DISCUSSION

According to Mr. Eyer the Chicago Sanitary and Ship Canal has been declared a navigable waterway and is used by many 'pleasure boats'. To his knowledge there is no fishing or other recreational activities in the Canal, as the main purpose is industrial/commercial.

DISCUSSION

Information was given to me about the number of people serviced by the Western Springs Water Dept.

There are approximately 4500 families (13,545 people), plus an additional 85 Industrial and Commercial Hookups.

People who reside in Western Springs are required to be on Municipal water services. (Both Water + Sewer)

DISCUSSION

Jerry said that LaGrange receives Lake Michigan water for drinking purposes from Melock. There are approximately 4,500 accounts (both houses and businesses) which comprizes 17,000 people in just LaGrange. It's against code to have your own private wells.

PROJECT NUMBER	SITE NAME and LOCATION
FT- 1305	Gemini Leasing

DISCUSSION

Mr. Potacki said that the drinking water the residents of Hickory Hills recieve, comes from the city of Justice, which comes from the City of Chicago. There is an emergency well that is drilled down to 1678 ft. but its purpose is strickly for emergency use. There are 13,000 people in Hickory Hills and approximately 2,900 residential homes on municiple water supplies and 400-500 Commercial businesses on Summit supplies, stated Walter.

As far as private wells, he knows of 2-3 people who have their own wells and consequently it's not against city code to have your own drinking water.

In addition, the water of Hickory Hills is not supplied to any other municipalities.

DISCUSSION

Janice told me that countryside recieves its water from McCook, which gets its water from Lake Michigan. There are 1,023 residences on municiple water supplies in Countryside. There are the municipalities of: LaGrange, Highland, and Indian Head Park that also buy water from Countryside and in turn some residences in Countryside that get their water from LaGrange, Highland, and Indian Head Park.

DISCUSSION

The suburb of Brookfield which consists of 25,000 residents is furnished by Lake Michigan water for consumption. The drinking water is provided by the Brookfield Water Commission which also provides water to LaGrange Park, Lyons, Cermack Pool, and North - Riverside.

Dan stated that there aren't a residents that have their own private wells in Brookfield.

PROJECT NUMBER	SITE NAME and LOCATION
FT-1305	Gemini Leasing

DISCUSSION

Howard stated that Burr Ridge which buys its water from the Willow Springs Water Commission, supplies water to the 6,500 people of Burr Ridge. Howard said water is additionally pumped through Burr Ridge to Willowbrook for a small processing fee.

In addition, there are approximately 125 or so, controlled private wells in Burr Ridge. These private wells are controlled by the DuPage and Cook County Health Departments.

DISCUSSION

Linda explained that Summit recieves its water supply from the City of Chicago; which in turn recieves its water from Lake Michigan. There are approximately 2,300 houses and businesses that are on Summit municiple supplies. In addition, Linda said that it's not against city ordinance, but that she doesn't think that there are any people on their own private wells. Water is not sold by Summit to any other Municipalities.

PROJECT NUMBER	SITE NAME and LOCATION
FT-1305	Gemini Leasing

DISCUSSION

Ken informed me that Western Springs recieves its water supplies from 3 drilled wells; two deep wells and one shallow well. The deep wells: (1) 1600 feet in the Galesville sandstone aquifer. (2) 1900 feet in the Mount Simon - Galesville sandstones, aquifers. (3) 385 feet in the Maquoketa (Shale, Niagara-dolomite) aquifer. The number one well is the primary well used year-round with the number two well being a backup in times of heavy use. The shallow third well is used only for emergencies. (Used less than 1% of the time.). The water is treated, softened, and filtered then placed in a reservoir. In times of heavy use raw water pumped out of the number two well is blended with the treated water.

Ken stated that he didn't think anyone else in Western Springs had their own private wells, he wasn't sure that if it was against code to have a private well. The wells themselves, (the wells of the municipal supplies), are located (1) Wolf Rd. and Hilgrove (2) Wolf Rd. and the Burlington (3) End of Hilgrove Rd.
