injection at the Lahaina WWRF
Date:	10/11/2011 01:02 PM

Aloha all,

Please note that per the County's Consent Agreement with EPA we will be increasing our chlorination of the effluent which enters the injection wells to meet state R-2 standards. The approved agreement mandates that this increased disinfection shall occur prior to October 28, 2011. We are assuming that there has been sufficient time so that this will not effect the ongoing tracer study. If this change in disinfection is a concern, please let me know as we will need to discuss with all parties and reach an agreement for an alternative date with EPA. If no objections are raised the increased disinfection will most likely begin next week.

Thanks,

Scott
