Subject: Duwamish

Dear Ms. Knudsen,

I am writing to support the EPA's Proposed Plan for the East Waterway of the Duwamish River. After recently traveling by boat tour on the Duwamish, I am pleased that 120 acres of the waterway is slated for cleanup, including the removal of almost a million cubic yards of heavily contaminated sediment from 99 acres, and on-site treatment of twelve acres under docks and piers. I am heartened that EPA has listened to the community most affected by the Superfund site (or at least the community of humans, and not fish and birds, who are not well known to be able to advocate for themselves) and urge EPA to resist efforts to dilute the comprehensiveness of the Proposed Plan.

Thank you for your time.
